

My Rhyme Book

Jasper
Springs

Inside the Unstable Mind of THE MANSTER

I created this entire album from scratch over the last 6 months of my sabbatical. This was the birth of Jasper Springs, my alter ego and a childhood nickname I despised and decided to embrace to overcome the fear. The title also embraces another nickname, "The Manster," of which was used by my father whenever I demonstrated dominance in childhood sports. The album theme is release therapy, a brain dump of soul-searching thoughts I worked through over my sabbatical to overcome fears and anxieties, and to re-emerge as a bolder and stronger version of myself.

This is where it all started. I took a ~1-year sabbatical and was seeking more passion and meaning in life. I was surprisingly inspired to start rapping after being exposed to a white Jewish rapper named Lil Dicky, of which I was blown away by the niche he was filling, along with the boldness in his marketing techniques. I was like "I've been studying hip hop for years longer than this guy, so maybe I should give this a shot and find a niche myself."

Inside the Unstable Mind of THE MANSTER

Jasper
Springs

1 Intro - It's Alive	1:29
2 Lost	3:41
3 Blow a Wad	4:16
4 The Journey	3:44
5 Overthrow the Regime	4:19
6 Grass is Always Greener	4:02
7 Punchline	3:32
8 Karma Stackin'	4:18
9 Offline	3:39
10 I Want That Feeling	3:58
11 Winners' Anthem	4:15
12 Next Level	4:47
13 Devils in Disguise	4:34
14 Outro - Lived a Life of Hip-Hop	5:44
15 The Journey Remix f. Clyde James (Bonus Track)	4:05

Inside the Unstable Mind of THE MANSTER

1. Intro – It's Alive

*Yeah baby, it's alive, livier than it's ever been, been messing
with the beats, but finally time to try my hand with pen*

*Pulling double duty, spit the fire to sear the tracks that I've
been cooking in the dungeon, in the den*

*Yeah, pain was intensifying, fled to shelter, needed hiding,
sure to re-emerge, when I can*

*Let me first to take you on a journey through the unstable
mind of a half-monster, half-man*

*Manster in the flesh, on a journey, on a quest, find the
meaning of this life, put this rap thing to the test*

*Hamster on the wheel, burning rubber, needing rest, from
this endless marathon to be the best*

*Had 'em all fooled, on the surface, looking fine, way I'm
handling my business, bitch-slapping the grind*

*But take a peek under hood and see what you will find,
nervous system lined, with a loose, unstable mind*

*This intro is a play on "The
Manster" nickname,
whereby I'm a monster who
goes into hiding to overcome
suffering caused from going
too hard down a path that
no longer made sense.*

Inside the Unstable Mind of THE MANSTER

2. Lost

V1

Ayo it's Springs, back for the first time
Didn't realize I had this crazy gift to rhyme
Out of my prime, more like out of my mind
You will see that I am pretty much a one of a kind

Lyricaly, you can understudy me
Oh yes, you'll be under me, did I stutter, G
See, the skin's white, skills tight, that's right, much bite
Apprentice to the '90s when the rap skills were in top flight

But we are currently in the afterlife of hip hop
Bunch of zombies singing autotune and Fetty Wap
Nursery school rhymes pushed cuz the girls still buyin' pop
Some of my favorite rappers selling out and droppin' fops

I used to have to rewind, punchline after punchline
Thought the game would be fine,, aging like a fine wine
But many rappers declined, disappeared or did time
Left me to my lonesome, recyclin' them old rhymes

V2

Back to the topic at hand
Rappers cookin' lyrics with no spices, bland
I got more spice than those girls, and
I entice with those tongue twisted verses man

On the contrary, situation hairy
Haven't heard a rapper's verse that I couldn't bury
Just put this together in a one-night fury
Imagine when I put the master plan in front of the jury

It's a shame looking at what y'all been bringing to the table
Since before all them kids started cuttin off the cable
To droppin off a cliff when their parents became able
And now I'm unable to table the lack of the lyricaly capable

Haven't heard a classic in a decade, bro
Missing in action, tag on its toe
As if it had a deadly, venomous foe
Leaving lyrical junkies yearning for more

V3

Rappers droppin' bars, with no reason, worthless
I set the bar higher with a deeper purpose
Money, bitches, cars, reefer, themes that irk us
Tell us somethin' new man, teach us, learn us

Sick of hearing the same damn things recycled
Won't loosen up my grip on that mic my hand hold
Cuz my shit is hot, and your shit is type cold
I'm melting down you glaciers metaphorically told

Matter fact ice cubes in my coffee
Melt away, like that snowman frosty
Costly, just like global warming will be
To battle me lyricaly, funeral, casualty

I had it, see, the shit used to matter to me
Searching for my fix everyday like an addict be
Rap game's gone down, not laterally
On my back, soon they'll be patting me

Chorus

I'm lost, without that music known to inspire
Rappers in the lane I'm bout to blow by a
Retire, go find a new occupation
Cuz the true fans want you on a permanent vacation

I'm lost, without that music known to inspire
Rappers in the lane I'm bout to blow by a
Retire, go find a new occupation
Cuz the true fans want you on a permanent vacation

This is the first song I ever created. It was inspired by the change in direction in hip-hop, whereby lyricism had become a lost art in favor of auto-tune and mumble rap. I felt that I could create a more compelling rap in one night than what had become popular in the mainstream.

Inside the Unstable Mind of THE MANSTER

3. Blow a Wad

V1

My crew steps on the scene, tough not to be seen
Same theme, fresh, clean, outfits looking real mean
Girls behavin' like fiends, they know we getting the green
They swirlin' around the team hopin' they get between

The sheets with the Springs when it's time to break out this place
Be a freak, break the springs, like I signed that bitch up to race
But first she wanna see how that green in my pocket taste
Make a round of shots disappear without a trace

They try to play them cards right, see if you're gonna trick
See if the stories align, from everyone in the clique
See if you're livin' a lie, or livin' a motion pic
If you a big dog, flea or a little tic

So if you livin' a lie but you a really nice guy
Or if you the big dog put your hands in the sky
We gon' buy the bar out of that whiskey and rye
Get those girlies a little tipsy, then give em a ride

V2

Club's a fire hazard, can't even maneuver through
Behavin' like wild animals, not caged in the zoo
Prime table in front, still an obstructed view
Now emerges some talent, standing on queue

Direct 'em to approach, Connection to ensue
Standard line of questioning, what is it that you do
Heard it so many times, don't even drop 'em a clue
Instead lead with my hobbies, now how about you

They hover round the table, that sexy little stable
Highly ratable, now debatable, we filming reality cable
They're hopeful and their playful, designer clothes with labels
False move they'll be ungrateful, off to another table

But the chemistry is something that they cannot depart with
Kickin' top game we about to steal their hearts with
My boys' act in syno, like a performance art gig
Or is it the bottle service, the girls are in love with?

V3

Look around the club, all I see is wandering eyes
Directed at the table with team who rounded the prize
We living in the moment, times of our lives
Haters keep on watching, hoping for demise

Narrowing the focus on the hostess with the mostest
Who I wanna see in the morning, toast to fresh mimosas
Rock bodies in the bedroom, knock cushions off the sofas
Need the prognosis before the club closes

She sees the bottles flowin', no longer thinkin' I'm tellin' lies
Knowin' the convo is workin', unblinkin' with gazin' meltin' eyes
Her mind plottin', debating about what kind of alibis
Will disguise the sex and lies she'll be deep in til sunrise

I kiss her on her neck, whisper in her ear
I think it's about time, you and me disappear
Dually noted, tell me your place is near
But first one more drink, for me and my girlfriends, dear

Chorus

If she the baddest in the club, blow a wad on her
Pull it out, let her see and blow a wad on her
If you a baller all the way, blow a wad on her
If you been savin' for this day, blow a wad on her

If she the baddest in the club, blow a wad on her
Pull it out, let her see and blow a wad on her
If you a baller all the way, blow a wad on her
Don't let that girl get away, blow a wad on her

This 2nd song I ever created came about after seeing my family's joy and positive reaction from my first song. The discussion with my brother was "I should spend all of my time perfecting and marketing one "club banger." The double entendre title has a lot of meaning for me. Many times I felt insecure because I wasn't at the status I wanted to be yet in life. I didn't have the courage to approach the hottest girls in the club, as most came across as status seekers. This song is in essence saying to have your way with the shallow, unapproachable hot girls who only care about money and status.

Inside the Unstable Mind of THE MANSTER

4. The Journey

V1

All this time, working hard, stay in tip-top
Never thought I'd break into mainstream hip-hop
White boy from the burbs, cream of his crop
Listen to what he's sayin' man, give him his props

Always wanted in, but understood the marketing
Need the underdog to overcome the struggle within
But realized this whole time that I was strugglin'
To realize I'm the underdog, bound to win

Bored climbin' the ladder, in that world that doesn't matter
Cuz the boards control the latter, political chess games of disaster
While the rest just pitter-patter, senseless water cooler chatter
Wonder if jumpin' ship is badder than corporate slaveship with a master

Cuz promotion's disguise for additional work
Maybe a 3% raise, few additional perks
Anxiety sets in, instability lurks
In bed with miserably content, despised climbin' jerks

V2

So I've been looking for outs, ever since getting in
Had been on the right route, before injuries, sins
Started hedging my bets, 10 years of head spins
Most would view as success, but to me still no wins

Chipping away at the barriers to success
Mingled with IT nerds, you should see how they dress
Those with impressive titles, what they do, cannot guess
Overpaid to relay messages more or less

All this time, on the side, brainstormed escape routes
On my mind, rather die, than go the safe route
Rolled up sleeves, working hard, not the type to pout
Soon enough, squaring up, for the title bout

Champion, that's what I'm about
Survival of the fittest, see who emerges from the drought
To the top of the list, no question no doubt
Hip-hop and success, time to establish my clout

V3

All this time, been sittin on potential
Makin it kinetic now, get my pencil
So many past due thoughts rushing through my mental
Bout to overflow, no longer calm, resentful

Regretful, that I've been so neglectful
To myself and my fam for lettin so much time go
Without using this gift to be so successful
Living the high life, so content and restful

Don't get me wrong, been a hell of a life
So many good moments, future's always been bright
But the future's rapidly approaching, and that present's in site
Finally found my home, and it finally feels right

My home's on the stage with my hand on the mic
Training wheels flyin' right off of the bike
Void's been filled, energy levels spiked
Knowing what embracing my talent finally feels like

Chorus

Too many days, too many times
Sleeping on my dreams, about to make them mine
No reincarnation, no rewinding time
One more shot, before the end of the line

Too many days, too many times
Sleeping on my dreams, about to make them mine
No reincarnation, no rewinding time
Hunger for more, approaching my prime

This song speaks on the long road I went down in life that didn't necessarily fill my soul, and how I finally had that epiphany moment where I found my calling/passion/hot button. Not only was I getting strong feedback and praise for my first couple of song attempts, but I felt that "in the flow" energy rush that would keep me up for hours if I created a rhyme pattern or verse that impressed even myself. This was the moment I decided I wanted to keep going down this new journey and create my very own album.

Inside the Unstable Mind of THE MANSTER

5. Overthrow the Regime

V1

Can't sleep, anxiety, stressful times are tryin' me
Politicians lyin' to me, lyin' to all society
Gridlocked on the policies, ignorant philosophies
Hiding behind the walls, of gated community properties

Politicians, bankers, CEOs still in bed
Ensuring 99 percenters barely gettin' fed
They break bread, secret deals, hid or get shred
Can't be why our forefathers fought and bled

Hypocrisy, dual lives being led
Believin' pathological lies in their heads
Straight from the brains to their mouths they get spread
Truth seekers shaken by conviction in which they're said

It's time to rise up properly, organized and operably
Country's a mess, a mockery, like a drugged up, worn down rocker be
Not about a plea, not about to flee
Rather rally powers to be, to end deceit and greed

V2

Living the after effects of the sub-prime crisis
Hometowns rottin' away, zombies, lifeless
Wall Street bailouts, no jail, priceless
Lookin' over backs for attacks by ISIS

Instability reigns, tropic storms, floods, and rains,
Global warming remains, top of most minds and brains
Due to lobbying strains, political campaigns for gains
Broken system remains, bound for slow death and pain

Shoulda been had super trains across the terrain
Coast to coast, along the great plains
Instead crumbling infrastructure, horizon's a stain
Right in front of the eye, along the same vein

Misappropriated funds, for such a long timeframe
Oblivious to some, for me, ongoing mind game
Tax code corrupt, blatantly arcane
Time to erupt, round up those who've been at blame

V3

Never shot a gun, but the fingers getting itchy
Never one for problems, but situation's getting sticky
So if we're facin' ultimatum, I beg you come and get me
Learn to master the cover up, like a turtle neck do a hickey

Top lawyer on the case, before the plan unravels
Command court order, before the judge grabs the gavel
Back on the street, sneaks hit the gravel
Ridin' to this beat, back navigating my travels

How many Boondocks Saints are ridin' with me
To put a stop to this real-life Gotham City
Talkin' to those exhausted from feelin' self-pity
Life's been on the downtrend, feelin' real shitty

Time to reclaim what's supposed to be ours
Riot the gates, my homies, stampede, charge,
Target the crooked players still at large
Re-deal this fixed hand from unshuffled cards

Chorus

Whether peaceful protests, riots, getting mean
Think it's about time we overthrow the Regime
Whether with the pen, hit the deck, clear the scene
Think it's about time we overthrow the Regime

Whether it gets messy, or we keep it squeaky clean
Think it's about time we overthrow the Regime
Whether we keep it quiet, or manage to be seen
Think it's about time we overthrow the Regime

Big Bro's Favorite Line :)

This is my anti-government song for the album. It speaks on how we who never or no longer benefit from the unjust political structure in place need to finally take things into our own hands. The lobbying and big money interests have created a fixed fight that we need to break up by any means possible, or our country will continue down this doomed path.

Inside the Unstable Mind of THE MANSTER

6. Grass is Always Greener

V1

Mind checked out, of this relationship
Wandering eye, this sail's about to ship
Far, far, away, to a port with another chick
Somewhere along the line, we just refused to click

Know she fantasize, about other guys
Little white lies, when I ask, no surprise
Back and forth pries until somebody cries
Both better off if we sever off ties

But the thing about this girl, moments of greatness
Repeat lateness, but arrives so gracious
All while butterflies in my stomach, fidgets, paces
Pleasure to be with when in my good graces

But then I go out and see so many faces
Pretty little girls, all times, all places
Can't control my mind, off to the races
When they're flirtatious, with warm embraces

V2

Evil deed of a higher being, to make us so conflicted
To want our cake and eat it, too, yet make it so restricted
Feelings get hurt, crushed as predicted
When guards of temptation get let down, or get lifted

Relationship routines get you going through the motions
Taking things for granted, neglecting the emotions
Who's at fault, to blame, both having different notions
Tough to reignite the sparks, no magic balls or potions

Life was good enough, convenient weeknight love
Companionship and hugs, the kisses and the rubs
Bubbles in the tub, with the robe dropped on the rug
And the bucket full of ice with the bottle full of bub

But then start peeking, at my friends' plans on the weekend
Funny stories leaking, bout new romances they are seekin'
While we're endless searching on the Netflix, our plans reckon
Wondering if we manage to make it through to the week's end

V3

Fast forward, cut ties, out for drinks with the guys
Months since we spoke, amazing how time flies
Rounds keep flowing, liquor courage keeps growin'
Faces proly showin', that we debating about approachin'

Table full of girls in the back that we've chosen
Finally make the move but in our paths, we are frozen
Another group of guys stepped in front and seemed to nose in
Know we could've made a better match, end up closin'

But now we lost our table and our seats and now we're posing
Debate about makin' a plan B, or see who strolls in
Best place to place a baited hook while we're trollin'
Grab another round of liquor drinks while we're voting

While I'm waiting in line, she re-emerges on my mind
Always eager when I'm out, to see what I can find
But when night starts to fade, and not treating me too kind
Wish I just could hit rewind, travel back in time

Chorus

Out of sight, out of mind, that's how the story goes
But grass is always greener, no matter what the scenario
Don't let your mind lose sight, weigh the cons and pros
That way you're bound to find many more highs than lows

Out of sight, out of mind, that's how the story goes
But grass is always greener, no matter what the scenario
Don't let your mind lose sight, weigh the cons and pros
That way you're bound to find many more highs than lows

This was my relationship song for the album. It speaks on the psychology of always wanting what we can't have. We want that spark from a new connection or experience, but not at the cost of losing something comfortable and familiar.

Inside the Unstable Mind of THE MANSTER

7. Punchline

V1

Just because you talk tough, doesn't mean you can rap with me
Your resume's weak, couldn't get a job at Applebees
On the mic, your majesty, demonstrate mastery
I weave through with the lyrics, like a needle through a tapestry

Like Barry Sanders jukes, defenders broken at the knees
Like Steph Curry crosses, steps back and drains the 3s
Where it looks like no one's challenging, or everybody flees
Let me take you on a ride, just sit back enjoy the breeze

Cuz I need your full attention while I do this freestyle session
Lyrics a bit complex, sure to have you second guessing
Like a pop quiz in the morning and you definitely skipped the lesson
Cuz the only think you testing is patience of the rest of 'em

Far as myself, rarely failed or skipped a lesson
Never skipped a beat at any feat under discretion
A-OK with my lyrics under question
Under the microscope, ready for dissection

V2

Laser-focused on my bars like a scanner to a barcode
To hang on every meaning of word, or phrase you tryin' to decode
Baring the fruits of my labor, reaping the harvest of the seeds sowed
Lyrics penetrate, Marshawn, Beastmode

Perpetual repeat, ear drums bound to explode
Mind controlled, pimp hoed
Cuz my wordplay is witty, More like wizardry
With the mic as my wand wondering where my cape and glitter be

You'd think the mic is magic, but this ain't Channing Tatum
Just a guy who steps to it with pandemonium and mayhem
Abuses it then drops it like he doesn't give a damn
Cuz he ain't about to toss it to an undeserving hand

When I write, its poetry, Edgar Allen Poe to be
Possessed with the pen, like something has come over me
Stamp of approval like it's been taken to a notary
Fresher than a brand-new opened bag of potpourri

V3

My lyrics are the yeast, for the baker trying to make the bread
The hormones swimming through that body of the thoroughbred
That feeling that you get luring a dime piece to the bed
Or when you overcome an obstacle from passion that was bled

Competition I shred, like I'm weaving in a sled
Or like I'm jamming on guitar with a band out in the shed
Matter fact, take the competition out into the shed
Hang 'em on the rope or out to dry cuz they are dead

From the verbal massacre, endless rounds of lead
Flying out the mouth inflicting wounds and seas of red
Shouldn't they've been told, made aware or even read
Instead fell in the booby trap, and have since been put to bed

Off to the dogs they're fed, moments they could have fled
Posts on Worldstar, YouTube, now the dread
Words from bloggers, critics all up in their heads
Swagger, street talk promo as good as dead

Chorus

What'd he say? What'd he say?
What'd he say? What'd he say?
Rewind that punchline one more time
Rewind that punchline one more time

What'd he say what'd he say in they chime
Blank stares, jaws dropped, blown their minds
Rewind that punchline one more time
Rewind that punchline one more time

This song is intended to be my lyrical demonstration on the album. My favorite lyricists, i.e. Jay-Z, Wu-Tang Clan, Fabolous, etc. all had the ability to suck me in with complex rhymes and punchlines that I immediately had to replay and say to myself or others listening "Oh my, what'd he just say?!"

Inside the Unstable Mind of THE MANSTER

8. Karma Stackin'

V1

I be stacking Karma, cuz what goes around, comes around
Sending good vibes, daps and pounds around the town
Once was lost, now I'm found, almost there, homeward bound
Touching lives, buying rounds, turning frowns, upside down

Walking down the street, open to the meet and greet
But get the cold shoulder, heads down, speedy feet
Life's a race, never present, stress influence, every pace
Strangers self-conscious, void of warm embrace

Monotonous routines, corporate machines
Sucking life right out, ruining self-esteem and dreams
But I take it on myself to touch one life at a time
Breath fresh air into lungs, anyone I pass or find

Resistance breaks, they pump the breaks
Engaged to the point they crack a smile on their face
For goodness sakes, the world awaits,
Start stacking karma, re-determine your fate

V2

It's Not just about stopping strangers on the street
Passing good vibes, staying upbeat
It's helping self-conscious souls overcome fears
Standing up for elderlies needing the seats

Picking up trash, cleaning the streets
Avoiding overindulgence, hoarding the treats
Everybody eats, in your neck of the woods
Downplaying the need for material goods

Always taking action
No more coulda, shoulda woulda done that
World a welcome mat, always ready to chat
Quick to give a compliment or pat on the back

For a life-saving cause, sign up as a donor
Inform the help desk, the printer's out of toner
Give back that pen, supposed to be a loaner
Or something that was lost, back to that rightful owner

V3

Many paper chase, risk take, career climb
To make it big, requires luck, right place, right time
Rubbing elbows, politics, sell their souls to shine
Few players emerge, rest ride the pine

Either way, compare their pay, to the next one in line
Self-conscious about the ones with more
False perceptions eating at the core
The lifestyle attracting pretentious whores

Not for the faint of heart, but not too late to part
Feeling of not having bound to tear us apart
Startin' a new journey, where the compass is the heart
Karma's the currency, stacking is the art

So get up, get out, get your mind right
Set your sights on good deeds, get some moral victories
Helping those in most need, cuz the time's right
To start taking flight with the karma stacking

Chorus

Money is the route of evil
But Karma's the currency of the people
Chasin' the money, on the wrong quest
Chasin' the karma, brings out the best

Start stacking karma chips, start stacking karma chips
Wrap those arms and wrists, around those Karma chips
Start stacking karma chips, start stacking karma chips
Wrap those arms and wrists, around those karma chips

This song was inspired by a close family friend I had the pleasure of traveling to Southeast Asia with during my soul-searching sabbatical. The meaning of life seemed to click after watching this selfless "American Buddha" interact on a deep level with the utmost presence and generosity to every stranger we passed along the way...to the point where a few were left in tears "Resistance breaks, they pump the breaks..."

Inside the Unstable Mind of THE MANSTER

9. Offline

V1

Your behavior, awkward, eyes glued to the mobile
Scanning social networks, being anti-social
Never present, nor focal on the local
Environment, or when at a live event

Let me get vocal, let me vent
No longer fun in person, pretty much what I meant
Obsessed with taking those perfect pictures to post
Livin' lies for fake friends, instead of toastin' with those close

What is the goal, what is the aim
15-minute fame, personal branding game
Hoping discovery leads to wealth and financial gain
Or that same old excuse, people, place at lame

Maybe look in the mirror, see that self-reflection
Time to be objective, try some second guessing
Could it be you, that needs a social lesson
Presence or lack thereof, needs a lil' refreshin'

V2

Those who expose lives, in hopes of social gaining
Open themselves up, fair game to the shaming
Body shame, slut shame, all the same
After effects of presenting their images in vain

Hyper critical lames, liberal dames,
Rage against attackers, support those in pain
Even though possible outcome known before playing the game
For publicity seeking, who else to blame

Best live a private life, stay in your lane
Put on your blinders, if you can't take the feedback,
Or peep the inner circle, see how they react,
Do they anticipate praise, or people talkin' smack

Survival of the fittest, cuz jealousy from the chimeras,
Sick of seeing pretentious social ladder climbers
Better know the outcomes, cuz onlookers are vicious,
Self-proclaimed critics, loosely regulated cynics

V3

Sick of the self-promotion, pics of food and kids
Pinups of wanna be models, well for that I semi kid
Spend most my time, offline and off the grid
Similar to a criminal, in prison doing a bid

Peoples' faces light when they receiving the likes
From a majority who won't resurface the rest of their lives
I'd rather keep my circle tight, those who have my back in a fight
Whether wrong, right, pick up the phone in the middle of the night

Tune into social media, mostly for the news
To avoid mainstream media and pundits on queues
But even that is spun by those with hidden agendas and views
Starting to become a no gain, a lose, lose

Remain private, stingy with the hash tags
More than 1 pound, I'm throwin' red flags
More than likely attention seeking douche bags
Those who brag and brag cuz the self-esteem lags

Chorus

I'm offline, hard to find, somewhere on the grind
People who really know me, know I'm doing fine
Rather live real life, than one that's just online
I therefor remain present, give those I'm with my time

I'm offline, hard to find, somewhere on the grind
People who really know me, know I'm doing fine
Rather live real life, than one that's just online
I therefor remain present, give those I'm with my time

My Favorite Line

This theme is self-explanatory and piggy-backs off Karma Stackin', but with a strong emphasis on striving for presence after seeing how powerful interactions and connections become by focusing your energy intensely on those who cross your path in the flesh.

Inside the Unstable Mind of THE MANSTER

10. I Want That Feeling

V1

Doc, write that prescription, I need it today
Make the physical, mental pain go away
Short-term fix, short-term stay
Though pain will intensify by the next day

But live in the moment, the therapists say
Could be gone tomorrow, so get out and play
No need for lectures, stop avoiding delay
Need that remedy, else in bed I lay

No addict, user, junkie, abuser
But pain won't subside, I tell the accuser
You know spiritual being, holistic healer
Natural remedy, wheeler and dealer

If it works for them, should work for the rest
Shaking heads, if you default to ingest
After various attempts, failing their tests
Leave me to be, I know what works best

V2

Need a short trip, journey from here,
Countdown the hours, to open a beer
'A' meaning 6, to get my next fix
To calm down my nerves, slow down the ties

Of that internal clock, brain, head from spinning
Split personality, wrong side is winning
Encourages indulgence, influencing sinning
Inflating head ringing, migraines beginning

And the pain intensifies, blood pressure rise
Off the charts, as if gravity defies
Stress takes ahold, grips, pries
Cycle repeats, won't let up and die

So I binge drink, pop meds, a bit too often
As I analyze root cause of pain needed to soften
No addiction, controlled light switch, on, and off-ing
May or may not be fast lane to the coffin

V3

Always pretty good at masking the pains
Better than putting problems on others' brains
Because they drain, make others wanna refrain
Put up a shield, repel, avoid the strain

But the pain leads to depression, if left in inertia
Weaknesses exposed, bound to unearth ya
So I cheers to the medicine of choice
Legal or not, just let me rejoice

Cuz you don't know what I'm going through on the inside
How many avenues tried, main roads, hillside
To overcome pain, eliminate, subside
So ease on the judgement, and just let me ride

When I say ride, means being alive
Taking the edge off, party in stride
Minimizing the downward slides
With those I confide, with the utmost pride

Chorus

I want that feeling, that takes away the ceiling
Makes me feel good, feel like I'm healing
Helps me live a much better life in the moment
Overcome the daily pain, the daily torment

I want that feeling, that takes away the ceiling
Makes me feel good, feel like I'm healing
Helps me live a much better life in the moment
Overcome the daily pain, the daily torment

Most hip hop albums I've listened to always seem to have a drug song. This one touches on the chronic pain I've been dealing with for years, much of what stems from anxiety and nightly jaw clenching. The song is saying that life is about being happy and feeling good. If I'm suffering, I should be able to do whatever I have to do (as long as it is not harming anyone else) to avoid suffering without being judged by someone who has absolutely no idea of what I'm going through on the inside.

Inside the Unstable Mind of THE MANSTER

11. Winners' Anthem

V1

Step to that podium, handle that crown
Second-class citizens, please step on down
Hijack that club, hear, feel that sound
Melody sweet, bassline pound

Cheers to the winners, order the rounds
Bottles keep flowin', hope no one drowns
Looks like a pageant, beauties surround
Victors get spoils, losers, frowns

They all up in face, wantin' a taste
Lifestyle too wild, bizarre to embrace
Steady like marathon, pace like a race
Left in the dust, no footsteps, no trace

React with haste, time and again
Two steps ahead, scratch that like 10
Chess moves in life, but light years with pen
Best of the best, crème de la crème

V2

No looking back, soar to new heights
Like kids losing strings, wind taking kites
And we are the kites, disappearing from sight
Out of this world, on to new plights

Overcame challenges, jams that were tight
Flexed the right muscles, in fixed and rigged fights
Fixed all our wrongs, exercised rights
When left in the dark, lit up the nights

That's right we shining, perfect out diamonds
Gossip material for Simple Simons
Look at their stroll, look at the timing
Outfits look perfect, who could have designed them

Champion swagger, sharp as a dagger
Action packers, trophy stackers,
Protect your prize, fresh coat of lacquer
Else they'll attract her, guaranteed, snag her

V3

Tight rope routine down that victory trail
Justice prevails, wind taken from sails
Enemies knocked off of the track, off the rails
Ultimate high, comparisons pale

They feel the energy, rise to their feet
Wilding for hours, fuck a comfortable seat
Behave like wild animals, devouring what they eat
Us, bait in the middle, dangling meat

Yeah, rebels, bad boys, embracing the heat
Turn up this beat, victory dance
Pick up the pace, place in a trance
Performance enhanced, Armstrong, Lance

Surrounded by thoroughbreds, look at them prance
How the hell did they get into those pants
Deviant thoughts, onlooker rants
All about us, they have no chance

Chorus

This ain't a song, it's an anthem
You ain't standin', then you look dumb
Hands up or on your eardrum
Body, brain bout to go numb

This ain't a song, it's an anthem
You ain't standin', then you look dumb
Hands up or on your eardrum
Body, brain bout to go numb

My Favorite Line

This is my attempt at
a celebratory theme
that gives us
permission to bask in
the glory of the praise
and worship being
received, after putting
in the unmatched
effort to succeed

Inside the Unstable Mind of THE MANSTER

12. Next Level

V1

Ever since a little devil, took it to the next level
Training wheels flying off, rebel on the effin' pedals
Ribbons racked up, accumulate awards and medals
See me at the finish line, when smoke clears, dust settles

Father far from tame, wanted wins at every game
Had me hooping in the snow, hitting baseballs in the rain
Screaming top of lungs, with blood poppin' through the veins
Sippin' from the Kool-Aid, no gains without the pains

Brother was the same, took me under wing
Relentless with the pressure, forced me to get better
Had to keep up, he was taller, step ahead
Win at all cost, definition of competitor

That's where it all started, where I got my heart
Studying my ass off, how I got my smarts
Energy and work ethic, off the fucking charts
Going the extra mile, while the rest just sit in park

V2

Always attacked goals, always had a master plan
Always been a player, never spectator, fan
Always put up fights, never let guard down or ran
Locked in starting roles, never benched or played 6th man

Due to bench work on the chest, extra supersets
Never taking off on the 7th day of rest
In practice, was a pest, effort at its best
As if title on the line, televised with press

Rest, never, gotta get better
Gotta be the best, at all my endeavors
In my blood to put it all on the line
Til circulation's out, or spilled at scene of crime

Never one to accept that I'm not in my prime
Self-fulfilling prophecy, weak state of mind
Feed off the energy, as naysayers chime
Love that adrenaline, haters get in line

V3

Years of the rat race, turned me to a head case
Never sit still, never stay in one place
Never content, in love with the chase
Gotta get a lead, like I'm stealing a base

Mind set to work hard, play harder
Dedicate my life to get smart, get stronger
Think you can outlast me, I can go longer
Teach you a lesson, I can right, wrong ya

Groomed to make sacrifices, handle crisis
Step in with the niceness, breath life to the lifeless
In binds, under pressure, make moments that are priceless
Told you once before and yet again, don't entice this

On some next level shit, what you put out, what you get
Attacking what is wanted, full throttle, true grit
Breaking down barriers, crumbling to bits
Til gravestone reads, here lies the one who never quit

Chorus

That just how I was raised, that's just all I know
Never give up on the quest, challenge status quo
Distance from the amateurs, battle with the pros
Stand ground with the challengers, toe to toe

That just how I was raised, that's just all I know
Never give up on the quest, challenge status quo
Distance from the amateurs, battle with the pros
Stand ground with the challengers, toe to toe

Take it to the next level, never settle
Take it to the next level, That's where you'll find me
Pedal to the metal, top blowing off the kettle
Take it to the next level, never settle

Take it to the next level, never settle
Take it to the next level, That's where you'll find me
Pedal to the metal, top blowing off the kettle
Take it to the next level, never settle

This song is one of my most personal songs and speaks on the reasons I have been wired with a tireless work ethic for success. It speaks on the influence of my father and brother instilling the survival of the fittest mentality into my soul.

Inside the Unstable Mind of THE MANSTER

13. Devils in Disguise

V1

Seems that those I've kept close, have caused the most pain
Emotional drain, parade they wanna rain
Malicious intent, as if they hell bent
On seeing my demise, downfall, descent

Inner circle invaded, posers entrenched
Blows are low rent, leaving armor with dents
Hits below belt until thirst is quenched
Til I'm out the game, sidelined, benched

Can't tell if friend or foe, should I stay, should I go
Probably should go, but vulnerable,
Cuz I'm a good soul, but sleep on hidden agendas
On the calendars of fake friends and pretenders

Those you need to block, return invites to senders
Maybe fun in moment, during all night benders
Or laying down game with opposing genders
But never seem to show when feeling weak or tender

V2

Tight inner circle, but loose on the surface
Until I can expose true intent and purpose
If they wanna get close, or they wanna hurt this
Whether we get personal, or keep it business

Been burnt, too many times, as by design
Vision must be blurred, kept on missing the signs
Revolving door, into this soul of mine
Better off locked, keep 'em waiting in line

It's like something happened in this world, people got too busy
Left the comfort of the suburbs for the cold-hearted city
Worship self-absorbed role models like Kardashians and Diddy
Genuine friends became a myth, what a pity

That's why my circle's kept tight, loyal to the family
There for me even when I know they can't be standing me
Feedback always thought out, delivered candidly
Of which, without, take on life single-handedly

V3

Frozen emotions, feelings been numb
Go through the motions, when I'm trying to get some
Cuz I bottled up the pain of relationships past
Vivid memories, loves that didn't last

On guard, on edge, interactions I hedge
Cautious of intentions of others, I pledge
Construct a wall, moat around, dredge
No more blind conversations, walking off a ledge

Built up a big wall Donald Trump would envy
But know it's about time to probably fix or mend me
Trip to Southeast Asia, crossed the paths of many
Embraced, present, helpful, friendly

But realized root cause, two hearts, two walls
Each one guarded 'til one or two falls
So started chipping away, invading the space
Cracking of smiles, appearing on face

Chorus

Cold cold world, taking beatings, getting handed to me
Downward spiral, on the verge of insanity
Why look over shoulder when the devil's in disguise
Standing right in front working angles, telling lies

Cold cold world, taking beatings, getting handed to me
Downward spiral, on the verge of insanity
Why look over shoulder when the devil's in disguise
Standing right in front working angles, telling lies

Can't tell if friend or foe, wolves in sheep's clothing
Those to invest precious time and soul in
First to congrats on success, toastin'
Deep down, hatin', plottin', loathin'

Ladder climbers, paper chasers, status seekers, on ya
Saddle up with armor, before they seek and harm ya
Ladder climbers, paper chasers, status seekers on ya

This was my favorite and most vulnerable song on the album. It speaks volumes to how I feel I've suffered from envious or fake friends who have blown out my light in ongoing attempts to make theirs shine brighter. Coming out of my sabbatical, I have made a concentrated effort to observe negative energy and let it pass, and to find my true tribe.

Inside the Unstable Mind of THE MANSTER

14. Outro – Lived a Life of Hip-Hop

Intro

So they ask me 'Jasper, Jasper Springs. How'd a white boy like you from the suburbs ever get into hip hop anyway?' I say 'Shit, hip-hop has been my lifeblood since a young buck, since back in the 90's. Let me break it down for ya...'

V1

Way back in time, one sunny day
Handed a walkman, told to press play
Original Chronic, production by Dre
Impacted my life, in so many ways

Rocked til then, you know, Axl and them
But chronic a gem, 10 out of 10
Moved ahead with rap, no looking back
Crossover culture, hanging with blacks

Raised eyebrows, in the perfect little bubble
What's he getting into, is he in trouble
Way back in school, before he grew the stubble
Rolled with mixed twins, had 'em seeing double

Embraced cuz I could hustle, man I could ball
And pops was the coach, making the calls
Leading my boys, raising them all,
Best to ever nurture, talent that was raw

V2

Age of 16, tryin' to be the man
Handed the keys, to the family van
Used to make rounds, to pick up the clan
8 or 10 deep, sometimes we ran

Jokin' and laughs, R&B blasts
Pullin' all nighters, looking for ass
Even pulled the pranks on those who couldn't last
Slammun' on breaks, pretending to crash

Summers a blast, counting the hours
Through triple sessions, Then hittin' the showers
Over under club, out for all hours,
Sippin' amaretto, mixed with the sours

Those were the days, wish they didn't pass
Friendships have faded, but memories last
Priorities shift, life moving fast
But loyal forever, need me just ask

V3

Spent most my time, sifting through the beats
Anything new, ear to the streets
Mixing the tapes, bringing the heat
To any type of gathering, place we would meet

Shoulda been an A&R,
way I seen heads boppin' in the car
Fuck that, shoulda been a star,
But had to get stable, get career on par

Private school, grant money to ball
But injuries, from grace I would fall
Didn't seem to fit, over-privileged rich
Rockin' flip flops, pink polo knits

Walking through quad, thinkin' ain't life a bitch
But finally found my crew, finally found my click
Love for hip-hop, glue that made us stick
Hip-hop in my blood, hip hop makes me tick

Chorus

I been breathing, eating, sleeping hip-hop
All day, every day
I been breathing, eating, sleeping hip-hop
All day, every day
I been breathing, eating, sleeping hip-hop
All day, every day
I been breathing, eating, sleeping hip-hop
All day, every day
I been breathing, eating, sleeping hip-hop
All day, every day
I been breathing, eating, sleeping hip-hop
From the 90's, to this day

Once I decided I was making this album, it had to have a strong intro and outro like most of my favorite classics. This outro is making the statement that even though a white Jewish guy in his 20's inspired me to try my hand a rapping, I've been a student of the game and culture long before that. This walks you through my entire life and shows you my exposure and influences, and how my life has revolved around hip-hop since a young buck.

Inside the Unstable Mind of THE MANSTER

15. The Journey Remix f. Clyde James (Bonus Track)

V1 - Clyde James

V2 - Raekwon C.R.E.A.M. Verse

V3 - Jasper Springs

Yeah baby, mix and vibe, spittin' fire with the Tribe
Mastermind Clyde, best get out the way, go run and hide
Tsunami on the way, go check the rising tide
Roller coaster ride, Journey remix crucified

Been taken different paths, from this journey they call life
But both been linked by realness, lack of posin', lack of lies
Mutual connections, childhood friends, cousin Ty
Those who you call family, you would fight for, you would die

To all of the rest, we takin' off, time to soar, we flyin' high
Put in too much damn work to think we'd would lose, or even tie
Pain, hustle, struggle, what we overcame, oh me oh my
Handled like a champ, don't weep for us, don't cry

Now we reppin' B!ng, best things since sliced bread with the sp!ed!es, pizza, wings
Dictating what the crowds wanna chant, wanna sing
gos inspiration, not the trap, not the bling
Been married to the game, not a fad, not a fling

Chorus

Too many days, too many times
Sleeping on my dreams, about to make them mine
No reincarnation, no rewinding time
One more shot, before the end of the line

Too many days, too many times
Sleeping on my dreams, about to make them mine
No reincarnation, no rewinding time
Hunger for more, approaching my prime

I always love bonus tracks and remixes at the end of old hip-hop albums, and I knew I had to have one as well.

This one was special for me because it was my first legitimate collaboration ever, with a close family friend and aspiring rapper from my hometown.

He was a mentor in the beginning who inspired me to keep going, and once he liked the beat I shared, it was a no brainer to end the album with him.

Also, why not show my blending skills and add a classic verse to say I collaborated with Raekwon the Chef as well hahaa... out with a bang!

Counterfeit

V1

So much fake shit, starting to look real
Invest in the counterfeit, got yourself a deal
Replicate the next man, style you would steal
You would sell your soul, man, to cop you a feel

For a taste of the high life, bow, pray and kneel
Type to take the bait, now you hooked on the reel
Get the silverware and plates, you about to be the meal
Soul drift from body, no time to save or heel

Now you playin' a character you think they wanna hear
Tough guy talk, you think they wanna fear
Try to get emotional, think they wanna tear
Now you barely recognize, man in the mirror

Making up stories, like you flying in the leer
Banging out models, in the back, from the rear
5-star restaurants, steaks getting seared
Playboy mansion, parties getting weird

V2

You ain't what you say, fabricated life
Counterfeit culture, we don't believe the hype
Exhausted off your breed, your type
New role model picking season looking ripe

Authenticity is what we'll be picking, see
Yawn at pitches memorized to a T
Gone faster than reflex hit at knee
When you try to get that weak shit over on me

If you ain't ballin', rather hear about the struggle
The search for the pieces, to the unfinished puzzle
How you been working on the undeveloped muscle
Lies out your mouth, rather throw on the muzzle

Doesn't mean you need to be staying on your hustle
Rather find someone I can put faith in, trust, though
Game recognize game, that's a plus, bro
We could link up, and hustle with the gusto

V3

Need to take your currency out of circulation
Leave posers broke, panhandling at the station
Unoriginality, mastered, acting
In other words, taking scripts, acting, faking

Watered down style, shots with the chasing
Marketing based on what you think they tasting
You know, pop culture trends, across the nation
Who you used to be, fading, erasing

Exposed, seen, puppet for the machine
Temporary plug, to generate the green
Fads fade, realness lasts forever
So get your temporary fix, pleasure

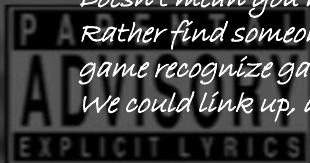

Soon to be exposed, people getting clever
No longer feeling you, ties severed
Locks on the doors, broke levers
All smoke and mirrors, return, never

Chorus

Yeah, originally counted it, but you look like a counterfeit
Fake bill of goods, overflowed, drowned in it

Got an eye for this, magnifying glasses
Soon enough, will be exposed to the masses

This song is about exposing those who ride the trends with "fake it until you make it" mentality, instead of being authentic and vulnerable human beings. To me, it is an elevated way of thinking to be comfortable in your own skin and be able to showcase weaknesses, without pretending like you have everything figured out...as none of us truly do.

Little Doubt

Verse 1

I look at my rhyme book, and tell me what I find
Better storylines, metaphors, punchlines
That stuff that makes you wanna roll the weed, pour the wine,
Fall deep into abyss, miss the ticks, lose track of time

What I'm saying is that I'm fine, that shit you will rewind
No matter where you go, on radio, you cannot find
The DJs pumping garbage in your ears, they should be fined
Better yet, the execs, whose pockets getting lined

Who thinks their better, hop in line, take your place
But you'll be wasting time, taking up space
You looking at the numero uno, the ace
At lacing up that melody, beats, bass

Take your girl with point of finger, son you dealing with a ringer
Have you wish you had not lingered, girl now prolly getting fingered
How did you not figure, that this boy is better, getting bigger
Soon to read about up in the press, when you down on the shitter

Cream of the crop, pick of the litter,
Amazon Prime, the way I deliver
Like I'm flowing downstream, with the trout in the river
But more aggressive, like a shot, going down to the liver

Verse 2

I double dutch, back in, soon to get the backing
Time to hit the road, fold the clothes, get to packing,
Bros and the hoes, at the shows, get 'em packed in,
Holdin' that pose for the lights, camera, action

Heads boppin' down the rows in orderly fashion
Feelin' what he says, cuz he's writing with the passion
All on the table, nothing held, nothing rationed
Till his last breath, 'til his death, 'til he's crashing

Back to the story, jumped in like its double dutch
Opponents looking weak, like they limping, need a crutch
And I'm that Mona Lisa on the wall, they cannot touch
Behind the velvet ropes, security and such

Much of what I'm saying, got that staying power
Will be hot for eternity, not just for the hour
Entertain for generations, today show with Matt Lauer,
Or that child star from the 80s, with 10 years as Jack Bauer

Dude's name is Keiffer, for those not in the know
Should soon see the same fame, from movies and shows
But first spend a few years, demolishing pros,
In lyrical combat, you know how it goes

Verse 3

You running in place, fumbling the gears,
Sad look on face, holding back the tears,
Product is a bust, discount rack at Sears,
Slowly gathers dust, while mine quickly disappears

Time to accept those worries, those fears
While I elevate above your homies, your peers
Probably gonna hang more portraits, more mirrors
So I can catch more glimpses of the man of the year

Unstoppable flow, like roundhouse in dojo,
Respected by the old pros, and you just a joe blow,
That means you're a so-so, better yet an average man
Better yet a hoe, getting smacked with the backward hand

Put you in your place, in the seat, as a fan,
Have you writing letters, truly yours, this is Stan
Bumping my shit, in your home, in your van
Rockin' those clothes with my name, with my brand

Come in to my own, like a masturbating hand
Baskin in the sun, oily skin, golden tan
Road to the riches, through the dessert, through the sand
Master this game, almost there, ahead of plan

Chorus

Had a little doubt, when I started out
Had a little doubt, when I started out
But those fears been put to rest, you messing with the best
But those fears been put to rest, you messing with the best

Had a little doubt, when I started out
Had a little doubt, when I started out
But those fears been put to rest, you messing with the best
But those fears been put to rest, you messing with the best

This is one of my
"battle-rapping"
songs to demonstrate
my growing confidence
in my lyricism. I've
used this a lot when
asked to "freestyle"
on the spot.

Positive Vibin'

V1

Let me revive the positive vibe,
For the spiritual tribe, those who wanna subscribe
To my lyrical scribes, truth laid with no lies
Where you can visualize, without using your eyes

Together we uplift, rise, to ultimate highs
Flying the friendly skies, cutting off negative ties
You know, the hateful disguised, as allies and guides
Leading you down paths of failure, demise

Gaze deep into eyes, should be no surprise
Fire burn inside, so hungry, alive
So we dive right in, a world surrounded in sin
With the hope to touch the souls of the supposed children

Of the god, with Jesus' footsteps think they following in
But they are not like him, lacking compassion
Only a fraction taking time, taking the action
Of lending helping hands for lives needing impacting

V2

Feels like the sun beating down in bright yellow
When we mold and form like jello, greet all with a warm hello
Peaceful, mellow, all the ladies and the fellows
Avoiding cold shoulders, crossed arms with the elbows

We bounce back, to another level, brush off stones and pebbles
Loners, rebels, moving to our own beat, bass, trebles
Never gonna give up on the goals, never gonna settle
Always raise the bar, to the sky, never set low

Philosophy focused on generosity
Praising those for lending hands, while we're down on bended knees
It's elementary, like we're children wild and free
Encourage precious souls to be who their meant to be

Gently nudge, if not ready, for large feats, even petty
Together move mountains, stand up dams and levies
Effort could be heavy, if you we're solo, uno, ace
But together keep the pace, in perpetual state of grace

V3

So we karma stackin', rollin' trees, wearing hearts on sleeves
Meditate on yoga mats, no rosaries with beads
Replaced with the rocks, and the oils, and we feed
On plant-based diets, organic meat and seeds

And different breeds, we don't weed out
Get character reads, before casting any doubt
Inward thinkers fear of threats to livelihood and clout
But helping those in need is what this spiritual tribe's about

We lead a different lifestyle, and have a different mindset
If you default to fear, then you need to get your mind checked
We are all flawed, we are not perfect
But we will bold, and we will move with purpose

Following our passions knowing nothing's gonna hurt us
Compromise our goals would be a failure, be a bust
Carry others falling, showing weakness, be a must
Loving, not lust, goddamn in us we trust

Chorus

Come and ride with us, we positive vibin'
Spirits and the Souls, shimmering, shinin'
Come to the light, come out of hiding
Bright bright skies, along the horizon

Come and ride with us, we positive vibin'
Spirits and the Souls, shimmering, shinin'
Come ride with us, come come ride with us
Come ride with us, come come vibe with us

This song is about my spiritual journey and was triggered by the presidential race in 2016, particularly, the Syrian refugee crisis. Many conservative Christians seemed to have an immediate concern about their own livelihoods first and foremost, while most Spiritual Non-Christians led with a help at all cost initial mentality. This is in direct contrast to what the Jesus they follow would have wanted.

Lit

V1

Get up, mad slow, let 'em see my swag flow
Take another capsule, beer flowin', the tap's full
I'm ready to dazzle, king of fuckin' castle
Handle all these assholes, rope 'em up with lassos

Take 'em to the trash bro, garbage bags with tassels,
Back to the show, no more interrupts or hassles
No drama queens, pre-modannas, hoes
Act like you been here, hangin' with the pros

I suppose, you wanna get up on this
Timing seems right, no need to scan the wrist
Just looking at the man standing next looking pissed
Cuz his girl's sweatin' me, as he's steady getting dissed

J Springs the rapper, pretty dope, pretty dapper
Whether posin' for a pic, or he's sittin' on the crapper
Been sleepin' on the kid, like a narcoleptic napper
But he's building up is rep in Atlanta with the trappers

V2

They say do what you like, so I'ma roo this mic
Handle the bars, like I'm riding on a bike
Kick it, like a sneaker head with the Nikes
Take you on a journey, on a trip, on a hike

I got you stumped off the whiteness, you be like who writing this
Lyrics pure bliss, all hits, can't miss
dare you to come challenge, come diss
You'll be dismissed right off the damn list

Exhibitionist, smart smart smart pants
hearty plans, vocab lacking the can'ts
Don't start me man, get me going on rants
artsy and, creative left-hand man

Planting the seeds, gonna reap the harvest
not gonna be a starving artist
not too late, it's time to start this
says the time on the wrist, and the grip on the fist

V3

Preach to the choir that I spit that fire
Ladies get hot, removing attire
Drippin' in sweat, dance 'til they tire
Forbidden desires, fixated, wired

Mesmerized, words are like flies
Buzzing 'round ears, in heads, and eyes
sore, dry, from the temperature rise
Sweat turned to steam, vaporized

Sensual person, in the bedroom I'm a surgeon
Advanced version, make you feel like a virgin
leaving a hurting, when the wild side gets merged in
Blood pressure rising, temperature surging

Making it lit, wherever I go
Spitting that fire, fabulous flow
Making 'em hot, takin' off clothes
Fire Marshall needed, for parties and shows

Chorus

Got this place lit, with the fiyah that I spit
Got this place lit, I'm a pyro with this shit
Got this place lit, with the fiyah that I spit
Got this place lit, Fiyah Fiyah Fiyah Fiyah

Hot shit, got you running towards the fire
Hot shit, got you running towards the fire
Hot shit, got you running towards the fire
Hot shit, got you throwing off attire
Fiyah Fiyah Fiyah Fiyah, Fiyah Fiyah Fiyah Fiyah

This song was one of the first where I came up with the chorus first, and then built the 3 verses around the chorus. On my first album, I tended to go the reverser route and worked on creating the chorus after I wrote verses usually based on a theme.

Regrets

V1

It was a fundamental difference in opinion
That got my head spinning
Thought we were getting ahead
Thought we were winning

But it was a short-term stay, like a weekend holiday
When it should have been forever
More-over, we had the plan laid to get that cheddar
Power couple, through the pain, the pleasure

Movement by myself, but you made me better
Like Nayo & Fab, so nice with the collab
Always got me in for free, while I picked up the tab
Problems needing solving, let me give 'em a stab

Couldn't fathom, that it would end so soon
Lonely nights, looking up at the moon
Keep hearing those sad songs, sad tunes
Sucking out the wind like I'm blowing on balloons

V2

Wanted to stay with you, run away with you
Have my motha effin' way with you
World class trips with the best of views
Wherever you wanted, I would have let you choose

Definition of best things come in twos
Lack of your presences got me singing those blues
Drinking those brews, bottles of booze
Losing my patience, blowing a fuse

Time drifts away, but still think about you every day
Text message delay, I don't know what to say
When you check in with one liners, how you doin', hey
To give the right response, I need help, I would pay

But I'm doing ok, matter of fact thriving
Creating a buzz, like bees around the hive, and
Finding new passengers to sit beside while driving
New adventures, experiences to dive in

V3

To all the girls who gave up on me, ones who never gave a chance
Ones who turned away when I asked you will you come and dance
Hope you get the message when I'm celebrating with the champs
Feel a little queasy, stomach muscles with the cramps

As I take flight off the ramp, different journeys, different lands
Living out my dreams, as I execute my plans
No longer spectating, watching from the stands
With the envious fans, who be clapping with their hands

Instead take the stage, with the artists, with the bands
Beaches across the globe with all different kinds of sands
Views looking colored with all different kinds of crayons
Money stacking up, by the hundreds of grands

Chorus

Flawed thinking, mistake making, it was yours for the taking
Labeled me the ex, when I know I was your best
Better than the rest, but you're living with regrets
Better than the rest, trust you're living with regrets

What were you thinking, were you drinking, should have let it settle, sink in
Labeled me the ex, when I know I was your best
Better than the rest, but you're living with regrets
Better than the rest, trust you're living with regrets

These first two verses of this song were tied to a relationship that ended around this time period. I felt prematurely rejected for insignificant reasons. It was actually a critical trigger point in my life. I vowed to prove the person wrong and used all of my energy on self-improvement in all areas, seeing some really interesting developments in my life shortly thereafter.

Beltlinin'

V1

On the beltline, let's kick it, maybe?
Listen baby, come on a date with me
As we stroll down look at the sites, feeling the energy
Especially when the weather be well above the 70s

Intensity with the sun, people be having fun
Getting workouts in, with the biking and runs
Stretch alongside, yoga, squat, or lunge
Come and vibe with me, baby take the plunge

Hipsters beat to their own drum, rocking the grunge
Guitars being strummed, by the artistic ones
Plenty of those dudes who be rocking the buns
Leave your purse at home, I'll be carrying funds

Into the watering holes, let's take a dive, let's plunge
With those spiritual ones, living in the present
Day drinking crowd, little tipsy, little bent
Conversations loud, but feelings of pure content

V2

Beltlinin' with a mate, would be dope, would be great
You need to see, no need to wait, remove the doubt, remove debate
Food trucks lining up, take the cake, with 5-star plates
Roll up on the bikes, blades, skates, with no judgment, hate

Bands playing, solo acts, dropping acapella raps
Guitars hanging off of backs, fingers strum 'til skin looks cracked
No lie, just facts, talent all up and down the tracks
Play for money, play for daps, or just to see the time lapse

Whites, blacks, mixed, matched, hate "minned", love maxed
Everything that matters, that has purpose, that is dear to me
Everyone relaxed, from the vibes, from the greenery
Soaking up the sun, and the artistic scenery

Artists pouring passion into paintings and graffiti
Meanings in the sculptures, decorations on the trees
Complements the nature, with the birds and the bees
Join me now or later, I'll take either, baby please

V3

So what's it gonna be, don't mean to beg or hound
Just show you around what I've stumbled upon, found
Sweep you right off of your feet, right off the ground
Combo of me, and the beltline's profound

We can cruise down, paint the town, see the developments
Skyrocketing rents, dents in the pockets,
New buildings shooting up like rockets
Find you a condo, better go cop it

Like Jigga man, hustle, can't knock it
Don't mock it, will look like a prophet when I rake in the profit
But not here to prophesize, just try on for size
And break down the upside surprise for your eyes

Those eyes noticing how fast time flies
When seeing that sun setting from the sky
And plenty of beltliners who have ridden by
While lost in time with one hell of a guy

Chorus

Damn you look fine, you should give me some time
I know a great place where we can go unwind
A place like no other you can fathom, you can find
A place you will consider as a one of a kind

On the beltline, cruise and circle the city with me
In the sunshine, you can choose, what we'll see
So what's it gonna be? I won't beg, I won't plea
But it's a no brainer, you should beltline with me

I wrote this song shortly after I moved right off the Beltline in Inman Park. I steadily grew more amazed by the creative energy and positive vibes on the Beltline, along with the explosive growth alongside it. I decided to do an amateur music video and began capturing footage over a 3-6-month period every time I saw a recurrence of a specific event I wrote about in the song.

Magic Scriptures

Looks like a breeze, how I dot those I's, cross those t's
Teach you about those birds, those bees
Advice is free, though I should charge you fees
Now open doors like skeleton keys
Opportunities, jeez, stack that cheese
Soon to have no masters and do whatever I please
F you money, tell you to get on your knees, choke on deez
Lay back, light up trees, cruise control, ease
Elevate away, better each day
Focus on a better self in every which way
So many paths where the devil makes us prey
But I pray and work hard not to be led astray
I make sure I do, what I preach, what I say
So when I reincarnate, I will not have to pay
You may say this conscious shit is whack, is weak, is gay
But still slaughtering the lyricists in every which way
Most rappers' canvases, look blah, look bleak, look grey
Mine roygbivín', full spectrum from the rays
Of the sun, best under, not overdone
Better than all rappers, every which one
Create magic scriptures, like god's only son
And this is a side gig, only having fun
While you're the only ones looking silly, looking funny,
Same damn themes, drugs, stacking money
Over the same damn trap beats, disrespecting honeys
How you been running the streets, when you really shook ones, dunnies

This to date is my favorite battle rap type freestyle I've written. I tend to divert to this when someone new challenges me to drop some bars. It was my attempt at a lyrical demonstration, as I felt that I wasn't getting the following, momentum, or respect I should be getting with my material to date.

From under, will emerge, like Pimp C and Bun B
Big Pimpin' on a yacht, Timbo, Jay-Z
Real life plot, no promo, no Hype
No video shots, guess you dunno my type

Private and humble, but ready to rumble
90's influence, no trap scene, no mumble
Only get stronger from every stumble
Nothing but matches when swiping the Bumble
Any dating app as a matter of fact
Soon as I master this craft, gonna get up and act
Make sure the theaters be crowded and packed
Master all hustles, no give up or slack
Avoid naysayers, be bold and attack
But peep who be lurking, never turning my back
Cuz I'm only moving forward, leaping ahead
Maximize minutes, can sleep when I'm dead
Minimize detergent, for sheets on the bed
Just enough rest, watch what I'm fed
Follow the omens, trust paths where I'm led
It is all written, the Alchemist said
May not be a scholar, but yeah, I'm well read
Good Willie Hunting with the street smarts and cred
And with loved ones you'll find me, breaking the bread
You can follow the trail of the passion I've bled
May be traces of red, from the blood sweat and tears
Setbacks and struggles from all of the years
But lately this journey has changed course, has veered
Forced to confront, all my worries and fears
Feeling the power, transforming the gears
Bout to take flight, like those rockets and leers
Elevate higher than enemies, peers
Vanish from eyesight, reflections, and mirrors
Toast with enlightened ones, champagne and beers
Cheers to the fact I'm getting bolder as of late
Not giving a fuck about those who wanna hate
Now dodge, ignore, around those I skate
Time too precious, no time to wait
Cuz now I know my fate, and with destiny I got a date

Pimp C and Bun B were a group called "Underground Kings." They emerged on the top of the charts after Jay-Z convinced them to do verses on his Big Pimpin' classic produced by Timbaland. Hype Williams produced one of the most expensive hip hop videos ever made, with beautiful girls partying on a yacht.

Jezebel - The Beautiful People

When I was featured in Jezebel magazine, I decided to write a one-line rhyme about all 50 people over Marilyn Manson's "The Beautiful People," with the hope of the magazine wanting to play it at the events or to promote the magazine in general. It was appreciated, but unfortunately didn't make the cut... another lesson in being bold or going home :)

Meet Michelle, Georgia peach, her broadcasts keep us in our seats
Erin writes the songs, sings Shania top of lungs
Then there's Josh from Tennessee, demonstrates marketing mastery
Elyse the beautiful red head, we get to watch on Walking Dead
Then there's Jesse, oh that's me, consults for fees, rhymes with ease
Joshua's on the list, talented network analyst
Dear heaven, then there's Evan, plans for buildings needing erecting
Julie works her magic while reporting on the traffic
Oh hell, Adabelle, blogging on her Daily Belle
Steven Rosen, also chosen, business owner, plus he's coaching
Can't catch Chase, he's too fast, dodged the Dolphins in the draft, then chose acting as his craft
Hope Forever, catchy name, catch her runway modeling, on her way to wealth and fame
Armir's here, to Shofur us, to help select a charter bus
And Brandi will wrestle you down to the mat, half a million followers, how about that
Obi excels at his fitness approach, Orangetheory fitness coach
Ashley's got the dog empire, models, too, she's so on fire
Dillon and Anja, dynamic team, in it together, living the dream
Speaking of pairs, David, Adair, business development extraordinaire
John Collins, Wake Forest to Hawks, the audience cheers, the audience gawks
Then there's Kaylee, a beautiful lady, tune into her on CNN daily
Dr. John Connors, surgeon with plastic, makes 'em look good, he is fantastic
EJ Adams, looking good, making money, with his very own fitness company
Teresa Ann, accounting and, modeling gigs, whenever she can
Then we have Benjamin, Sales in contracting
Taylor Adkins, model and acting
Daniel and India, 3rd duo matching, he does the fitness, her, YouTube attraction
Then there's Jasmine with her clothing line, looking so good, looking so fine
Alexandra, teaches yoga by day, rest of the time she is acting away
Kelsey reports the sports on Fox, beautiful smile, lovely blond lox
Joseph Hines, styles to the 9s, with the motivational lines
Peter's Eduardo from the Walking Dead, you've seen him many times before going to bed
Ed crushes homers and pb and j's, at Insight Global, during the days
Rebecca's a foodie and she loves the fitness, model and actress you'll love to witness
Brian Moote, on Q100 a hoot, Co-hosts the Bert Show, does stand-up to boot
Ayanmna sings writes and acts, jack of all trades, runs her productions, she is self-made
Byron Mulkey, a teacher who acts, can't make this up, spitting the facts
Christopher Walker, attorney and more, sits on a handful of nonprofit boards
Taylor Wesley, no time to rest, see, mental health speaker, recruits for ISG
Head of Lindbergh that is Terrence, with the fashion forward shirts and pants
Victoria Blackburn, she makes the heads turn, attendant for Delta, has Skymiles to burn
Sarah Wisted, don't get it twisted, Oracle proposals and blogs on the Insta
Chandler Merrill, a young strapping male, engineer focus is geospatial
David Kleckner, model and golfer, line him right up for endorsements and offers
Vesta Lugg, she needs no plug, actress and singer, please roll out the rug
Maci's, so fine, walks the beltline, coordinates events and consults in spare time
Todd Cavato, Bar Manager, Donetto, runs at the park and one hell of a fellow
Kate Donachy, a foodie, a hottie, designer in fashion, non-profit food ration

Jasper Springs

This is an EP that I created as I moved further along my spiritual journey, incorporating yoga into my daily routine. I figured "Why not work on an under-represented niche in the hip-hop genre and work on uplifting those who could benefit from hearing about the positive impact I was seeing from my experiences?"

*Contributing to the Evolution &
Expansion of the Collective Conscious*

Contributing to the Evolution & Expansion of the Collective Conscious - Awake

V1

Wake up, look beyond the make up
To see what makes us up
Real, not a fake fuck
As should you, whether poor or caked up
Now pay attention to these words that I bake up
Made it through this struggle, wasn't luck
Don't get stuck, buckle up, pick-up truck
Pick you up, bumpy ride, will be tough
No sugar coat or fluff
Show you all kinds of crazy new stuff
Lift you up, like a spotter, get you buff
Show you my hand, won't fold, no bluff
Arms out and open like the hands are getting cuffed
Feed you my wisdom, 'til you're bloated, getting stuffed
Share it with the others like it's weed getting puffed
Bare it all, no covers, expose blemishes and scuffs
Then shower each with love, we can never get enough
Yeah, we can never get enough
Shower each with love, we can never give enough
Yeah, we can never give enough

This song was monumental for me because it was the first song that I officially recorded in a music studio. I landed an internship there and had rejuvenated spirits, thinking I was defying the odds and getting closer to a new dream.

A fun fact is that we interns also collectively made the beat!

V2

Rap activist, no longer passionless
They will see true meaning of what captive is
Follow religiously like they are all Baptists
Watching every move, not even blinking of the lashes
Eyes sore and red, like they smoking on the hashish
Cash in on this, but not for money or for fame
Big chess move in life, but not playing any games
Helping those in need, that's my goal, that's my aim
Those who have big hearts, maybe dealing with some pain
Expose those corrupt, abusing power, who live in shame
Round up the people who support and feel the same
That is why I'm here, my new calling, why I came
In a creative type of way, using right side of brain
And stepping on the gas in the left passing lane
Far from vain, but want to be seen as the best
Transforming day by day with no time to rest
1-man band, putting in the work of 4
Poetry with words that will hit you at the core
Looking for like minds to collab with some more
Break down some barriers, open up some doors
'Til we wreak of success, dripping out the pores

V3

We need to wake up, corrupt system shakeup
Politician pay cuts, end to corporate greed, glut
With their overconfident struts, but we know better
Just need to take away their access to the cheddar
Money making schemes, how they getting fed, or
Fill boxes with more mail, more letters
Every scandal makes the blood boil, face redder
Head spinning, like a soccer playing hitting a header
We need take action, get up, get up out of bed, more
Wake up literally, and like it's a goddamn metaphor
Round up the good rich, middle class, and the poor
One collective voice, getting louder, let it roar
Knocking on, entering board room doors
Boycotting tainted goods at every store
Invading country clubs, being brazen, yelling FOUR
Together we can achieve more, now watch us soar

Chorus

Unwind the work of the machine
Everything is not always as it seems
They want us divided, unable to form a team

Contributing to the Evolution & Expansion of the Collective Conscious - Veganish

V1
Trying to be a vegan, society makes it hard
Menus at the restaurants would just leave me starved
Eggs and cheese the weaknesses, when I let down my guard
Life without no pizza, may just leave me scarred
Trying to be a vegan, man, tofu with the seasoning
Quinoa meals be sequenced in, fruits, zip locks, be freezing in
Many ask the reasoning, meat eaters be teasing, and,
Laugh while getting feasting in, to them, its normal, not a sin
At times may catch a blistering, burned like mouth with Listerine
And sometimes get caught in between, unhealthy food or something lean
Deep fried meat, or veggies, greens, sometimes harder than it seems
Need some help, supporting teams, to follow through on plans and dreams

V2
My mind is set on veggies steamed
After toxins rinsed off, cleaned
Almond milk, non-dairy creams
I say it proud, I yell, I scream
Shine like great big ultra-beams
Happy eating rice and beans,
Less slaughtering of animals in their teens
Sympathy for all types of beings
Leading a charge to get more eyes seeing
The benefits from less meat that's eaten
As we get more knowledge from research, reading
Then relay messages, exposing, teaching
Multiply the numbers practicing, preaching
About striving to become a little more vegan
Yeah, just a little more vegan, baby
Yeah, just a little more vegan, baby

Chorus

Yeah, I'm liking, feeling this, lifestyle that be VEGANish
Practicing and preaching this, lifestyle that be VEGANish
Plant based fixings, easing off of the chickens
Plant based fixings, when we're running the kitchens

This song was inspired by Kip Andersen's documentaries "What the Health" & "Cowspiracy," which fundamentally changed my level of conscious thinking and what I was putting in my body. In the 3rd verse, the Dr. Ratner callout is in reference to him concealing lobbying influence and interests.

V3

Watch Cowspiracy, What the Health, you'll be like what the hell?
You wouldn't even believe what they package, they sell
Their lobbying efforts go hard, so well
So the labels on packages don't warn, don't tell
How bout that Dr. Ratner what a bastard, what a turd
Taking corporate handouts, lobby efforts so absurd
He should be exposed like Peta targets with the furs
Or stoned in public, jail time preferred
Those processed meats be toxic, make you chicken pox sick
Industry on lock, controlled by those sly foxes
How long we gonna watch this, how many clock ticks
Before we rise up and revolt, ban, stop, fix
So trying to play my role, for society as a whole
Spread the word that livestock raising and grazing taking its toll
On our bodies and the ozone, creating a hole
Greater than the burning of the gasses and coal

Shot From Veganish Music Video

Contributing to the Evolution & Expansion of the Collective Conscious - Minimalist Ways

Minimalist Ways

V1

They're wasting their time with those marketing plans
All those signs with those brands, magazines on stands
May give 'em a scan, but value player at the core
Score on some deals, get some really good feels
Leading the league, when it comes to the steals
For real, though, super conscious with the dough
No need to make it rain, or to put on a show
Or lead a life in vein, rock the bling, make it glow
Plant seeds, give 'em rain, stocks and things, watch 'em grow
Good deeds, bring in harvests, watch me reap what I sow
Expensive brands and logos with no added value, no no
Need to develop like a photo, shake it up like a go-go
Solo you out, like a beer pong tourney or bout
The Polo horses been losing their clout
And times out for Rolex, lack of innovation, appeal
Unlike those sexy LEDs on Audi mobiles
Smarten up, pay the bills, stock away, til there's mils
Overpaying hurts, it kills, plan ahead, get some skills
Not saying starve, get your frills, but practice hard, run the drills
Overcome societal ills, not just the popping of pills
But lacking confidence, will, then compensating by overpaying, depleting funds 'til there's nil

V2

Yeah go get you a big house so you can fill all the rooms
Bunch of trips to Home Goods, all your paychecks consumed
Ball out of your mind like we're in a never-ending boom
Get you a maid to run errands and vacuum
She can water the flowers, keep 'em in full bloom
Soon have some guests, well maybe every blue moon
Some rooms get banned so the kids don't ruin
See where I'm headed, think you know the tune
I keep my square footage low, double use for food and show
All the rooms get steady flow
Cleaning time is minimal
I'm saving time that's critical
Not trying to be a cynic, nooo
But in life, hit this pinnacle
Could help you make the pivot, though
If you think it could be pivotal

V3

Single male ways on my grocery days
50 to 100 a week's what I pay
Monitor the average in my monthly budget
Stick to the script, rarely edit or fudge it
Disciplined, yes, you can bet that I love it
Tight inventory in the pantry and cupboards
From the food, and the pans, to the knives and the cut boards
Don't hoard, always clean out the closets
Receive karma, Goodwill, with old clothing deposits
The spot gets, hot like there's cop tips
Cuz the AC goes off when no guest lists or visits
Utility bills never reach triple digits
Systematic approach, never fumble or fidget
Starting to get it, I have minimalist tendencies
Consume what is needed and the rest gets surrendered you see
Give you some tips, like you bartended generously

Chorus

Yes, I roam and graze, with my minimalist ways
Yes, I spend most days, living in minimalist ways
They say crime pays, but so do minimalist ways
Every dime that's saved, goes to minimalist ways
Yeah, roaming and grazing, minimal wazing
Yeah, owning and praising, minimal wazing

This song is important to me because it defines my values down to a 7. A fun fact here is that this is pretty much the last beat I actually made, as feedback overwhelming said that my strong suit was songwriting, and that beat making was a commodity.

Deviant Behavior - Deviant Behavior

Deviant Behavior

V1

Rub in the oils, give her the spoils
Temperature heats, blood pressure boils
She becomes loyal, like a pet to its owner
Gets more intense by the second, I own ya
Shown ya, time and again when I'm on ya
Nothing but uncontrolled noise, a moaner
No shame in how she deploys, an owner
Pleases and gives back with joy, a donor
Lights up when bedroom destroyed, a stoner
She has a chest full of toys
Ulterior motives and plays
Oh lord, her, deviant ways
With other ladies and couples she plays
All types of scandalous ways,
Playrooms, set up like a maze
Into the lifestyle, no it's not a phase
Naughty behavior most of the days
Onlookers gaze and they give her the praise

Chorus

No savior, make me wanna save ya
When I see that deviant behavior
Your flavor, taste I wanna savor
No thank ya, what I'm doing is not a favor

V2

Deviant girl, got me tripping like the shrooms
Insatiable appetite, mmm mmm mmm
Wake up to a message said I need you real soon
Bedroom is her classroom, gather round, high noon
Afternoon delight, til night, full moon
Howling with the wolves, in sync in tune
Hitting peak stride, stretched out, full bloom
Camera, tripod, automatic zoom
Real live, DMX, here comes the boom
Boom boom boom, head against the headboard
Whips and the cuffs, She has been leathered
Red colored cheeks, they have been weathered
Gripped, bit and smacked, after foreplay and feathers
Bob smooth and clean as if took off some dentures
Gave me some brains, as if she was the mentor
All kinds of fantasies, role play adventure
Locked in the score, 10 out of 10 for sure
But she was still hungry, asking for more
Damn it, I love it, I do so adore
She makes it rain; she makes it pour

V3

Crazy sex appeal, old resume shred
But some question ways she was raised, she was bred
Maybe abused as a child and she fled
To get to this stage in this fast lane, she sped
Lady in the street, but a freak in the bed
Luda on repeat, beating it dead
That is her anthem, as she builds up her cred
Feeding her ego, feeding her head
Plus that is how she eats and gets fed
How she be baking and stacking that bread
Making it rain, as the clothing gets shed
Running those trains in those rooms that be red
Men go insane, pockets drain, legs spread
Gives up those brains, T-pain plays in her head
Getting them sprung, draining pencils of lead
Seeking the fame, actress, model, instead
Covers the pain with the drinks and the meds
Material goods and the manis and peds
Deviant behavior to get her ahead
Deviant behavior, until she lay dead

The Deviant Behavior EP project came about after not getting the momentum of followers from my previous uplifting projects. I researched and asked various girls about their interest in "The Weekend," and I was surprised to hear how they not only loved his voice, but also his taboo lyrics. I thought I'd step into this world and see if the change in course would lead to a change in repeat listeners and fans.

Deviant Behavior - Donald Trumpin'

V1

She Donald Trumpin', giving me the runaround
This is what I've found as she runs around the town
Swimming in those lies, bound to drown
Tricking simple minds, upside down
Strategic planner, calendar scanner,
Filling slots to fill her slots in every manner
Marketing her assets like she's up on a banner
Can't imagine all the men who've ran up in her
Thinks she's not a sinner, cuz she's never been caught
Think she is a winner, but she's never been fought
Only fancy dinners, and the things she's been bought
Ought to tell her, hint her, cuz it's time she's been taught
Yeah, let me lecture, teach her, time to give her my thoughts
How I been tracking, connecting the dots
How she's been behaving, like one of those thots
Yeah put her on blast, taking my shots

V2

Says she loves us as a team, but its only pretend
Every time I turn my back another message she sends
If I showed a look of interest, she would tell me they're friends
But their really part time lovers, what I call the blends
She just wanna ride the trends
Ride a Mercedes Benz, show it off to her friends
Whip around bends, live the fast life
Knew her in a past life, but don't know her no more
Just thought she was a freak, now in hindsight, a whore
Ego strokes she seeks, the limelight and more
Try to keep up, but she's a handful, a chore
Better than a bore, but always looking for more
Not a good girl at the heart, at the core
Could stick a bit longer, to see what's in store
But we know how this story ends, been told before
Shouldn't turn my back, as I walk out the door

This song is obviously a play on Donald Trump's pathological, lying ways. It is about debating to go all in or keeping it playful with a deceitful girl who just likes to have fun and chase status. It is a culmination of girls I've dated and decided to keep the walls up with because it was easy and fun.

V3

Yeah, play it like I'm pacing
But mind racing, chasing the temptation
I'm facing, a little dilemma
Do I take some time off, go away on a bender
Get a bit wild, break away from agenda
Automatic message returning to sender
Or do I dead her, before I go in too deep
Got me tossing, turning, losing my sleep
Lil Bo Peep, counting the sheep
Cursing her out, need expletive beeps
Reach out to my homies, consult with my peeps
Say she likes high class, she is not cheap
Price of admission, pretty damn steep
They say don't take the leap
Play for a bit, but do not play for keeps
Set the alerts, and be gone at the beeps
No pillow talk when under them sheets
Keep it surface level, short and sweet
Be gone when done, chuck the deuces up, peace
Zip up my jacket, hit the street
Live in the moment, ride to the beat

Chorus

Deceitful days, Donald Trumpin' ways
Hopes and prayers, that it's only a phase
Deviant ways, the way that she plays
Leads you down a maze, as she vanishes, strays
She's giving me the runaround
She's giving me the runaround

Jasper
Springs

Deviant Behavior - The Mentor

The Mentor

V1

Blessed with the face and the personal brand
But best when I'm acing this mentoring, man
Test where I'm placing to gain the upper hand
Sex education with agenda and the lesson plan
Mentor and master with the teaching and the lecturing
She is the patient, impatient with the questioning
I am the doctor, with that good good medicine
Needle with injection, like we fighting an infection
All up in and festering, stirring up the estrogen
Dopamine kicks in, giving head a spin
As if in a fight, checked in the chin
Me gripping her tight, smile with evil grin
As if I'm the devil, getting her to sin
Wrestling her down, focused on the pin
Go in for the win, pressuring the loins
Tally up the points, light up the joints

V2

Yeah, step in my bedroom if you wanna get a lesson
Slowly take off those clothes, that dress and
Remove those panties, that bra, bare chestin'
Tell me those dark little secrets, confessions
Don't worry about those first Impressions
Judgement free zone, trust me, no question
Setting good tone, good vibes, be meshing
Accelerate your growth through multiple sessions
Head banging, hair pulling, lessons
Give you those answers, hair looks a mess, and
Got you losing track, counting those blessings
Backing my craft, no 2nd guessing
Master of caressing, giving love and attention
And we can keep this secret, no need to speak of, mention
Proof lies on the sheets, stains from the dressings
Gods getting envious, watching from the heavens

V3

I could tell she was growing real fond of me
Body all up on me, hands and fingers fondle me
Rocking her body through uncharted sea
Ship steered through waves like it ought to be
Gripping those hips, as if taught to me
Popping like bottles at VIP parties
All in her belly, walls of the arteries
Witnessed a massacre, witnessed a slaughter
Pardon me, but it was like some artistry
Part of me, wishing you could see
Plenty would line up, many pay a fee
To show you how I please, take her to ecstasy
Fulfilling her needs, every fantasy
Make her feel sexy, dressing scantily
Get her on all 4s, begging for me
Mastering the mentorship with my mentee

Chorus

I am your mentor, let me give you a lecture
Let me get in your head, or, let me get up in your bed more
To give you the knowledge, give you the pleasure
Those good hands on lessons so you can learn so much better

This song is a bit egotistical and a display of growing confidence I began to develop with understanding the needs and desires of women.

Deviant Behavior - Blind-Sided

This is the final track of the EP. After putting up the walls and diving into an alternate lifestyle in search of the ultimate happiness, I fall for someone hard who snuck past the gates and had me debate the surface-level journey I had been enjoying.

V1

Just off another heartbreak, heart pains, aches
Put back up the walls, pump the brakes
Give the cold shoulder, avoid embrace
For goodness sakes, whatever it takes

Time to keep it surface, back to playful chase
Hand scoop the skittles, every flavor, taste
Til memories blocked, vanished, erased
All worries, fears, confronted, faced

Where energy's used, efforts placed
Time too precious, none left to waste
Rational thinking, logic-based
If emotional-laced, may react with haste

Ace the plan? yes I will, yes I can
Handling like a boss, like the man
But unexpected forces, did not understand
How she breezed past the guards, like the wind from a fan

V2

Now I'm in a bind, thought I had it figured out
Independent grind, all my hustles I'm about
But surface level fun, being clouded out with doubt
Two roads diverged, in emerged another route

Should I flirt with poly, mess with molly,
Dabble in the lifestyle, maybe, probably,
To the dark side, little shady, naughty
Lust at body after body

Or invest in this new hottie, savor the taste
Dynamic duo, set new tone and new pace
Bonnie & Clyde, partners in crime on the chase
Sit on top of the world, like Brandy and Mase

Faced with a dilemma, heavy on the brain
How long can I hedge before going insane
Should I stay in my lane, or go against the grain
Take the lord's name in vein, cuz I'm Sprung like T-Pain

Chorus

It caught me blind-sided, I did not see it coming
I just got back on track, I was sprint, racing, running
Away from the heartaches of letting the love in
But the lovin' from this one, got me singin' and hummin'

V3

So I'm chasing dreams, glorious endeavors
Wondering if she's with me, would it be worse or better
Is a good thing, crossed paths and met her
Offer me some help, should I back off or let her

Damn I really sweat her, dripping, getting wetter
Do I worry, question, fret or, letter, let her right in
Let her wash away, all of my sins
Question all my previous victories, wins

Guess it's all relative, all depends
Can she even out the balance of lovers and friends
Can she help me fix my wrongs, make amends
Keep tight focus on vision and lens

Tends to my needs, as she sweats, and she bleeds
Passion for healing with love and good deeds
Get me on my knees planting the seeds
Fairy tale ending, like every good book reads

Blind-Sided

Sunshine Alchemy Jingle

Making the impossible, possible, with the plant-based burgers
Supply chain disruptions, bypass cattle ranchers and herders
Oh I thought you heard, healthy, delicious superb
Spreading like wildflower through cities and burbs
May sound absurd, but the times they are a changing
Growing concern with animal rights and free-ranging
So the plant-based diets we be prepping, arranging
Not serving anything made from animals caged-in
Jack fruit tacos, BBQ' d, maybe Cajun
Sweet potato fries complement so amazing
The people be praising, awareness we're a raising
Sunshine Alchemy truck spottings all days, and
Nights and the weekends, festivals all seasons
Serving organic drinks, organic seasonings
Giving the taste buds teasings and the pleasings
Be sure to look us up for so many good reasons

This jingle was made as a short video clip to promote a close person in my life's veganish food truck business, as our plant-based diet journeys were closely aligned. I also spent many a time working on this food truck and being inspired by the perseverance and persistence needed to make the business succeed.

Time To Make A Move

V1

Stepped into the scene like an actor
James Dean lean against the wall by the back door
So fresh, clean, new, ripe, green
Playing the field, huddled up with the team
Blowing off some steam, break from chasing the dreams
Take a look around, see the girl of my dreams
Need to get her attention by any way, means
Worked up and nervous, sweat dripping like a fiend
Emotions trumping logic, girl I'd take to the tropics
Exotic trips, views that excite the optics
Sendoffs like rockets, lost in time as the clock ticks
'Til my pockets drained from every cent
'Cuz all I need is this dime who's been heaven sent
Thoughts rain, mind vents the approach
Should I sneak from behind
catch off guard like a roach
B-line in front, warm greet like the host
Buy her a drink, cheers to a toast
Or send out some vibes as I lean, and I post

V2

Still in the waiting line waiting on a sign
If I get caught looking, will be in a bind
Whether contact made with eyes, or peepin' that behind
Cuz the hour glass flips, clock starts, I'm timed
Better be primed, no rewinding time
Few seconds to act, as a matter of fact
Psychology-backed, code has been cracked
Hesitation means that confidence lacked
Ballers and the macs have a plan of attack
So back against the wall, pray I don't stumble or fall
Butterflies, jitters, and all, but standing bold and tall
As I sneak those peeks, not a blemish or flaw
Visualizing beauty under panties and bra
And gripping that fannie as I land those claws
Time to make a move, grow a set of balls
No more time for any close calls

V3

Caught a quick smile, brief moment, in a blink
Gonna tell her what I think soon as I finish this drink
Like sure you're doing fine, but I'm the missing link
Last piece of this puzzle, we could get in some trouble
Twice as much fun than the others, like double
Get it popping, crack the champagne, see the bubbles
Every night filled with love making and the cuddles
Finally break from huddle, dodging the crowd
Feeling the pressure, heart beating loud
Calm on the surface, chest up and proud
Drawing attention, aroused brows
How's about I refill your drink for you
Get to know you better over dinner for 2
Got the perfect place with a romantic view
Fast forward, locked lips, stellar reviews
Friends paid homage like at church at the pews

Chorus

Time to make a move, whoa, time to make a move
I've been watching you watching me watching you
Now it's time to make a move
I've been watching you watching me watching you
Now it's time to make a move
I've been watching you watching me watching you
Now it's time to make a move

This song is about the psychology of waiting too long to move in on a target. I hesitated far too many times in my life, leading to many missed opportunities to establish a potentially amazing connection...all because of the fear of rejection.

Time to Make a Move

Purpose

V1

Took a lil' sabbatical, came back a radical
Surrounded myself with people who thought it was dope, gnarly, radical
All facts, factual, planned focused, tactical
Focused on a journey to uplift and be impactful
Soon to get the crowds in, packed, full
Dropping knowledge bombs, not the shit, not the bull
Make it all habitual, like when Sunday was the Sabbath, yo
You can talk, you can babble, though, to me a myth, or magical
Startin' to live a life more desired, more preferred
Where dreams and reality start to become blurred
Where nothing is unreasonable, nothing's absurd
When you blaze your own path, separate from the herd
When you have your own voice, you get seen, it gets heard
Passion in your voice, actions and words
Laughing off the criticism, that's for the birds
Surrounded by believers, off-beaten paths and nerds

V2

Changed the direction, like Russians did to election
Like stock market correction, limp dick to erection
You know, go hard, stand at attention, strive for perfection
Took another gig, got a different profession
Hit the yoga mat, got a different complexion
Drastically improved levels of presence, destressing
Not complex or perplexing, but now counting the blessings
Dodge those who question, who get on nerves and be testing
Getting lessons in at the studio sessions
Then pouring out my darkest secrets, confessions
Follow my passion, step on pedal, be gassing
Trust in the path, no worries of crashing
Victory lane, soon glory to bask in
'Til I start to see the progress and I'm starting to cash in
Knocking out the bucket list in orderly fashion
Spread love at all times, no hold backs, half-assing

Chorus

Trying to find the meaning through this every day circus
Been searching high and low, and I finally found my purpose
What's your meaning, what's your purpose, time to show em' what your worth is
I got meaning, I got purpose, got me feenin', got me hurtless

*This is probably my favorite song. I took
a year-long sabbatical for soul-searching
and to identify a passion, as I had been in
a funk throughout my adult career. This
song talks about how I became bold, made
dramatic changes, and found a new
purpose for life along the way.*

V3

This game needs a new savior, a new brand, a new flavor
A breath of fresh air, you can taste, you can savor
A poet and creator with model behavior
Positive influence, lifting you to be greater
Found me my purpose, my meaning, my role
Tell me your secrets like you are a mole
Those weighing you down, taking a toll
On your health, wealth, well-being, life lens you're seeing
Holding you back from your purpose, your meaning
Crutches that got you off-balance and leaning
Drugs that may have you in a trance and feenin'
Bout time we join forces, set up a meeting
Overcome obstacles till all are beaten
Close in on goals, no longer reaching
Execute mode, no longer preaching
'Til we laid back, life is a beaching

pur·pose

/'pərpəs/ 

noun

1. the reason for which something is done or created or for which something exists.

"the purpose of the meeting is to appoint a trustee"

synonyms: motive, motivation, grounds, cause, occasion, reason, point, basis, justification

The Present Moment

The Present Moment

Fun fact...this song actually originated from an inspiring sign given to me by a close person in my life. It is a daily reminder how all that we have is the present moment, and how we act in that moment makes all of the difference in the path we are in the process of creating.

V1

What better time than the present moment
Won't get a second chance to repeat or clone it
Better make the best of every second, time to own it
Know I got the master plan, pieces, components
Demonstrated to the fullest
Proud to say I've grown and shown it
Heart worn on the sleeve like I pressed it on or sewn it
Matter fact should probably turn it to a clothing label
So it's top of mind and topic of the convo at the table
Forget the waiting line, know it's my time to shine
Paid so many dues, repeat, rewind
Did the hard time, like jail, from crime
Best shape of my life, the peak, the prime
Yeah prime time baby, what you see, what you get from me
Worship like you seen the holy ghost, holy trinity
Find me in the circle where the champions, the winners be
For the rest of my life, from now, through eternity

V2

You will feel my presence, focus so intense
Thirst for life about to soak right up and quench
No more riding pine, sitting bench
More like running wild, escape from prison hopping fence
Flee for the border, breaking down boundaries
Blazing a path right through the mountains and the trees
Capturing the moment like a still frame or freeze
Just like a picture so I smile and say cheese
Cuz these days define the destination
Where you end up placing, skills you be acing
So I pour the foundation, but not cemented in my ways
Cuz I move more fluid, like the gels and the clays
Navigate through the dust and the haze
Steady pouring out passion, love, and the praise
Best version of self all times and days
Lost in the moment, but found in my ways

Chorus

The stars are aligning, we are shining
Brighter than the sun, and the moon in the sky
Never been more ready than this present time, this moment
Time to take it, time to own it, now it's time to shine

Bridge

Embracing the journey, no racing no hurry
Lost in the moment, facing no worry

Do What I Want

DO WHAT I WANT

'Nuff Said 😊

Chorus

I do what I wanna do
I do what I wanna do
I do what I wanna do
When I want to do it
I do what I wanna do
I do what I wanna do
I do what I wanna do
When I want to do it

V1

I do what I wanna do, when I wanna do it
Deuces in air, say fuck it, screw it
Gone on adventures, own it, rule it
Gas on the fire, yeah, I fuel it
Fire starter, getting shit popping
Get party going, bump jumping hopping
Panties get wet, then they get dropping
Like it's the only option and they all want to opt in
Call the cops in, it's a fire hazard
Lifestyle been aced, lifestyle been mastered
Turn fiction to fact, old guard bitch slapped, smacked
Cheat codes hacked, chips raked and stacked
Soon get lifetime awards and plaques
Girls rubbing racks, rolling over on backs
Cuz no one's fitting into shoes, like their Kobe's or Shaq's
Fly over you, like Vince Carter's, T Mac's
Or any stereotype who can jump cuz their black
Going on attack, cuz I know I do it better
Hungrier than ever, know I should be fed more
In every single line, know that I have said more
Worked hard and have sweat more, through every pore
Come up with shit that should rock you to core
Yeah, Come up with shit that should rock you to core

V2

Come up with shit that should rock you to core
Jabs from Mike Tyson, insides sore
Days upon days, more so a lifetime
So hard should be thrown in slammer, fined
Yeah, I'm feeling fine, best shape of life
Overcame obstacles, setbacks and strife
Sharper than razorblade, dagger knife
So now I do what I wanna do, bolder than ever
Figure out the ways to pull it off because I'm clever
Uplift those I cross like I'm a crane or I'm a lever
Those who get in way, cut through, sever
Mentally with brain cuz I'm smarter, clever
Plus I'm losing fear, or maybe it's my mind
Sneak through obstacles when in a jam or in a bind
Same time I'm gentle, I'm friendly, I'm kind
Those who practice hatred left in dust and behind

V3

Those who practice hatred left in dust and behind
Fast like fast forward, they just rewind
Opposite sides of the pullies as those bullies
This is no bull see, they inspire and they move me
Like a 5-star documentary or an independent movie
Dance circles round those haters like I'm groovy
Subject matter expert, acronym be SME
See, I do what I wanna, trips to Dominica
Travel road to Hanna, roll blunts of marijuana
Sync teeth into life, like vampire or piranha
Feeling this up in our face and all up on ya
Bow down in front of face, like I'm on your honor
Not even up for discussion, no need to ponder
Brighter than the bleach that makes the hair blonder
Light years ahead, futuristic, traveled yonder
Like save us from the Terminator, I am John Conner

Sensually Charged

This is a theme-based album I completed in 2 months. I intended to put the music more to the sidelines in 2019, as I didn't get the desired momentum the previous year. As I was waiting on a few bottlenecks for another primary area of focus, I decided to crank this one out quickly, as I felt strongly that I was getting better at the entire process, from writing hooks, to higher quality recording.

I will always feel strongly that this project would have hit the charts if I had a strong backer. The only setback was that the cover photo for the album was taken after a shoulder surgery, of which I was in the worst physical shape of my life ;) 'Nestlin' was a last-minute addition and the song that should have taken it the distance. Hopefully, we still find a way to get this to the masses and re-release it properly like Jay-Z's Reasonable Doubt album.

Sensually Charged - Time to Love Me

Time to *Love* Me

I'm on a mission to give you my best
Time has now come to put me to the test
Lay all false rumors to bed and to rest
Come ride this wave that's beginning to crest

They playing checkers, I'm playing chess
Courting the queen, then put in check
Leading you through the carnage and wreck
Leo, Titanic, the bottom of deck

Ace up the sleeve, magician, or thief
Stealing your heart, with me it leaves
Falling for me like in autumn from trees
Sweeter than nectar of gods and the bees

So thankful you praise, you are down on your knees
No longer down on your luck or your dreams
Or lost in dark cuz you hit the high beams
And life just brighter with us as a team

And that's not just it, even though it may seem
Not even close to running out of steam
Feels like a sauna, when I get up on ya
Smoking and high like you burned marijuana

Sensual person, in bedroom a surgeon
Advanced version, make you feel virgin
leaving a hurting, when wild side gets merged in
Blood pressure rising, temperature surging

My favorite part of every Jay-Z album is the intro, as it really sets the tone and defines the theme. I took pride in this intro and explain that it is now time for both females and my entire audience to start taking me seriously and to give me the shot I feel that I have earned.

Sensually Charged - Drippin' Wet Sweatin' Ya

DRIPPIN' WET SWEATIN' YA

I decided to do the Sensually Charged theme while working on this song. The idea was to work on softening the delivery and writing more about intimacy and relationships to win over a female audience.

V1

Yeah, I'm thinking of witty lines, to win you over, make you mine
But why don't we just get lost in some time
Sippin' on some wine, as we dine
And I can tell you how fine that ass looks from behind

Yeah be direct, not try to beat around the bush
Fluffing conversation with the mush
Just push the agenda, lend a helping hand
For you to realize that I am the man

Yeah, the man you've waiting for, nothing less or nothing more
Who's gonna make it an everyday chore to adore
That precious soul, pretty face, nothing but warm embrace
Never gotta worry about lies or disgrace

All you gotta worry about is keeping the pace
Cuz I wanna move fast, like we riding first class
But we can go slow when I'm tappin' that ass
Stretching out those nights that you want to last

Chorus

I'm drippin' wet, sweatin' ya baby
I'm drippin', I'm drippin'
I'm drippin' wet, sweatin' ya baby
I'm drippin', I'm drippin', I'm drippin'

V2

Yeah, I'm sweatin' you, time to stop vetting me
Like he's a bad boy but can he come home to the family
Plant our roots and branch off of the family tree
Pillow talk and hold me after giving the D

Let me show you actions speaking louder than words
Standing out on shelf, spice misplaced with herbs
Talking all that big boy talk, for the birds
Factor in I'm bold, a little crazy, absurd

And I can take you adventure, seeking unbeaten paths
Reekin' of weed and hash, pleasin' those cheeks and ass
With nothing but the beauty and the utmost class
Only when you toy and taunt me with that sass

Alas, starting to get your attention
Palms sweating, knees weak, jaw's clenching
Don't worry, know how to ease your nerves and tension
And did I fail to mention that I'll always put my best in

V3

Listen, baby, I'm soaking wet with the sweat
Why don't you let me set us up for the road to success
Yeah, download the latest version of GPS
Get excited bout our quest, like a gold rush out west

You know I'm the best option on the table
Capable and stable, connecting like a lego
Lego that ego, whether hardcore or playful
And I'll back those other ladies off if you say so

They so so compared to you, basic bitches
They are just gold digging looking for riches
Swinging for fences and nothing but misses
They do not deserve the title of Mrs.

They'll be missin' me when all I'm doing is kissing you
Cinderella fit looking mean on that shoe
Holding their breaths as we maneuver through
On our way to whatever it is you wanna do

Sensually Charged - The Potion

The Potion

Verse 3 is one of my favorite verses and when I gained the confidence that I'm bringing some lyrical complexity and delivery that is competing with my idols.

V1

I'm the one that's chosen, all the rest are posing
Heart has been unfrozen
So let's remove the clothes and let me get the lotion
You my only one, we can toss the magnums and the trojans
We can dip our toes in
Not an order, just proposing
See how fast it goes in
Standing at attention, far from dozing
Ready to explode, erupt, erosion
Now I'm overdosing, overdosing on the potion
Now I'm overdosing, overdosing on the potion
Yeah, like love potion number 9, baby I'm feeling fine
Pour you a glass of wine, then we can hit rewind
We can keep it soft or get a little bit vicious
Drunk of your love, drunk off those kisses

V2

What you got there's fine, won't you love me one more time
Won't you love me long time, like when I fall out of my prime
I'm head over heels, love your touches, love your feels
Love when you're in sneakers, love when you're in heels

I'm starving for you, baby, like I've been missing some meals
Feeling like I'm rolling, and I ain't talking wheels
I'm a bargain hunter, and you're the real deal
You got me hooked, and your winding up the reel

V3

Dive in deeper, well beyond the gate keeper
Snuck in for the double feature
Yeah frill seeker, testing what you like
You can be my teacher, stretch goals, yeah, I'm a reacher
Whatever I can do to please ya, I'm a pleaser
Maximize your leisure time
The way you got me feenin' it should be a crime
Like it's done by done by design
Yeah pre-meditated, got me faded
Everyone jaded bout how well I played it, yeah, gave it my all
Proud standing tall, but diving deeper, like a never-ending fall
Above the law, way I'm feeling, higher than a ceiling
Not concealing feelings, destined for a hangover
But that's why I came over, to overdose on the potion
Plan in motion, yeah, I'm coasting, like I'm floating on the ocean
But at the same time, ripping tides, causing waves
Behaving like we popping pills at raves, baby I'm in a trance
I'm a slave, when you do that dance I crave, let's misbehave

Chorus

Now I'm overdosing, overdosing on the potion
Now I'm overdosing, overdosing on the potion
Now I'm overdosing, overdosing on the potion
Now I'm overdosing, overdosing on the potion

Sensually Charged - The Enabler

The Enabler

V1

She was fresh out and she wanna to get wild
Daddy like behavior, treated like a child
Relationship old, complacent, mild
Attorney fees paid, paperwork filed

Seen this routine many times before
ex a bit controlling, bed routines boring
Maybe we won't be too tired in the morning
Minutes later, he's out cold, snoring

My approach, different, unique, foreign
Release therapy for that energy you storing
Vibes start flowing, rainbows showing
Calm after storm that gets you smiling and glowing

Knowing what you need, doing what you like
Trust and quickly remove those training wheels from bike
Listen close like you speaking softly on the mic
Sneak into your heart like I'm your favorite pair of Nikes

V2

Rest in peace, old you deceased, laid to rest
Cheers to next chapter, bound to be the best
I confess, I can help you hit those stretch goals
Get you out of character, new experiences and roles

In and out the bedroom, give you space and give you head room
Meditate it a bit, get you Zen really soon
Head up in the clouds like a helium balloon
Singing my praises, 'til it becomes your favorite tune

Yeah, repeat on that playlist, hanging with the A-list
Feeling famous, nothing but the latest, greatest
Take you on hiatus, don't care what time or day is
Middle finger haters, move and shake on naysayers

Peel off the layers, elevate on conveyers
No worries or cares while they holding the stares
Get it, I'm using double entendre
Let's dive in some tantra and leave the trouble behind ya

V3

So get your bucket list, let's begin to clear it out
Let me add a bunch of things I think that you forgot about
Time is of the essence, yearning for your presence
Don't be hesitant, get it out, let it vent

looking good, looking fine, in your prime, heaven sent
Stick around for a bit, spark a fire, pitch a tent
I wanna know all of your fantasies, and your fears
Every dark secret, you've been holding back for years

Chorus

She is fresh out, and she wants to get wild
She just wanna to get a lil' bit wild
Well get up and show us how to dance on that table
I'm never gonna do anything but enable

This is my personal favorite on the album. It stems from a few relationships with recently divorced women, of which they were looking to make up for lost time and wanting to dive into new experiences without fear or judgement.

Sensually Charged - Nestlin'

Nestlin'

This is my attempt at creating a catchy sensual twerk type dance song like "Teach Me How To Dougie." The goal was to create a viral hit that could have staying power for years at the dance clubs.

V1

Let's move fast, get the lead out, pencil you in
To let me get the pencil in
Hitting all the right spots, like I brought the stencil in
Gone without a trace, right up out this place
Feeling up on lace, picking up the pace
'Til 6 am or seis, murder was the case

Yeah, I'm the ace, when it comes to this nestlin'
Bring your booty close with no worrying or questioning
Dose right after dose, stirring up the estrogen
'Til you toast and time to ghost, tell a friend to tell a friend

Hold on to curves like I'm flying round the bend
Mold round the nerves as if to protect, to guard, or fend
Work up the bar like I manage or I tend
Pirate for the booty 'til they surrender, give, or lend
Yeah, pirate for the booty 'til they surrender, give, or lend

V2

Time to take action, fatal attraction
Sitting back and watching that booty be taxing
Factor in that coke bottle shape with those racks in
Show Mr. Miyagi a think about waxing

Yeah wax on, wax off, booty feels so soft
Time to get physical, turn your head and cough
Moving my hands where they shouldn't belong
Like I'm peeling those bands, and I'm filling a thong

Feeling real high like we smoking a bong
Like we toking and we choking with the Cheech and the Chong
Yeah, long gone, like no one else is around
Mesmerized by the way the booty shakes to the sound

Way it nestles in my stomach when you touching the ground
Sensually you spin it around and around
Pound for pound, best nestle in town
The critics have spoken, the queen has been crowned

Chorus

Ain't no doubt or questioning
She knows how to nestle in
Just watch her nestlin'

Let me let you just settle in
So we can get to nestlin'
I wanna nestle in

Yeah, move it right back like you sitting on my lap
I'll guide and hold it, give a little tap
Wiggle and shake it, 'til you know I can't take it
'Til I'm getting you home, and getting you naked

Yeah, move it right back like you sitting on my lap
I'll guide and hold it, give a little tap
Wiggle and shake it, 'til you know I can't take it
'Til I'm getting you home, and getting you naked

Sensually Charged - One Night Stand

V1

She says she don't do one-night stands
Well, we're going to change those plans tonight
I'm gonna have my way with you tonight
Yeah, I'm gonna do whatever I want to do, girl

Met her for some wine and she showed up looking fine
And I'm fine putting in the time, but I wanna make her mine
We had the connection, it was time to get to wrestlin'
Under sheets we get undressing with the kissin' and the sexin'

V2

She said let's just wait a minute
I say fuck that, I'm gon' hit it
I think that you also with it
You think I'll just hit and split it

Why don't you try me, make me miss it
Love me down and rub me, kiss me
Hold me through the night if I toss and turn and fidget

I'm far from that player type, tryin' to build up his stats
Who brags to his boys, says he's getting' some ass
We want the same thing, connection that lasts
Won't you reconsider, and give me the pass

Hahahaha why you putting up a fight
I'll even guarantee you a second night
Let me sign the contract, let me get you in the sack
Get some oil, massage that back
Sneak my hands in front on rack, then I'll show you what I pack

This one was my best "RapNB" singing attempt, similar to a Post Malone type feel. While the song is called "One Night Stand," you'll see that the intention of the song is deeper and more so means "Look, our connection is amazing, I'd love to act on it. I think you do as well, so let's move forward with it and have a great night."

Bridge

So what's it gonna be, girl, what's it gonna be?
So what's it gonna be, girl, what's it gonna be?
So what's it gonna be, girl, what's it gonna be?
So what's it gonna be, girl, what's it gonna be?

I wanna go all the way with you, girl, I wanna go all the way with you
I wanna go all the way with you, girl, I wanna go all the way with you

Chorus

She says she don't believe in one-night stands
Well, we're gonna change those plans tonight
Ohhh yeahh

Sensually Charged - Hair Ties & Bobby Pins

Hair Ties & Bobby Pins

V1

Yeah, I be picking up the bobby pins
Picking up the bobby pins, so many fucking bobby pins
Lot of notches, lot of wins, through some eyes a lot of sins
Picking up the mother fucking bobby pins

It's like hair gripped, and shit falls out
And they're well satisfied with no shame and no doubt
Scoop up that jewelry, the ring for the finger
But those bobby pins stay on the floor and they linger

'Til I hurt my back from scooping up and throwing in the stack
Grab bag of shit left behind, they won't be getting back
Just an old excuse for getting back
Just so they can get it from the back

Racking up these clothes, from these hoes, how it goes
Knock 'em down steady like rows of dominoes
Everyone in town, need to check the lost and found
But those bobby pins be lurking, scattered on the ground

V3

Man they come back for the hard D and jewelry
But they could give two fucks about bobby pins and hair ties
Toss 'em in the trash when they leave, sunrise
Send 'em on their way with wild hair, wide eyes

No surprise, more highs, than anything money buys
Any other guys, speak truth no lies
Never wanna cut connections or ties
Listen close to haters, whispers and sighs

V2

Hurting my back from all the girls in the sack
Like I'm a pimp, like I'm a mack
They be undressing these clothes and accessories
Blessing me, like at the church on both knees

When they bout to leave search for keys, jewelry
Thinking they'll be back a guarantee, a certainty
Like they can pick the phone up when they're hurting for the D
Like remember me, taking you to cloud 10

Let's spend some more time together, like forever
You know you ain't gonna find someone good enough or better
No one gonna get it poppin', get it wetter
Changing up the forecast, real-time with the weather

Plus I think I left my necklace over the dresser
And a little bottle of perfume it was a tester
Said she could come over with a smile, with a grin
Cuz she failed to mention the hair ties and the bobby pins

Chorus

Hair ties and bobby pins be falling out of hair and on the ground
They falling all around
Hair ties and bobby pins they falling all around they all around
Round and round they go
Round and round they go

This is an over-embellished theme of indirectly showing off how many girls I'm getting by using hair ties and bobby pins as notches. The funny part about this is the truth in which the number of times these have been seen on the ground over the years, but not once ever being asked to save or return them, as they are an after-thought.

Sensually Charged - Sex Yoga Remix

V1

Got this chick, she likes to do sex yoga
Wouldn't believe if I told ya, showed ya
Asana for the story that's about to unfold
Greatest damn story that's ever been told

She gets real sensual all through the day
No bedroom is needed for frolic or play
Sex drive on demand, no time for delay
Gets more aroused if onlookers stay

So many texts that she wants to have sex
After studio sessions with girlies who stretch
Working hot bodies and making them sweat
Playful adjustments making her wet

Appetite goes up with feels with touch
Salivates at those glutes, those butts
Anything sexy that moves, that struts
On her yoga mat, she plays, she fucks

Chorus

Got this chick, she likes to do sex yoga
Got this chick, she likes to do sex yoga
Got this chick, she likes to do sex yoga
Downward dog from the back, and it's over

She's my sex yoga queen
She's my she's my she's my she's my sex yoga queen
She's my sex yoga queen
She's my she's my she's my she's my sex yoga queen

V2

So I got this chick she wanna to do sex yoga
So I take it out, bend ya over, fold ya
Stabbed with the magic lite saber, Yoda
Downward dog from the back and its over

Deep breath, take it in, exhale, again, again
Pleasure to the core as she begs for more and more
Arched back off the floor, elevated, muscles sore
Begging for a break, let me pour the pinot noir

Not in a glass, but all over that hottie
Tongue working hard licking off of that body
Squirt dripping out like she's going to the potty
Wrestled to the mat, as I'm piping her, Roddier

Setting my sites on taking her to new heights
Feel like the guru as I turn down the lights
She feels the Shiva, as I nibble, I bite
Repeat the mantra for the rest of the night

V3

So I got this girl she likes to do sex yoga
So I release that stress from her head, her shoulders
Light up the room with the candles and holders
Get her in the mood like a man is supposed to

Enlighten like the buddha to the mind, body, soul
Lips tighten, when I do ya, wrapped around the pole
Dick flexing, stiff erection, playing my role
Marathon ahead, get the coconut oil

Body fluids traded, her feeling sedated
Oil on the skin soaking in, marinated
Skimming through the karma sutra pages got her faded
D is the best ever had, ever tasted

Climax after climax, orgasmic haze
Bootie and the abs, warm, creamy glaze
State of nirvana, light up and blaze
Naked, namaste, she bows with praise

*This was the very first song of mine
where people were actually giving it a
repeat listen on their own. It ended up
being the first song I pushed out to
Spotify, but I decided to do a remake
for this album, as the fit was perfect,
and it could use a little refining, since
I used an unrefined beat I created
years ago for the original.*

Sex Yoga (Remix)

Sensually Charged - Blow a Wad

This was a re-do of my second song I made. My brother and I debated about how to pull off being at least a one hit wonder and how to market the ultimate club banger, so we thought it had to be a little bit naughty and edgy, but without sacrificing lyrical ingenuity. The outcome was "Blow a Wad" and having your way with that pretentious club chick we all know too well hahaha.

BLOW A WAD

V1

My crew steps on the scene, tough not to be seen
Same theme, fresh, clean, outfits lookin' real mean
Girls behavin' like fiends, they know we getting the green
They swirlin' around the team hopin' they get between

The sheets with the Springs when it's time to break out this place
Be a freak, break the springs, like I signed that bitch up to race
But first she wanna see how that green in my pocket tastes
Make a round shots disappear without a trace

They try to play them cards right, see if you're gonna trick
See if the stories align, from everyone in the clique
See if you're living a lie, or living a motion pic
If you a big dog, flea or a little tic

So if you livin' a lie but you a really nice guy
Or if you the big dog, put your hands in the sky
We gon' buy the bar out of that whiskey and rye
Get those gurlies a little tipsy, then give em a ride

Chorus

If she the baddest in the club, blow a wad on her
Pull it out, let her see and blow a wad on her
If you a baller all the way, blow a wad on her
If you been savin' for this day, blow a wad on her

If she the baddest in the club, blow a wad on her
Pull it out, let her see and blow a wad on her
If you a baller all the way, blow a wad on her
Don't let that girl get away, blow a wad on her

V2

Club's a fire hazard, can't even maneuver through
Behavin' like wild animals, not caged in the zoo
Prime table in front, still an obstructed view
Now emerges some talent, standing on queue

Direct 'em to approach, connection to ensue
Standard line of questioning, what is it that you do
Heard it so many times, don't even drop 'em a clue
Instead lead with my hobbies, now how about you

They hover round the table, that sexy little stable
Highly ratable, now debatable, we filming reality cable
They're hopeful and their playful, designer clothes with labels
False move they'll be ungrateful, off to another table

But the chemistry is something that they cannot depart with
Kickin' top game we about to steal their hearts with
My boys' act in sync, like a performance art gig
Or is it the bottle service, the girls are in love with

V3

Look around the club, all I see wandering eyes
Directed at the table with the team who rounded the prize
We living in the moment, times of our lives
Haters keep on watching, hoping for demise

Narrowing the focus on the hostess with the mostest
Who I wanna see in the morning, toast to fresh mimosas
Rock bodies in the bedroom, knock cushions off the sofas
Need the prognosis before the club closes

She sees the bottles flowin', no longer thinkin' I'm tellin' lies
Knowin' the convo is workin', unblinkin' with gazin' meltin' eyes
Her mind plottin', debating about what kind of alibis
Will disguise the sex and lies she'll be deep in til sunrise

I kiss her on her neck, whisper in her ear
I think it's about time, you and me disappear
Dually noted, tell me your place is near
But first one more drink, for me and my girlfriends, dear

Jasper
Springs

Sensually Charged - Simply Complex

This one was almost bumped from the Sensually Charged album, but I decided to keep it as a Bonus Track, even though it didn't fall completely in line with the theme.

I felt that it made a strong finishing statement in the compilation of this work and my development to get to this point.

V1

I'm dealing with a complexity, I'm simply complex, you see
Your simple mind perplexes me, round the clock it's testin' me
Coping with these lessons that keep showing that you're less than
When I'm striving for perfection, you trying to get some rest in

But maybe I need to be a little more complacent
Settle in the middle, stop acting like its basement
My legs keep pacing, mind keeps racing, bout what I'm facing
Nightmares keeping me up, Freddy, Jason be chasing

But they tasting my dust, will not break, will not bust
Get to daylight a must, yeah in myself, yeah I trust
I never let myself down 'til I'm casket bound, yeah 6ft underground
Catch me going rounds and rounds, toughest standing pound for pound

I'm bound to connect the dots, stir up the pots
Hit the dope spots, fill the prime slots, yeah!
Calling the shots and I ain't talking bout scotch
Fly off like crotch rocket, yeah, this game locked, I got it

Chorus

Simply complex, baby, I'm simply complex
Simply complex, baby, I'm simply complex
Simply complex, baby, I'm simply complex
Simply complex, yeah baby, I'm simply complex

V2

Wake up in the morning, feeling different, feeling foreign
Everyone I'm crossing kind of lame, kind of boring
Knowing I'm the one they should be loving and adoring
Judgement has been made, court adjourning

Pour the liquor into soda, way beyond the quota
Drop the dopest shit, that ain't no prank, yeah, not a floater
That shit you write and spit they wanna chant to, wanna quote ya
Well, let me mentor, take you under arm, and let me coach ya

I got some tricks up my sleeves, you exposed with the tees
I'm laughing in your face, you're holding camera, yelling cheese
Open doors to opportunities, skeleton keys
You girl's fantasizing bout getting on her knees

Bless you with this instead, best living, best dead
Never sprayed the lead, but yeah, I got that street cred
Jealous talk behind backs, faces get red
'Cuz my mind is long gone, yeah, way out a head

My Favorite Line

In The Flow

*Jasper
Springs*

In The Flow - In The Flow Intro

In the flow, lost in between the keys
Riding through the notes and melodies
Electric eel in the deep blue sea
Light a path where it's dark for the blind to see

See the sparks, back away the sharks
Up, up, away like I'm Tony Starks
Bars harder than iron, man
So so hot need fireman

Like Amazon fire, better head for the river
Amazon prime, way I deliver
Way ahead of time, or should I say behind
Back when they used to care about the rhymes

Back to the flow, of which I'm lost in
Think I just washed ashore in Boston
Freedom trail, or yellow brick road
Maybe I tornadoe'd

Donnie Darko, different universe
Way it feels comparing any verse
Against anyone alive, delivered in a hearse
Know I do it better, know they did it worse

Best in profession, Leo, Inception
Peel back the layers and you'll see there's no question
Be in high alert with emergency responders
When I catch you off guard with the triple entandres

Each word placed heeds your attention
Each line, space, deserves inspection
Show me love and affection
Crown me king, the next election

In The Flow - In The Flow

This song was inspired by my first ever Ecstatic Dance experience, of which the organizers flowed around with such grace, beauty, and confidence...it was contagious.

V1

She's a beautiful soul when she's lost in the flow
Floating all around, elevated from the ground
Like an angel from the heavens, energetic with her presence
Queen of the night amongst the peasants

Lost in the flow, ballerina on toe
Working the room, performing a show
Lights up the moon, making it glow
Hypnotizing, mesmerizing as she just glides in

Love the way she behaves like no one else is eyeing
In her own world, she takes pride in
Beat to own drum, whether silly or dumb
Hope she invites me in, I wanna come

On a mission to lose inhibitions
No rules or conditions, acts or renditions
Factor in the fact I wanna caress and get kissing
Get lost in her world, yeah, come up missing

V2

She's in the flow, like she's blowing in the wind
Tornado type spin, oil glisten on skin
Can tell she knows she's in it by the size of her grin
And other countless ways, where do I begin

So confident, brave, on an endless wave
Addiction, I crave, makes me want to misbehave
Slave for her attention, like I'm caged or fenced in
Salivate, thirst for, need to get to quenching

Tension rises, removed disguises
Heart worn on sleeve, no surprises
Yeah, no lies, fixated eyes
Lurking in the shadows there's a room full of spys

They stare and gawk, as she flows like a hawk
Piece of rare flare, standing out from the flock
No worry or care, blowing away with the air
Lost in time, with no minutes to spare

Chorus

She lost in the flow, she flowin' around
Flowin around, around she goes
She lost in the flow, she flowin' around
Flowin around, around she goes
She lost in the flow, she flowin' around
Flowin around, around she goes
She lost in the flow, she flowin' around
Flowin around, around she goes

Intro/Bridge/End

She flows around like there's nowhere to go
Lost in the moment, performing a show
No one to steer it, that care free spirit
World in her palm, she knows not how to fear it

In The Flow - Love You Lovin' You

V1

She moves around like she's one of them pros
Weaving around like a seamstress who sews
How the hell did she get into them clothes
She looking good from the head to the toes

I propose a toast for you stealing my attention
And did I not fail to mention this thirst for you I plan on quenching
This plan that nobody's throwing a wrench in
No one plotting, no one's henchman
No more drama, no more tension
Bout to teach you a lesson

V2

It's like you be the sushi, I'ma stick you with wasabi
Make you hot and sweaty, most definitely, no maybe, probably
Goose bumps be all up on skin, all over body
Faster than shotty, sitting in a Maserati

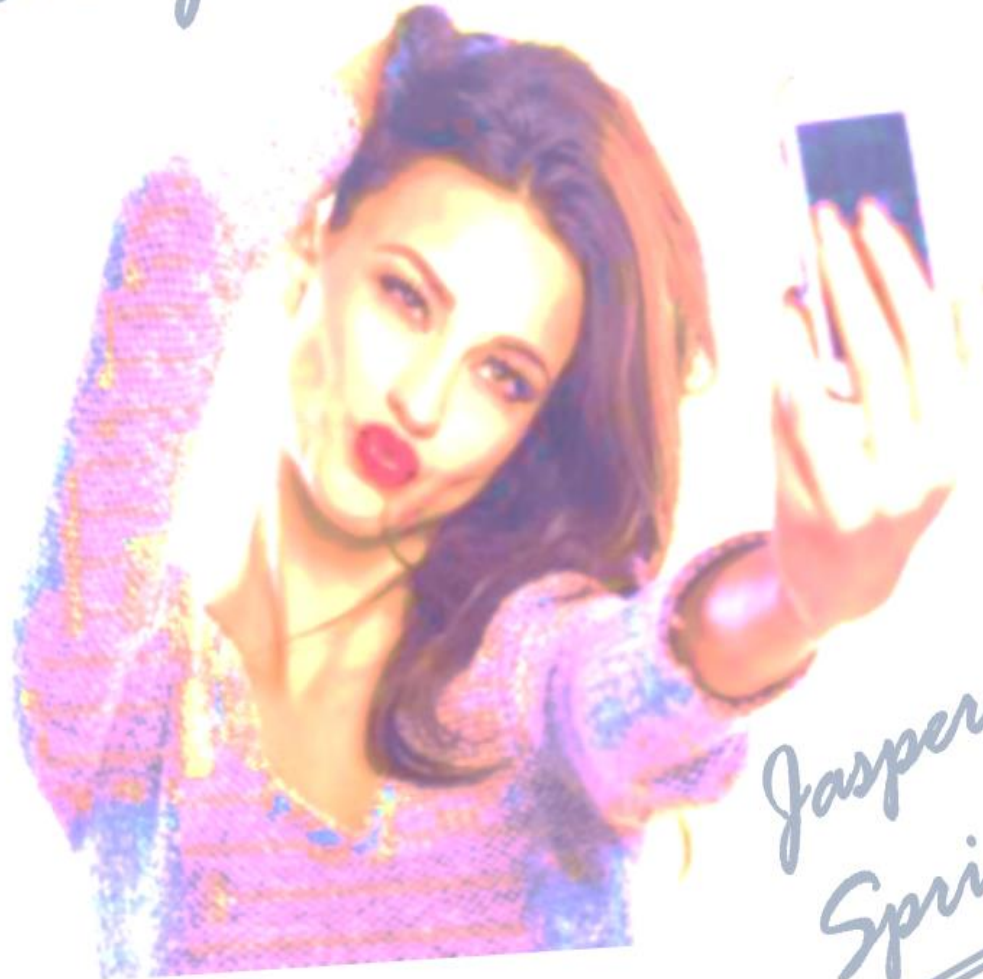

Shake it shake it, baby, fake it 'til you make it, baby
Shake it shake it, baby, fake it 'til you make it, baby
Got me feeling like a selfie, baby, head up in the cloud
Well, technically a server, baby, let me serve ya now
Got me feeling like a selfie, baby, head up in the cloud
Well, technically a server, baby, let me serve ya now

-

Chorus

I love watching you loving on yourself
It's like my new favorite hobby, my favorite hobby
I love watching you loving on yourself
I fucking love it, baby, I fucking love it, baby
I love watching you loving on yourself
It's like my new favorite hobby, my favorite hobby

Love You Lovin' You

*Jasper
Springs*

This one was inspired by an inside joke I had with my girl every time she indirectly stroked her own ego by telling me she was good at something. I always responded "I love watching you loving on yourself...It's one of my favorite hobbies."

In The Flow - She Melts Me Away

V1

The way she meditates it looks like she levitates
Elevated thinking, deep thoughts start to sink in
Man to get her I'd even throw the kitchen sink in
She so focused, she not even blinking

Deserving more than the Washington's and the Lincolns
Like if she was a stripper, I'd feed her Benjis 'til she stinking'
Yeah filthy rich, I'd settle down, I'd marry, hitch
Ain't that about a bitch

Blow a kiss and get a wink, you know that I'm the missing link
If BDSM your thing, we can play around and kink
50 Shades of grey, we can play around all day
I'm slave for your love through the night and through the day

I love watching you doing you, when you don't even have a clue
No one fitting in your shoes, you my fantasy, my muse
Let's lighten up the room 'til we burning out the fuse
Picking up what I'm putting down, reading the queues

Chorus

It's getting hot from the energy she radiates, she elevates rights away
It's getting hot from the energy she radiates, melts me right away
Melts me right away
Melts me right away
She melts me away
She melts me away

V2

She moves and steers it, waking up the spirits
Can't even describe it with the deepest of my lyrics
You would think I fabricate, but let me just elaborate
I want her to collaborate, all through the night, yeah that'd be great

Yeah, give us space, and give us room
getting hotter than the desert sun at high noon
The way she be performing, she causing global warming
tropic storming, like a tsunami be forming

I'm just like a golfer, man, I'm just yelling 4, man
Instructing yall to back away like I'm the boss or foreman
Cuz she lights the tops of candlesticks
Melts away those like the wax off the wicks
Yeah, 'cuz she lights the tops of candlesticks
Melts away those like the wax off the wicks

This radiant energy theme was in line with the "In The Flow" theme, as I was working towards capturing the spiritual audience that loves feeding off of the energy of others and of music. I also made a connection with a fire dancer at an ecstatic dance event and was working towards a collaboration music video attempt that didn't end up coming to fruition

In The Flow - Everybody Wants It

Intro

I know you wanna fuck with it
I know you wanna fuck with it
I know you wanna fuck with it

Chorus

My game is tight, I know you wanna fuck with it
My game is tight, I know you wanna fuck with it
My game is tight, I know you wanna fuck with it
My game is tight, I know you wanna fuck with it
My game is tight, They wanna fuck with it
She wants it, she wants it, he wants it, they want it
Everybody wants it, everybody wants it.

V1

Yeah, my game is tight, tighter than a virgin
Get 'em in the bedroom, I'm like a surgeon
Little bit of flirting, sweet talk and nursing
They aching for me, begging, hurting

Yeah, Yeah, Yeah, Yes, I'm for certain
Everybody wanna peep behind the curtain
See what I'm bringing when I put the work in
How I get those bodies moving, twerking

V2

Man, they all want it, from the gays, the straights
Every single color, every race
Dangling my carrot over their head space
They wanna touch it, they wanna taste

Teasing, toying, enjoying the upper hand
Like I got groupies following the band
What'd he say, what'd he say, what'd he say
Yeah, like I got groupies following the band

And I'm the lead singer, I am the ringer
Put me at cleanup, hitting those dingers
Bring 'em my way, I like to play
Working my way, let's call it a day

Yeah, into the night, out of sight
But they watching, and lurking, and stalking
And trying to get my attention
Because I got this place lit
And they all want to fuck with it

This theme was inspired by my girlfriend, who had a little flirtatious booty shake and finger pointing dance routine that she would do, of which she would playfully point to all onlookers and passers-by and say, "he wants it, she wants it, they want it!" I got such a kick out of it that I thought it would be a great self-esteem boosting song.

In The Flow - The Past Was The Present

The Past Was The Present

V1

Sit back, relaxing, looking back at kodaks and
Videos from the past, damn time flies fast
8th grade broken leg, covered in a cast
warm case of beer stashed, didn't last

Momma was too good of a cleaner
And judging when I was up to something no good, just by
my demeanor
But if I was mean, or, didn't treat her right
Would let nothing in between her, keeping it tight

Yeah, my guiding light, along with pops, and big bro
We outta sight, at the top, with those pros
We had a lot more highs than those lows
We had a lot more friends than those foes

Sing and dancing to Beat It in the street
July 4th trips to Sylvan Beach were a treat
Went every year with our best friends, the Lemons
Living like I'm rolling lucky 7s in the heavens

Chorus

Man, how could that be, the past was the present
Look what I'm doing, I'm unwrapping the present
Man, how could that be, the past was the present
Look what I'm doing, I'm unwrapping my present

Open up the packaging of memories to remember
what was best of me
All about the best of friends and best of family
Everything that made strive to be who I am today
Everything I want to live for, preach, and say

V2

Summertime's used to vibe and glow
Somewhere around the time I let it all go
Before daily grind stressors, those who bother, pester
Test ya like professor, mama, bless her

Remember the memories, captured from all the times she
made me say cheese
Take another look at the photos in the book, yes please
Yes, these are the days I wanna go back to
Even when pops would smack you, for giving bunny ears
to the Abe Lincoln statue

Yeah, pops had it all laid out in a plan
With his cross-country trip in the dodge ram van
Kung Fu flicks with Jean Claude van Dam
Pressing record when they aired out our jam

Casey's top 40, now I'm pushing 40
Thinking how I made it through this shit, oh lordy
Stand by me as I digest my story
And narrate it to you like that boy named Gordie

When I just a little shorty making my way
When the littlest of treasures were making my day
You know play around, lay around
Pops had the best whiffle ball game in town
And me and big bro sneaking videogames all night
without a sound

V3

Yeah, thinking back in time makes me feel better
Things that made me who I am that I want to
treasure
How I'm stacking up, goals I want to measure
How I'm treating others while on business or in
pleasure

Whether I can weather the storms
Defy social norms
Listen to the angel on my shoulder, ignore the devil
with the horns
Try to make the best decisions when I'm presented
with temptations and I'm torn

Make up for every bad decision back to the day that I
was born
Turn up the dials and be aware of what brought in
the smiles
When I was just a little child running wild
On this journey of life, going miles and miles

*My father bought one of the very first video cameras, of
which required you to carry around the VCR in a
backpack! We had so much great footage that my brother
converted to digital files, it was a no brainer to try to
create a memory lane song and accompanying music video*

In The Flow - Time To Flex On 'Em

V1

Ding, ding, ding, dinner's ready, come and get it
Cooked up these dope ass lyrics with the fire that I spit
Please un-divide attention before you digest and shit it
This hip-hop shit, test the best whoever did it
And I'm not gonna rest with it
Reiterate the statement
About my spot and placement
Spot me in the basement
Mind and fingers racing
Uplift like I'm weightlifting
Flow swift like I am drifting
Switch up like I am shifting
Keep up and please stop bitching
And asking me to slow it down
So simple minds keep up

Cuz this hot shit keeps on flowing
Like a volcano that erupts
And I'm done giving too many fucks
About your petty-ass opinions
And how you think I am not winning
Maybe I'll just check your chin, then
Scuff up your fresh brand-new linen
Strive to keep the peace
Avoid the hurting and sinning
But you're testing my patience
Like a lab doing bloodwork

I'll take all friendly wagers and cash out just like a clerk
Cuz I'm light years ahead, with Mr. Spock and Captain Kirk
Get it, Star Trek, I'm the star of the track
With a permanent tic tac under the tip of the tongue
'Cuz every breath I spit is fresh as it flows out the mouth
from lung

V2

I crank these rhymes out better than the best that's ever did it
This hip-hop shit, man I eat, sleep, breath it, live it
Deep, complex shit, signed sealed delivered
Give you the shivers, upper lip quivers
Try to digest it, rejected by the liver

Maybe I should spoon feed it to ya, baby you, get you a sitter
Dropping more dope shit than a junky on a shitter
Best in breed, yeah, runt of the litter
Too much character to express myself on twitter

Time well overdue to understand that I am legit
Sitting edge of seat, restless brain, fingers fidget
And I just wrote this shit in less than ten minutes
You want a hit, direct message this and don't forget your digits
You little bitches

Chorus

Yeah, I'm wrecking 'em
Time to pull up the sleeves and flex on 'em
Verbal massacre will be the death of them
Yeah, nothing left of them
Yeah, my rhyming fits the bill
My rhyming skills kill

V3

Yeah, my rhyming skills kill
Massacre like Kill Bill

No quitting (Quentin), maybe hit the Rza for the score
Executive produce my life journey and tour

With the right beat, nobody is testing me
As the lefty sprinkles sesame
On the hi hat, bass, the kick, the snare
By now should be a billionaire

Yeah, only fair to roll out the red carpet,
And the cape and chair
The crown I own, I do not share
Blaze my own path, my shit is rare
Flex my arm on them, it's bare
Bicep looks like it should tear
Step to me, I double dare

I slime you nickelodeon
You clean up like custodian
I stand up on the podium
Get high like I'm on opium
'Cuz I just dropped the dope on them

Fly high above the most of them
They roastin' and he's scorching, man
Like they just passed the torch to him
So fast it's like a Porsche he's in
Soon stone statues and porcelain

This was another attempt at a lyrical demonstration, as I felt like I was clearly writing just as good or better rhyming patterns and cadences than anyone I've ever put on a pedestal in the hip-hop industry. For example, for the part "No quitting, maybe hit the Rza for the score, executive produce my life journey and tour, with the right beat, nobody is testing me," I'm talking about no quitting and going in for the score by using Kill Bill's Director (Quentin Tarantino) and Score/Exec Music Producer (Rza of Wu-Tang Clan). Then I suggest getting an assist by the Rza to produce my material, as with his beats and my rhymes, nobody will touch me :)

In The Flow - 'Round We Go

V3

Millions still in jail from smoking natural herbs and weeds
While there's billionaires in power exposed for dirt and evil deeds
System should be training where there's jobs and where there's needs
Listen to me, draining my heart out from where it bleeds

Time to get involved, take some action, get it solved
If you been sitting back in seat and you steady state appalled
It's time to make shit happen 'cuz your number has been called
Look what we can move together, oh my god

Chorus

Round and round we go
Round and round like merry go
Round and round and there we go
Ups and downs and yet we stay strong
We stay stroooooong

V1

You know it seems we need to break the routines
Time to change the script, the lines, the actors, and the scenes
Big Pharma machines counting beans producing fiends
From fully grown adults down to children in their teens

Time to change the habits, help the addicts
Invest in change, prevent the moments that are tragic
No more violent shootouts with the semi-automatics
Off with the news, I've done seen it, I've done had it

Change the direction, show a little more affection
Go beyond the checking of the box at the election
Strive for perfection, treat the losses as a lesson
Live a life a truth, minimize confessions

V2

Yeah, same ole' things that got me testing my patience
Like the bills tricklin' in from the testing of the patients
Retirement plan fees from the pretending of the maintenance
Leaders abusing power, bunch of devils and the Satans

Pharma lobbying against effectiveness of kratom
Jeffrey Sessions bought off, yeah, man, they paid him
Country gone to shit, but not the time to fold or quit
Time to rise above, to be bold, and to commit

Times are changing, we're the agent
Get rid of laws that don't serve us and that are ancient
Those abusing rank, pink slips and sanctions
Re-unite the people from different lands and nations

I made this song in 1 day, after being inspired by a new batch of beats that I purchased. I originally made this catchy hook and was going to do a relationship-themed song, but I pivoted while working on the first verse and decided to make it a social activist-type theme instead.

In The Flow - Elevated Thinking

V1

Yeah, sitting back, puffing on the vape
Mapping out the great escape
Go against the grain, train the brain
Oxygen through the vein, stimulate like cocaine

Elevate, hit the mat and meditate
No need to pop the pills to medicate
If I could get you on board with that
Now wouldn't that be great

Expand the fan base
And teach you bout the plant-based diet
You should try it
Gravity, how to defy it

We getting high on life taking higher roads
While they stepping in the fires, burning ashes, selling souls

V3

Been reading good books and they moving and they testing me
To let up on those testing me and manifest the destiny
Starting to make sense to me and stimulating sensory
Reeling in the energy, and feeling what it's telling me

Feeling like there's magnets in in him, attracting with the magnetism
Rebirth, baptism, changing path, expanding wisdom
On the right track, right rhythm
Left those people, places, things no longer serving purpose
Back in past, out of sight and mind, hidden

Chorus

Let that sink in
While your ship is sinking
We rise up and we levitate
We elevated thinking

Thinking big thoughts, Thinking big thoughts
Thinking big thoughts, Thinking big thoughts

V2

Yeah, brain flexin', neurons firing
Getting younger, I'm inspiring
Show no signs of wear or tiring
Wrinkle free or pressed with iron

Benjamin Buttons
More time to turn to one of those
somethings from nothings
Into my own I'm coming

Like a masturbating hand
Think I got the master plan
Try new things faster than the average man
Buy few things like I'm rationing

Materialist Interferences
From experiences
The capitalists, they be fearing us
May cause shocks to stocks, epidemics like pox

But I rock on, prance to ecstatic dance
Gave it a chance, boogying to the beats and chants
Beat to my own drum, dee dee dah dee dee dum
'Til my ear drum's numb and I'm damn near dumb
Vibrate energy like radiant sun
And everybody wants some, everybody needs some
William Wallace, what you call this?
Freedooooom

This song is in line with my spiritual journey and In The Flow album theme, as it talks about jumping into self-improvement experiences and striving for constant growth ahead of the curve of most people in society. It is about striving for daily improvement and always trying to be the best version of myself.

In The Flow - Kinetic

This song is about realizing your full potential, and starting to go full speed after your dreams, now that you realize how much power you harness.

V1

Been sitting on potential for way too long
King Kong ain't got shit on me, feeling strong
In the mental, Denzel, beyond the training days
We done talking about practice, Iverson tactics

Ready for primetime, lighting up the night
Raiden, Mortal Kombat, no one putting up a fight
Slanging lightning bolts in air without a worry or a care
Electrocute like death row time is up and you're in chair

Energy insane, blood pumping through the veins
If it maintains, just might explode the brains
Go get a medic, potential to kinetic
Best in breed, rest in need, looking pathetic

It time to tap into the energy neglected
All the knowledge and the accolades collected
Open the spigots like there's an energy crisis
Rope in the bigots show 'em that I'm the nicest

V2

No one's messing with me, kid
Flowing like electricity through the energy grid
Velocity pick-up without a blip or hiccup
Like it's a semi-automatic, this a verbal stick-up

Firing off on all cylinders, revolvers and Dillingers
Killing her softly with my energy and love
Wanting me to super charge her with my plug
Take her to new highs like it's the newest pill or drug

So much energy no need to ration
Free hand-offs that I'm giving off or passing
Attracting like a magnet with the passion
In demand, yeah, in high fashion
They watch, and I see it's time to cash in

Everlasting, blaze path, that's left ash-ing
No more sitting back, time to take action
Sparks, fires, rubber peeling off of tires
'Til I'm the one they all adore and admire

Chorus

Feel the rush, shocks from the electric
Energy flowing, connecting, magnetic
Been sitting on potential, we making it kinetic
All this potential, we making it kinetic

V3

Yeah, like Tupac, I got the juice, locked
Ready to fire like the tool is half-cocked
You can tell I'm touching them cuz they shocked
Jigga man, hustle that can't be knocked

And I'm putting it in action
Full throttle, no fraction
The Instagramers be tagging
In the glory, I'm basking

Visualizing the rise, bigger pieces of pies
Upside surprise with plans I devise
Cry tears of joy, as I execute, deploy
More rounds of energy than when I was just a boy

Kinetic, baby, no way to tame me
Outrageous, the way I'm breaking through cages
Like I'm throwing fits or rages
Time to turn the pages
Next chapter by far to be the best and be the greatest

In The Flow - Dream Catcher

Dream Catcher

This is a motivational song about achieving dreams. I like the line "Stealing hearts like The Glove, you know, Gary Payton, they should pay me tons," as "The Glove" typically led the NBA in steals.

Chorus

I'm a dream catcher, catching all my dreams
Making it routine, catching low, high, in between
Even those ones hard to catch, splitting, curving
from the seams
Making it look easy, easier than it seems

Gotcha, gotcha, gotcha, gotcha, gotcha, gotcha
Dream catcher, gotcha, gotcha, gotcha, gotcha
Gonna get ya, get ya, get ya, get ya, gotcha
Gonna get ya, get ya get ya, get ya, gotcha

V3

Stack up the haters, just a fact I'm getting greater
Head in right direction, point inflection, like I'm
starting a collection
Pick up momentum, beyond them, see you later
keep pushing harder than a lady who's in labor

My dream catcher, Spiderman's web
Fling sticky string when I'm laying up in the bed
Since footy pajama, costume blue and red
Yeah, from a little boy throughout my life 'til I'm
dead

The dreams I booby trap while awake, asleep, I nap
Hunt them down, like Freddy, Jason, came to town
Bound to capture, a fact I back for sure
Nurture each and every one of them 'til they mature

V2

Dream chaser, dream catching, ratio impressing
True confession, too long chasing a profession
Based on dollars only, had me feeling lonely, feeling less than
Once I learned the lesson, found the answers to my questions
Back on the right quest, son, through the day and through the
set sun
Double down on wagers, got all bets won

Setting sights on new heights
High above the hate, up near the pearly gates
Show me love, stealing hearts like The Glove
You know, Gary Payton, they should pay me tons
Dropping dope shit, leaving runs
Tongue twisters, punchlines, deep shit, comedy and puns
And you could argue that I just do this shit right here just for
the kicks and just for fun

V1

Weave my net, cast it wide
Against the tide, ride with pride
Confide in dreamers only
Even when there's none in which to confide

And on my own and lonely, fuck the fake friends,
homies
Derailing path, no need to unleash the wrath, the fury
The confidence in myself makes those same ones dodge
and fear me
I'm clearly seeing vision, intuition from within

They say the sinners win, nice guys finish last
Asses handed to 'em, well I break the mold and cast
Blast past 'em fast, wind behind the sail and mast
Those who amassed fortunes, anti-splitting portions
Less its split into consortiums, secret extortions
World better off, if their mamas had abortions

Dream catcher, you betcha
Fetch the goals, test the soul
Pester mentors, experts, pros
Plant the seeds and let them grow

In The Flow - No Apologies

No Apologies

This song is about being unapologetic as I seek out new experiences and dreams in an ongoing attempt to live my best life. During my sabbatical, I came to the realization that I spent way too much of my time pleasing others. When I started being selfish, I realized I started doing a much better job enhancing my identity and becoming the man I wanted to be.

Chorus

No apologies
Sorry, not sorry
Time to see it's time for me
I'm a take a little time for me you see
Yeah, a little time to run wild and free

V1

Spent too many times giving too many fucks
Biggest regret of mine, Achilles heel, yeah, the crutch
So much so prevented the growth
Made me fear those and loathe

Carry the unnecessary burden and load
Daring me to be more aggressive and bold
Not to be confused with being dismissive and cold
More like when they getting to the end of the road

Yeah, old heads, getting selfish
And I protect the softer side of this
like a crustacean or a shellfish
Thinking do I need to win everyone over to sell this
Portrayal of myself to improve the mental health that is

Question is do they be testing his patience
To the point he's used up all his mental vacations
Numbing up and dialing down the feels and sensations
Preventing him from doing sensational things

V2

Went through most of my life a people pleaser
Either when at work or in leisure
Reassure you that will never change
But need to rearrange the priorities

And start thinking more of me you see
But do it in a tasteful way and morally
Like you are cordially invited on my journey
To have some fun and learn some more of me

Instead of hopping on your agenda
Stopping by your place to be a better friend to ya
Lend me your ear while I'm being sincere
We can chit chat, grab a beer

Bu you can come here, 'cuz I'm busy being selfish,
filter the selfless, working on some self shit
Your agenda, shelved it for time being
No apologies, clear skies I'm now seeing
Your agenda, yeah, I shelved it for time being
No apologies, clear skies I'm now seeing

V3

Holidays, kept family together
Now sneak in some trips to change up the weather
Whether right or wrong, forecast any storm will pass
Friendships, family ties expected to last
'cuz I'm flying fast, spreading my wings, learning new things
Seeking out those things of which happiness brings
And they like the way it sounds, they like the way it rings
They like the way it sounds, they like the way it rings

Yin yanging, Yuengling in the hand
Toasting as I'm coasting, life, making the most in
Until it's my time to go, til I touch every soul
Finding my passion, stack the chips and cash in
Spend it, no ration, lights camera action
Trying to live a movie, seeking out what moves me
1st mover, bring along the others
lover, father, brother, mother
Apologies forbidden, go hard, keep living
No more following, leading with or without permission
Apologies forbidden, go hard, keep living
No more following, leading with or without permission

In The Flow - On The Rocks

On the Rocks

This song came to fruition after routinely joking with my girlfriend and asking, "Are we on the rocks?" after the smallest disagreements or moments of conflict.

Chorus

We were like two cocktails sitting on the rocks
Sitting on the rocks, sitting on the rocks, yeah, sitting on the rocks
Two cocktails just sitting on the rocks
Rocky roads ahead, rocky roads ahead

V1

Oh no, there she goes
Picking up the phone again
Caught a quick smile as she's giggling and messaging
It's a mess we're in, wonder who she's letting in
If I ask she'll pretend it's a friend, get on edge, defend
Her behavior, still I crave her
For her love I'm a slave, but it's time to be brave
Walls caving in, where do I begin
Back when I couldn't lose, only win
Her love, and affection, interest and attention
Scratch my head, still I question
Patience it be testing
But I'm trying to be calm, while the phone's in her palm
As she flips it over, yeah, as she flips it over
No explanation, no disclosure
Try to keep composure, though I know we're close to over
Try to keep composure, though I know we're close to over

V2

I know she still loves me, but the love is unconditional
Missing those conditions, passion, sparks and friction
Now a figment of imagination, got me fidgeting and pacing
To try to comprehend what we're up against and facing
Rekindle sparks, without the kindle, in the dark
Going nowhere fast, out of gas, clutch in park

Ladies nights are the worst, as she clutches to her purse
Flirting, dancing, singing to every naughty song and verse
Grindin' other fellas, storytellers, who embellish
Kicking game with cruel intentions being hellish
Hate that I spectate, running those scenarios
About other hands running up those thighs and pantyhose
Can't we go back to before the broken trust
Before the broken heart, secret crushes and the lust

V3

Now we're just like two cocktails, sitting on the rocks
Melting right away, watered down, not as strong
Luke-warm from sitting in some heat for just too long
The sweet taste dissipated, spices are now gone
In desperate need to refresh, reset
Please let me know which way we go
Raise the bar, tend to her
Or send her back for more
Flavors, more drinks,
But she already knows what I think
For her I'd trade it all, throw in the kitchen sink
Watch over her without a skipped beat or a blink
Without her around I would collapse or be on brink
Chinks in the armor, together we are stronger
And whether wrong or right, I can weather storm for longer

In The Flow - The Maestro

This song leans toward being in control and mastering the craft of pleasing a woman in the bedroom, but also on a greater scale with great confidence in general in orchestrating and running the show.

Chorus

I orchestrate her like a maestro when the lights go low
Yeah, like a maestro when the lights go low, lights go low
I orchestrate her like a maestro when the lights go low
Yeah, like a maestro when the lights go low, lights go low
Compose the show with the composure, I orchestrate her
Compose the show with the composure, when the lights go
Compose the show with the composure, when the lights go
Compose the show with the composure, like a maestro

V1

Yeah, let me stick it to you, maestro stick it be like voodoo
Mesmerizing, let me lure your eyes in
It's like I'm casting spells, filling water in the wells
Everything in sync, vibes, gels
What's your wish or fantasy, please tell
Have you latching on to my magic wand
Abracadabra, now I gotcha, now I have ya
Nothing else matters, vanished are the chatters
Higher than the ceiling like we climbing up on ladders
Calling shots with flick of the wrist
Orchestrating every plot development, plot twist
Every high note hit without a miss
Keeping your attention, building tension
And I'm the composer, keeping the composure
Taking you on a journey through the scenes into the closure

V2

Now watch what I do, got them pulling strings for you
Got you singing, too,
Puppet on a string, when I do my thing,
Energy I bring, yet to meet my match
Give you a taste, brew a batch
Catching feelings, reel you in
Make you mine, you really win
'Cuz I dedicate my craft to make you better
When I'm on the stage, yeah, front and center
Thriving off the pressure
Making every move a sign of love, a sign of pleasure
Every single note, raising the bar and how I measure
So nice, though, how I maestro
Especially when the lights go
Flow better than any go getter
When I go and get her

V3

Yeah, the way I got it all memorized, got her mesmerized
All the other guys, on the side as stand-bys
Innocent bystanders, guest passes in lanyards
Sidelined, studying my standards
Study my tactics
Practice how to crack this code
Why they lack and I got it this sewed
Nobody fitting this maestro mold
Patent, trademark, license I hold
Every show is overbooked and oversold
Everything my fingers touch turns to gold

In The Flow - Silver Linings

V1

I been going around, around in circles
I've been getting lost, and not found
I been doing things that might hurt those
Selfishly trying to spread my wings and fly off the ground

Been living off beaten path
Sometimes off the rails
Needing someone to provide the wind beneath my sails

'Cuz I been going alone for so so long
And I'm proud of myself for being so so strong
But something was missing
And what's missing was you

This is my attempt at a love song about a special someone, with a little bit of singing and softer melodic delivery :)

Chorus

I'm proud to say the silver linings are around the clouds
The storm has passed away
Looking like some brighter days ahead to jump out of bed
That make me wanna chase my dreams, full steam ahead
Now that I found you, now that I got you

V2

Every time I see ya, never gets old
We like the best fairy tale ever told
Feel like the king kissing the queen in every scene
Challenge my thinking
Make me wanna ease up on the drinking
You're my life vest whenever I am sinking
I tell 'em you're my better 3/4s
You laugh, and say more like 7/8s
Build me up to all of your friends, help me save face
Would put you in pocket, if you weren't the ace in sleeve
Would send off like a rocket, if you wanted to leave
With you I don't even think I have a pet peeve
Never annoy, always enjoy and please

V3

Yeah, it's like one of my favorite songs by Neo and Fab
I'm a movement by myself, but you make me better
Healthy balance, she don't sweat me, I don't sweat her
Undivided attention when we're together
She puts the phone down, yet we connect like a tether
Her love language is the gifts, I know when I am missed
'Cuz the number 1 gift on her list is my presence
When we face to face, talking in the present tense
Listening intense, giving my two cents
Feels more like a roll of quarters the way I support her
Happy when we under the same roof, brick and mortar
I treat her like the queen she deserves to be
Because she makes me happy and I love and adore her

In The Flow - Defy The Odds

Chorus

Let me show you how to defy the odds
Let me show ya, Let me show ya, Let me show ya
Let me show you how to defy the odds
Let me show ya, Let me show ya, Let me show ya

V1

Let me break down the numbers
Been doing this for 4 summers
38 under the sun, hell of a run
Small fraction, action packed
Life attacked, odds stacked against me
Young man's game, over and over
Luck or serendipity, get the 4-leaf clover
F#% is you thinking, the hill you almost over
Inner circle roast ya, behind your back
For overly ambitious dreams you trying to attack
Catching flack, shake the haters, change the team up
Keep swinging for the fences like I'm batting clean-up
Married to the game, renew the vows, no need for prenup
Keep going hard, tear the mother scene up

V2

I'm on mission, got the values, got the vision
Best shape of my life, sharper than a knife
Getting younger, got the hunger, bringing thunder
Life marathon, I sprint I run, 'til I'm the best one under sun

Under no circumstances can you outstand this
I'm taking tougher chances to enhance this life
To break into the winners' circle, do my dances
Break it down for you, spoon feed it, repeat it
Like a mantra, that I'm a beast, ya I'm a mother fucking monster

V3

Burn out midnight oil every single night of year
Pouring out every ounce of blood, sweat, and tear
Pacing back and forth staring at the man in mirror
Forcing him to overcome the worry and the fear

Bolder than ever, older and clever
Give up never, weather any storm
Social norms defied
Me, myself, and I, in which who I confide
Ego and pride strand strong
Mind long gone, way out ahead
Burning rubber, peel and shred
Out fast, out last out class 'til I'm long gone and dead

This was written to be the final song of the album. It speaks on my work ethic and determination to shock all of my doubters when I finally triumph and get discovered as an artist. I wanted to make this album so good that it was an undeniable classic, of which people are forced to give me props, even if I don't have the right marketing machine and distribution to get it to sell.

Going Viral

This album is a compilation of songs I made throughout my Coronavirus journey. It was my release therapy in my attempts to cope with my mental well-being. Packaging it up and moving on will bring closure to this challenging chapter of my life.

Going Viral - J Springs Is The Future

J Springs is the f#%ing future
J Springs is the f#%ing future
It all starts from character, who you are...
My character traits, Red, they make me a star
I pour out my passion in bars, over the beats and the strumming guitars

Even your name gotta sell, even your name...
My name got a ring, I go by Jasper Springs,
old nickname, story behind it, I did not like it
Shy boy, hid it in shame, owned that shit, made it legit and now I have overcome

Remember, women gotta want to f#% you, and men gotta wanna be like you...
Oh Redman, where do I begin
Free sexing, mentor, teaching the lessons
They tell me their darkest, deepest confessions
Straight guys be jealous, the gay ones be trying to f#%

That's riiight. Once you implement that in your rhymes, and your look and your character...then you feeding the peoples' soul on what you talking bout out here...

Yo, I'm talking bout real shit, the pain and the strive
The lyrics be sharp and they cut like a knife
Put that on my lunch money, that on my life

What's going on out here? How you see the world? How do Jasper Springs see the world through his eyes...
Well, my vision be clearer, the seer of most
And I stay so humble, don't brag, do not boast
Enlightened but keep my grip tightened for fighting
Step into the room, shade up, let the light in

Then you talk about it, helping their souls, you know, I got people that tell me
"You know, Redman, you the soundtrack of m life." That's what you want from your fans...quality control-wise, rhyme-wise, producer-wise...
Did you touch lives, did you grow, would they show up at your funeral
I know a few would go, but soon to grow
Half of life be showing up, the other half, show em up
God damn right I'm gonna blow up, and now you know what's up

This Redman Cameo Christmas gift from my sis-in-law was probably the best gift I've ever received. It was a no brainer to chop it up and make it a back-and-forth pep talk dialogue for the album intro.

Gotta think big. There's no more thinking like an artist no more, bro...
Well, bro, I never thought I was an artist, though
Never an amateur either, always pro, which I focused on
Never the cons, roll with the dons, Jiggas, Lebrons
Network my ass off, until I blast off

With merchandise, hat, t-shirts, wrist bands, wif#a, socks...
Yeah, I hear you about the merch, but first let's bring em all back to church
Singing my anthem, give me some more props, and some
How they should make me the feature, cuz J Springs is the future

Chorus

J Springs is the f#%ing future
J Springs is the f#%ing future
J Springs is the f#%ing future
J Springs is the f#%ing future

Going Viral - Skate Night

Yeah, lace 'em up!
Round and round we gooo
Yeah, I'm in a skate crew, you're in a skate crew, we're
gonna skate through

Do you wanna go night skating, do you?
I wanna go night skating with you
I wanna go night skating
Do you, do you, do you

F##\$@ the other dude, I know he in a skate crew
I'm in a skate crew, Me and my boys new
We got the new crew coming through
With the 1,2,1,2,1,2,3,4 ok

Yeah, she was sitting there, just smoking like a cig
Stepped up, approached, like my name was Dirk Dig
You could be my roller girl, even though I'm grown and
older, girl
Skate into my world

Because I'm a Night Skater
And I will see you later
Strobe light, every light there is...

First time you saw me it was real, double dutchen' in a pair
of some real high heels
Not like the ones that you're thinkin', the ones with 4 wheels
ridin' in a skating rink and
Thought it was lame and a little bit corny, another night
skater would begin to bore me
Took it outside and I started to think, my whole life's been
in a skating rink?
I took it outside and I hit the pavement, 2-4-6-8 singing in
waves man
All the girls waving thinking amazing, don't know I'm
just another night skater

I get the @#&@# skates on, and I clip em on
They got the pink laces and the yellow tongues
You know I got a couple pair of charlies, couple pair of wheels
Girl catch it, I'm catching feels

I beg your pardon, I kill for this shit like Tanya Harding

Do you wanna go night skating, do you?
I wanna go night skating with you
I wanna go night skating
Do you, do you, do you

Do you wanna go night skating, do you?
I wanna go night skating with you
I wanna go night skating

Did you ever think that you'd be on the list, VIP, girl
Did you ever think that you skate like this, doing tricks
Did you ever think that you'd be on the list, with the stars
Did you ever think that you skate like this, the rink is ours

Because I'm a Night Skater
And I will see you later
Strobe light, every light there is...

Do you wanna go night skating, do you?
I wanna go night skating with you
I wanna go night skating
Do you, do you, do you

Yeah, you know I'm sexy, skate around you like I'm Gretsky
I'm the best, so, all the bets be off, so let's be off
Let's be off, let's be off, let's be off, let's be off, let's be off, let's
be off

Skate or die, played it high, so now I know how to fly by
Hit the sky with figure 8s, spin like vinyl's out the crates
DJ spinning nothing but the greats
Yeah nothing but the greats, baby, nothing but the greats

We getting high like a drug as the records hit the needle
Skate rink lit, giving us the vibe we need, yo

Yeah, we dipping, we spinning, we dripping, we winning

Do you wanna go night skating, do you?
I wanna go night skating with you
I wanna go night skating
Do you, do you, do you

Tell me girl do you wanna go night skating
Baby, this ain't dating
This is going to hit the skate park after dark
You know how I f@#\$@%ing do
Every time I come through with my crew
With the 1,2,1,2

Man, look at her
Shiny skates, designer, with the fluorescent liner
I tell ya, there ain't nothing finer
Drinks, you the buyer
I will go find her and we skate beside her

Because I'm a Night Skater
And I will see you later
Strobe light, every light there is...

Do you wanna go night skating, do you?
I wanna go night skating with you
I wanna go night skating
Do you, do you, do you

Did the backflip maneuver, we're just about to land, is
it ok, Stan?
Figure 8s, maybe a date, maybe lift weights, late
night skate
Or crazy legs, as the name suggests, it's a crazy trick

A big ole fish fry, a big ole fish fry
Chicky fry, hit the skate park and do my
I go to skate park, I go to skate park, I go to skate park

No time to hate, sir, I am just a skater
Yeah, no time to hate, sir, I am just a skater
And I will see you later

I go to skate park

*Inspired by the dramatic uptick
in Beltline skaters during Covid*

Going Viral - 2020 Vision

Chorus

Yo, it's like I got the Lasik
I got that 2020 vision
I'm seeing things clear
This gonna be the year

V1

I got that 2020 vision
Minimize losses, maximize the winning
Next chapter only just beginning
Flipping the pages I'm aging with grace
Hope you can keep up as I set pace
Roll up the sleeves and exposing the ace

Yeah, gonna take some hard work and planning
Building up the rep, you know, the personal branding
Fly high like I been shot out a cannon, smooth sailing
Get some beach and sand in
Landing soft on my two feet, rocking to my own beat
Bring the heat, hot winter, spring, summer fall
Yeah, carry most, some will fall
Cheers and toast to them all

V2

Ring in the decade it's time to get paid
All the bad memories fade
Stacking the karma from favors and aid
Breaking through barricades, obstacles
Dodging the naysayers who say it's impossible
Like those plant-based burgers
Ain't nobody hurting us
Stacking up the bills that read in god we trust
I want the whole pie, cheese, sauce and crust
Distribute with my peeps
Growing bounds and leaps
Separate from the sheep
Reap what I sew, raise the dough like yeast, live like a beast
Beat my chest, love myself knowing that I'm the best

I thought 2020 Vision was a very clever double entendre about having perfect eyesight and a clear vision for the year of 2020. Little did I know what was about to unfold thereafter that would completely derail the positive momentum.

2020
Vision

Going Viral - Let's Get Weird

V1

You know what's weird? How weird I get
Whether stone cold sober, or tipsy, or lit
Yeah, lit as f##\$%
Get the party jumpin', off the rails and bumpin'
Like I'm blowin' a wad of dough on blow or something

Drunk and high feeling, like I'm rising through the ceiling
Stealing the show, reeling in attention
Really get to quenching, my thirst for life
I burst the pipes, I'm worth the hype
I'm first, your type, I'm fresh, I'm ripe

My sight's set on getting really weird tonight
You know, take it to new heights seeing wacky kind of sites
With eyes wide shut, masquerade it up
Take the mask off without giving a f##\$%
I pass the buck, sass her up, her ass is up
I tell her back it up, 'til I'm standing at attention then erupt
A little corrupt behavior, like to taste and savor
From a boring life I'll save ya, like a godsend or a savior

Better weird than normal is my motto
Guidelines that I follow
If you with me, why don't you crack and pop the bottle

Chorus

Let's get weird, let's get weird, let's get weird, let's get weird, let's get weird
Let's get weird, let's get weird, let's get weird, let's get weird, let's get weird
Let's get weird, let's get weird, let's get weird, let's get weird, let's get weird
Let's get weird, let's get weird, let's get weird, let's get weird, let's get weird

V2

I'll try anything twice, any vice, anything that
might entice
Gamble life away with the roll of the dice
Risk taker, shaking all the haters
Making them spectators
Eat this up like its steak and potatoes
Yeah I'll say this, I want to be the greatest
At beating my own drum, to that I sing, I hum
On a streak, a run, at my peak,
At geeking out, seeking out
Adventure off the beaten path
Shit that makes me smile and laugh
I bathe, I bath, soak it in, rope you in
Like you just flashed a pass for the brand new
opening
Only judge judges, judgement free
Open up the doors to those with vulnerability and
authenticity
Yeah, open up the doors to those with vulnerability
and authenticity

*Saw this sign, loved it
and said it was totally
me. My girl bought it
for my birthday, and
the song was cranked
out in a day 😊*

Going Viral - Recession Proof

V1

Ain't that the truth, that I'm recession proof
Healthy with a roof over the head
Stacked up the cash to last a few years in the red
Hope to invest it wisely on the way down instead

Treaded lightly, got so much fight left in me
Ready for whatever, resourceful and I'm clever
Never give up, make my own luck
Pull my bootstraps up, never get stuck in the muck

Chuck up the deuces, they produce, please introduce us
Get a head like Medusa's, let the goddesses seduce us
Far from ruthless, just time to get up and do this
Effective, far from toothless, and not ice cold, but the coolest

Chorus

Recession proof, baby, recession proof
I make all those worries and those fears go poof
Recession proof, baby, recession proof
I make all those worries and those fears go poof

V2

Mental state in order, for this new world order
Penny for my thoughts, I should charge at least a quarter
Not a hoarder, minimalist thinking
Put the bottle down and I eased up on the drinking

Fighting weight, feeling great
Everyday, sunrise, sprinting out the gate
Skating circles round the haters
Private labels shop at Trader Joe's

Trade, invest like pros
Til I get those standing Os
I propose you check the framework, how I put in work
Mover and shaker, like a work the pole and twerk

Constant learner, paycheck earner
Churner as I grind it out
As I navigate the ideal route
Never give up, never pout
Direct, with no roundabout
Now you know what I'm about

V3

Plant the seeds to do good deeds
Avoid the evil and the greed
Working round the clock
So I can be the best in breed

Read the news, paid my dues
Ready for any opportunity I choose
Whose riding, choose sides, and
Better be the one you gonna confide in

No hiding, time to be bold
Decide we gonna shine
No time to pack up and fold

Golden opportunities await
Time to be great, no time to debate
Toughest of these times
gonna determine the fate

Make the call, raise the bar
Let 'em know who we are
Let 'em know you're a star
Shining bright, mind is right
Game is tight, no bark, all bite
Never gonna go down without a fight

*Wrote this song to establish
a positive mindset and be
ready for emerging
opportunities in the midst
of the Coronavirus storm*

Going Viral - Quarantine Queen

V1

When we were facing a war time scene
She was my quarantine queen
I mean like every day stuck in the house looking mean
More like every day stuck in the house look at me

When social media scrolls were taking their toll
On her mental state, that's when she checks in
Looking my direction, needing some attention
Physical touch, interaction, affection

That's when I show another meaning of the apex
Gone with the latex, no more safe sex
Cuz I know she not fucking around
Got her on lockdown, isolating measures
Quarantine queen, getting nothing but the treasures
Put in that quality time to make her mine

Chorus

She was my quarantine queen
She was my quarantine queen

V2

Back and forth binge watch the Netflix
Then it's back to the news for the stats and metrics
Walk around the block, anything to knock a couple
minutes off the clock

Instead of going out we sitting tight for date night
She likes to order from those 5-star restaurants
Even though they bake in extra charges for the ambiance
While I'm fine with that takeout place on Ponce

White glove treatment with the uber eats man
Take it upstairs to my queen, we feasting
Light a candle, grab a handle of the booze
Shots for the drinks now they coming in twos

Eat in front of the screen, can't miss a scene
Tiger King binge sitting next to my queen
Exotic Joe, call Carol if she try to go
Spread the sardine oil from the head to toe

V3

Every day started wearing slippers and sweats
More or less, not looking her best
Don't think of her less with no dress or make-up
But most jokes led to a fight, then a make-up

She take up new hobbies, bake up desserts
Eat it all probably, tummy it hurts
Invasion of privacy, peeks and she lurks
Knows about all of my pet peeves and quirks

Both working from home, mid-day twerks and
moans
React to co-worker alerts and she groans
Virtual workouts for muscle and tone
Edibles calming the nerves, and she's stoned

Now watching the clock like battery ran out of power
The minutes be moving like hours
Mood fluctuates, attitude yes it sours
Stuck in this moment with you, yes it's ours
King and his quarantine queen, yes, 2 powers

Yes, king and his quarantine queen, we 2 powers

*This was also a Corona-
inspired song about getting
worn down by the girl you
had chosen as your
isolation partner in crime.*

Going Viral - Growth

V1

I got a long life to live, I try to stay positive
High five the kids, even if they mis behave
high tide it is, man, I'm riding every wave
Touching every life 'til I'm lying in my grave

Yeah, save the drama for your mama
No time to hate, meditate, like the Dalí lama
Karma stacking, packing love in every package
If you savage, you hustling backwards

I Gravitate to the nerds
Keeping to myself painting pictures with my words
In other words, dropping dope shit and turds
Like a flock a pigeons, knocking organized religion
Got a brighter vision, guiding every move, decision

Yeah, no sitting back and wishing, less talk, more listen
That's how I constantly get smarter
Read books like the art of war
Thirst for knowledge, wanting more

Self-help, constantly get better
Any way to outlast the competitor
I wanna be the head of a revolution
Booting up my straps
Looting with my raps

Life, roll the dice, like I'm rolling craps
Rake in chips and change
Risk take, make some real change
Time to change the game

V2

Grow out the shoes you could never step in to begin with
Who you talking bout, I plead the fifth
That life you talk about, a lie, a myth
Listen, I think through every decision
2020, with the vision, everything you could envision
Watch me like you watch the television
Borderlining with the sinning, guess that depends
Based on the lens you looking through
You a judge, in other words you hold a grudge, or
You praying on my downfall
But I always bounce back like a round ball
Til I'm high above the law, still, I embrace every flaw
And when I fall always jump back two steps ahead
Get the lead out the feet, accept defeat, never man
Organize a better plan, stand strong, fix mistakes
Everything high stakes, til I'm dead and gone

Chorus

Yeah, I keep showing that I growing
Yes, I do
I keep showing that I keep growing, yooo
Yeah, I keep showing that I growing
Yes, I do
I keep showing that I keep growing
Yeah, I keep showing that I growing
Yes, I do
I keep showing that I keep growing, yooo
Yeah, I keep showing that I growing
Yes, I do
I keep showing that I keep growing

*Inspired by a happy Mac
Miller type of beat to write this
positive song about my constant
journey of growth and becoming
a better person.*

Going Viral - Guardian Angel

V1

Words can't explain all the love I got for you
Birds and the planes cannot get a higher view
Taking higher roads, always teaching me a lesson
Watching over me like an angel from the heavens

Giving me your blessing, like a preacher or a reverend
Blowing on my dice and I'm getting lucky 7's
Ain't no better pair, love we got is rare
The hand you've been dealt in life, I'm well aware, is unfair

It's so insane the way you can cover up the pain
And listen to the others complain about the petty shit
Anyone putting on your shoes would have already quit
Long time ago, and they don't even know

What the hell a struggle is
For that worship every hug and kiss
Every second gone I'll miss
I'll go to bat for you and I swear that I will never miss
Anything that matters to you, moves to top of list

Chorus

Life, I am celebrating
Life, I am partying
I've been sent down a guardian
Yeah, life, I am celebrating
Life, I am partying
I've been sent down a guardian from heaven

I got a guardian angel watching every step, move that I
make
No doubt, no debate
I got a guardian angel watching every step, move that I
make
Make me good, make me great

*I cried several times while making this song about my
newlywed I married during Covid, as I've never seen
anyone in my life touch so many lives while dealing
with the most challenging of circumstances beneath the
surface. Every day above ground is precious.*

V2

Yeah, let me tell you about this girl, man, she's so amazing
I love watching her work the room
She takes the time out to help everyone with their problems
And she still has time to be my guardian angel

Best believe she wears her heart on her sleeve
Blessed to be a part of her team
Don't pinch me if it's only a dream
A day without her would be a nightmare

A scare because she carries me, helps me reach potential
Every test, she's my #2 pencil
And she's sharper than ever
Yeah, she's smart and she's clever

By any bar or measure, give up on her, never
In it forever, I ain't a fair weather
Birds of a feather, flocking together
Used to be rocking to the beat of my own drum
Quickly picked up, and now she sings to it and hums
Numero uno of the duo now where you go

Deuces to the rest, all the rumors put to rest
I do concede, confess, in my life journey and quest
A special place in chest, reserving for the best
Giving you my all, nothing more, and nothing less

V3

kept it surface, no one could disrupt or hurt this
Chasing cheap thrills, she helped me build my purpose
Selfless with the help, selfless with the service
How do I rate, yeah, how do I deserve this

When she awakes and she's coming down the stairs
The way she smiles at me, the way she stares
I still get the butterflies, fall deeper in love
Been distant from the church, but still praise the lord above

Feel like a prince, crying with the doves
Roll with the punches, when the pushing comes to shove
Worth all the sacrifices built to handle any crisis
Constant slap in face to understand how precious life is

Her company is priceless, along with her advices
She weeds me off my vices, compliments the nicest
Like yes I really like this, your rhyming is the tightest
Number one fan of my one man band

Supporting all my work appreciating all my quirks
Bragging to her friends that I'm a perfect 10
Building up my confidence, building up my character
A beautiful companionship and life I get to share with her

Going Viral - Hard To Get

V1

Catch me at the top, man, cream of the crop
Check out my complexion, I'm simply complex, son
Hard to get, catch me on the next level
Flowing around to the bass and the treble
Yeah, little rebel, blazing my path
Mastering the Data Science with the coding and math
Life, soak it in, like I'm taking a bath
Yeah, I break out the bubbles, and I play out of bounds
Stay out of trouble, man, scentless to the hounds
Scent this around, nothing but blessings and pounds
Sense in the mind, yeah, dollars in the pockets
Bout to take off like a rocket
Approaching Spacely Sprockets, I'm hanging out with Jetson
Gassing up the jet, son, then we pass the set sun
Didn't plan it, this trip around the planets
Landed on Mars, yeah, we hanging with the stars
Perpendicular path to a parallel universe
Have you ever been in two places at the same time?
Heaven on earth, every time I spit a rhyme

V2

Poetry legit, if you don't pay attention, it is pretty hard to get
Spit fire, get it lit, litter than the rest, what sits on kitty litter
Competition garbage, man, they picking up the litter
When I spit out comes the fairy dust and glitter
Outcome for challengers, very bummed and bitter
Catching feels from your girl, you better come and get her
They fetching me in heels, but I'm taking off in wheels
Skating by all their guys, superhero, no disguise
Take me the friendly skies, above the rest again I rise
Like I said, hard to get, dual entendre in itself
Figuring me out, keeping up, trying to catch me
Use the right side of brain, plus I'm a lefty
More like ambidextrous, oh he's just the sexiest
Jetpacks are required for the next quest on the list
Light years ahead, says the time piece on my wrist
But I don't watch it, cuz I'm timeless, lost in time
Only get one shot, quench my thirst, chase the lime
Stuck in the moment, but still steady on the grind
Leaving you behind to see what I can find

*This song was inspired by
a series of psychedelic
journeys I navigated
through with my best friend
and a few business school
friends, of which brought
us all much closer together.*

V3

Juke-er back in high school, broke away from tackles
Escaped like David Blaine when he's locked up in those shackles
Stadiums, I packed those, excuses, yeah, I lacked those
Juked bros out their shoes and clothes
Weaved through teams' best like a pro
In and out like seamstress sew
Was a clepto, on the low
Bases, hearts,, yeah, both I stole
And I also stole the show
Racked up ribbons from the races
Fact check claims are far from baseless
Same old story, still they chase us
We disappear quicker like the shots off of the liquor
Chasers they just bicker, pale faces, get sicker
They fail, hale to victor
Scales, we off the richter
Rails, we off them quicker
Tales we tell are richer
Content with the content
Spent on different continents
Spreading love and compliments
Like they are some condiments
Mic drop on some dominance
No stops 'til we prominent
Stone statues and monuments

Chorus

So hard to get
Where's he at, what's he doing
Did he just take-off, I think that he just flew in
What is his channel, man, I wanna tune in
I wanna see closer, damn, I wanna zoom in

Party starter and the closer, man he gets it booming
Up, up, away, the jet pack it is fuming
Flying higher, he on fire, superhero in attire
Man, they just admire, the way he does not tire

Going Viral - The Right Spot

V1

You know I'm back like I never left
And you never front cuz I get it right
Yeah, back, front, left, right
Compass turning dark to light

Find the middle, nibble, bite
Game on point, game so tight
Winner, win her over
Ain't no luck or 4 leaf clover

Steal her heart, turnover
When I turn her over
Taking back shots, while the others want their shot back
Give that ass a smack, when I score hear the claps

Hahaa pay attention to the metaphors
Ain't no competitors
When behind closed doors

V2

Spot on with your assessment
Hell of an asset that ass is I meant
Shake it like it pays the rent
Make 'em pitch a tent thinking it would be money
that was well spent

Want you to match my energy
Ass you should lend to me, surrender to me
Your friend, sure, send her to me
Hand her the keys, so my hand's free
Get touchy feely as the 3 of us flee

Freedom to give it up for the 3 some
Give her a nudge, either way won't judge
Appetite for destruction
Art of seduction, mastered
Like a degree plastered on the wall

Take you to class, nerd it out
Turn you out, give you my all
Blowing your mind with every line
Like you cut a straw hitting a ball of that raw
And now you're high and feeling fine

V3

Hell-bound feeling got you sweating out the linen
Plus you feeling naughty, devil lurking cuz the sinning
But I'm fitting to get in, this only the beginning
No more sitting, I'm the shit man, time to celebrate the
winning

Hit the right spot over and over
Shot caller like I'm Ruth with the homer
Give her some pointers, with the pointer finger
She hit the high notes like a performer or a singer

Ringer, make her wanna linger around
Only eye rolls I get when I go downtown
And they slowly roll to the back of the head
I put out the fire, then I put her to bed

Chorus

When I get you hot I know I got the right spot
When I get you hot I know I got the right spot
When I get you hot I know I got the right spot
When I get you hot I know I got the right spot

*Just having fun with it and making another playful,
naughty party song to balance out the collection :)*

Going Viral - Death Of A Dollar

V1

Death of the dollar, soon to be living in the squalor
Currently, turbulence you see,
In the reserve currency

But I'm well prepared, nothing gonna be hurting me
Certainly, gonna see many break, many bust
Those who lust, blindly read that line in god we trust
Yeah, print a billion here, print a trillion there
Remember when it used to be cool to be a millionaire?

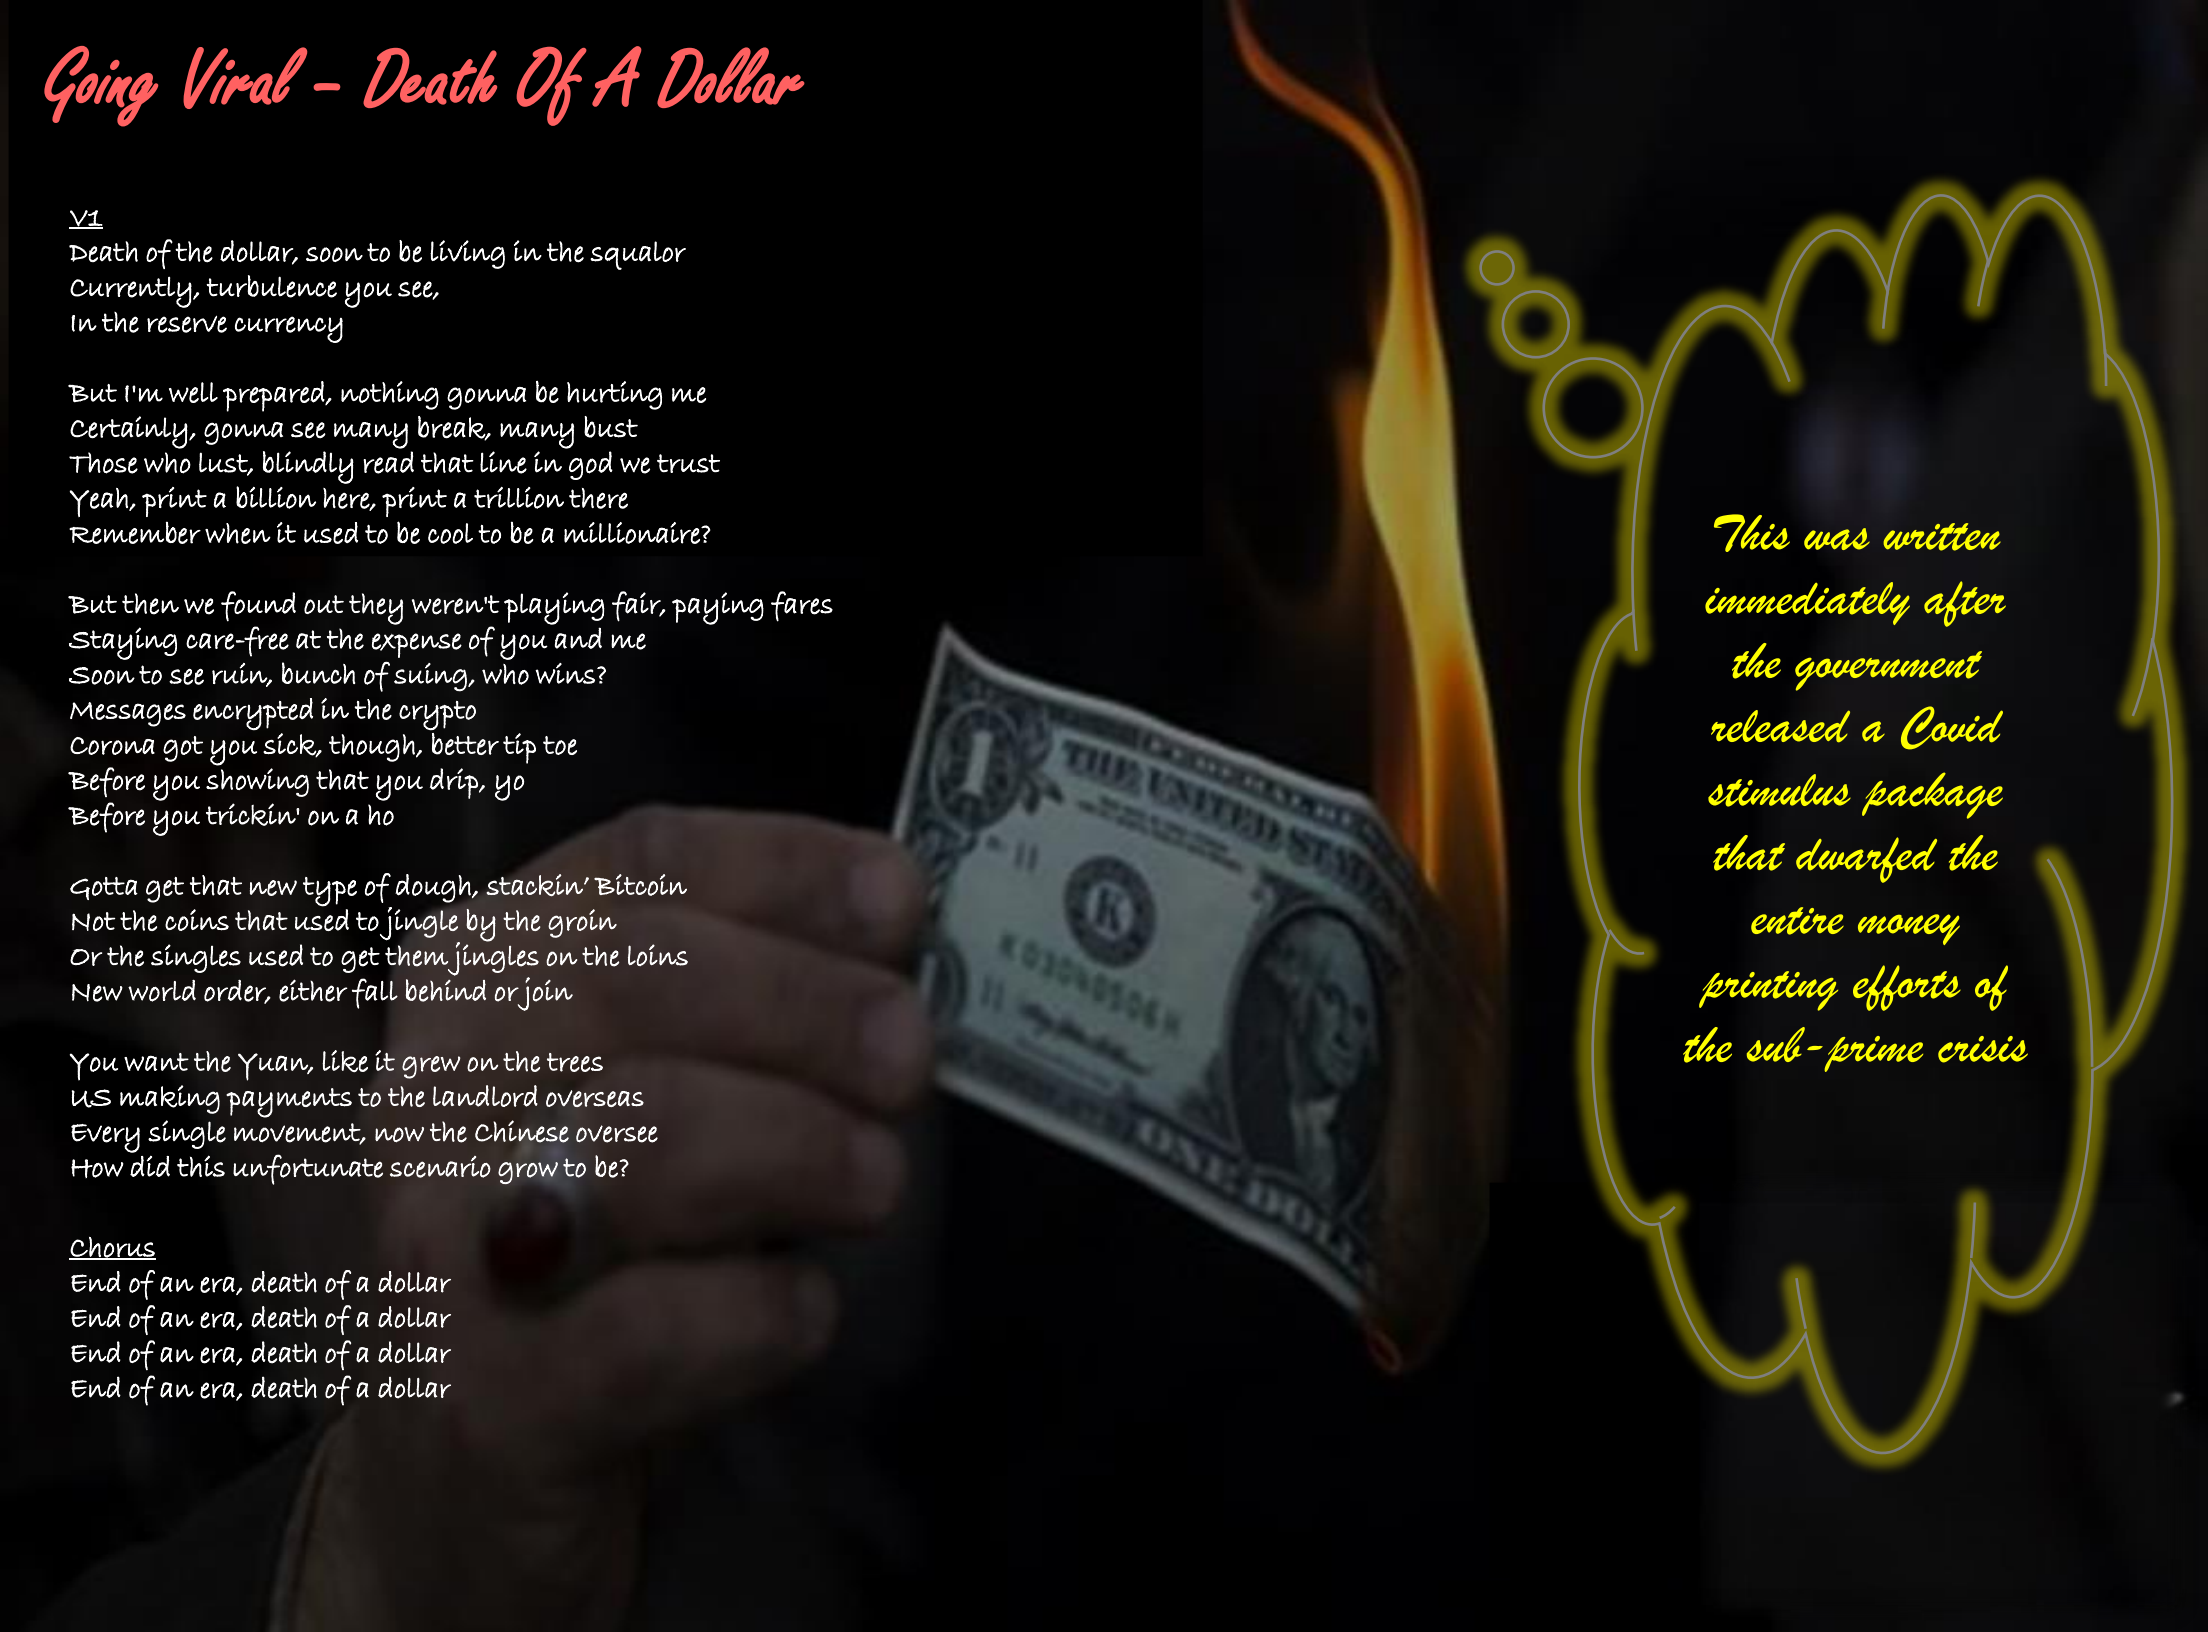

But then we found out they weren't playing fair, paying fares
Staying care-free at the expense of you and me
Soon to see ruin, bunch of suing, who wins?
Messages encrypted in the crypto
Corona got you sick, though, better tip toe
Before you showing that you drip, yo
Before you trickin' on a ho

Gotta get that new type of dough, stackin' Bitcoin
Not the coins that used to jingle by the groin
Or the singles used to get them jingles on the loins
New world order, either fall behind or join

You want the Yuan, like it grew on the trees
US making payments to the landlord overseas
Every single movement, now the Chinese oversee
How did this unfortunate scenario grow to be?

Chorus

End of an era, death of a dollar
End of an era, death of a dollar
End of an era, death of a dollar
End of an era, death of a dollar

*This was written
immediately after
the government
released a Covid
stimulus package
that dwarfed the
entire money
printing efforts of
the sub-prime crisis*

Going Viral - Pay Me In Crypto

V1

Yo, Bitcoin, last year, four bagger
Your investments fall behind, yeah they lag, sir
Check out my swagger, sharper than a dagger
Rags to riches, scratching the itches

No need for pitches, I'm already in
Allocate the net worth been saving since birth
Sky's the limit, we taking off from Earth
Wallet's getting fat and I'm measuring the girth

You hustling backwards for links on the chain
But I got Chainlink stuck on the brain
Proof of stake, make no mistake
Rake in the profit, hustle hard don't knock it

Storage cold, usb drive in the pocket
Private with the key, I protect it and lock it
Buckle up, we bout to take off like a rocket
Pulled the trigger, locked and it's loaded, I cocked it

What you know about oracles and nodes
Bringing boat loads of data onto the chain
Putting up the stake, and I'm making it rain
Stacking up my wealth and I'm counting my gains

First mover, watch me maneuver
No, I'm not a talker, yes, I am a doer
Let me break it down, and I'll take you on a tour
Dodging all the naysayers, haters and the boo-ers

Find me underground, with the streets and the sewers
Cold storage maintenance, yeah, I need me some coolers
Advise you take the bait that's hanging from my lures
If you wanna be a shaker, and you wanna be a mover

V2

Nas had ya'll gassed up with Ether
But I'm watching the gas prices go up on Ether
Vitalik preaching to ride the layer beneath her
Along with the long awaited 2.0 teaser

If you never hear of him, we're talking founder of Ethereum
Network, is your net worth
Might want to tune to the experts
Set text alerts for the best podcasts and the shows

Pompliano, he's the Don, yo
Show you how to connect the Polka Dots to Cardanos
Preston Pysh, also on the list
And Raul Paul, standing tall, they all ball

Bringing in the whales like Michael Saylor
With you, I want to set sail, sir
Micro Strategy, yet Macro thinker
Head lights like a blinker, keeps hitting all the right turns

Bugging gold lovers, Peter, when will you learn
These fossils, losing apostles
And we steady drip like a leak out the nozzle
As they steady trip, time to throw in the towel

Chorus

Yo, pay me in crypto
Yo, pay me in crypto
Yo, pay me in crypto
Yo, pay me in crypto

*I became extremely
passionate about
cryptocurrency
immediately after the
government reignited its
money printing efforts.
#40DL*

Going Viral - Overthrow The Regime (Remix)

V1

Rats, snakes, out the holes

Those lame motherf%ers who have lost their souls

Pigs rolling around in shit too long

Bout time we force their hand and right their wrongs

Band together, severe ties, with those who refuse to up-rise

Expose the truth from those who've been supplying the steady

head fakes and lies

The f% is this with the slapped wrist for white collar crime?

Can make one snap, flip, the like the kids at Columbine

Don't try to judge me, I'm doing fine

Don't try to touch me if I grip the 9

Never shot a gun, but the finger's getting itchy

Known to solve problems in a sitchy

Sound sirens, rise up to the tyrants, getting busy

Chorus

Yo man, the clock is ticking

No more politician'

We gotta get em out

We gotta get em out

Undertow of the stream we building steam

Otherthrow the regime by any means

This was a remix to the original from my first album, of which I also re-mastered for this album. It was inspired by the Black Lives Matter protests and riots, as we entered a period of lawlessness and backlash against repeated police abuses of power caught on video.

Pop That WAP

Chorus

Pop that wap, pop pop pop,
we pop that wap
Yeah, we pop that wap
With that hard ass dick
Wish you had it
Had it up to here
Yeah, wish you had it,
Had it up to here
Wish you had that hard ass dick

V1

Wish you had it, hard ass dick, pre cum dribble on your pallet
Nibble on that nipple, never played second fiddle
Said I wasn't little - Get it lit, yo,
step in the scene I never no tip toe
Admiring my drip, yo, pop that WAP, the way it drip, hoe
Bed sheets lookin like a shit show
Shit hoes making shit jokes
leaky like a faucet, like the way I beat and boss it
Tongue in that ass, been graduated, got no class
Here we go, here were we go again, lookin sloppy cum on your chin
Not chin like China, cum drippin vagina
Sure it may sound sloppy, maybe call the coppy's
Arrest this dick call all ya chicks tell them we getting naughty
Hard ass dick that they wanna suck
First, they wanna taste, then they wanna fuck

POP THAT

WAP

V2

Two pink, one stink, before she even blink
Fuck what you think, I take it to the brink
Drinks, rum in, balls, humming
bitch on the verge of cumming
Yeah I'm really something
Showtime, me and boy, me and my man
Better than any toy
anything you can do with those fingers on that hand
I finger pop, I see you handy
way you give a handy, and I see I got you dripping out your panties
I back up in your fanny, all I hear is ram me
make your butt cheeks jiggle, bounce, and get 'em clammy
Put on show, grammy worthy, damn she worked me
Hard ass dick, turned her on like a porno flick

V3

From flaccid to flexin, fast to erection
He his own man and don't need no direction
Stand at attention, ready for duty
Yeah, any old mission, empty load through front door, booty
Night crawl through doodie, taking the shit, hit after hit like he Rudy
It's like pop the weasel
Stroke that paint brush on that easel
Shit I pop that wap, with ease though
Tag team duo, far as we go

Thought it would be fun to try to "out-raunchy" these ladies with a man's perspective of the song. Since this song was #1 and what American Pop Culture wants, it made sense to see if we could get this to go viral 😊

Max Flaccid

MAX FLACCID

V1

Up, up, away, no need for Clark Kent glasses
Wen Max Flaccid get hard and he get up in their asses
Don't try to sass, miss, you cannot outlast this
Call in super powers, I can go for hours
Max flaccid like a shoe horn
Porn set fluffer, stocking stuffer
From hangin to banging, lamping to licking
And sticking my dick in
El pollo es loco, the rest of you chicken

Max Flaccid coming through the hood
All good full of love and a big fucking wood
Whatcha know about the flaccid
Ninja dick kicking ass have your girl doing backflips
Fat lips swollen from the fat dick
You don't know cuz you're full of that whack shit
But don't let me go off
I'll do the Grey Goose, Titos or the Smirnoff
I'm nasty but a little bit classy
A bit whacky now your girl wan attack me
Not sure if you get it like that get it like crack
Her energy breaking my back
You know what I really think it's funny
You got a little dick and a little bit of money
But not me, money grows on trees
And just like my dick now hanging by my knees

Chorus

Max Flaccid, time to get hard
Max Flaccid, time to get hard
Max Flaccid, time to get hard
Max Flaccid, baby, oh my gawd

V3

When dick trippin', like on a tab a acid
I'm hard on it,
Yeah, I beat it to death
Almost put it to rest
But Max the respirator
Pumping up my dick
Got my click rooting hard
Til they like oh my mother fucking gawd
No longer on guard standing at attention
From the intervention
Maxie, I must mention
I owe you salary, bonus, and a pension

Staying on the naughty side, this song was inspired by joking with my girl about pretty much not wanting to ever have a shrinkage moment like George from Seinfeld. This was also the first time I was able to get my best friend in the studio, of which ended up being a great bonding experience and new way to try to better market music...get your friends on the track haha.

Line It Up

V1

I'm calling the shots, 8-ball in the pocket
We bout to take off like a rocket
Higher we go, the dough, we blew it
Your turn now, bro, there's nothing to it
Flowing around, cheers to beers, throw in some rounds
Feeling like kings, seat us in thrones, hand us our crowns
Bounce like we round, to the next spot
Balance our cocaine intake with the pot
Shit don't stop, we take a pit stop
Plop a little out the baggie (chop chop chop)
You can go first, just do not nag me
Energy lag, she needed it badly
Contribute to next round, maybe? gladly

V2

This this this this this this beat so cold you could just skate on it, man
Polar bear, fur coat, it's that play-a shit, man
Jasper Springs, Muffy, beat like a codeine trip
But we ain't purple drankin, the champagne, clinking,
This shit got me thinking, I might move, Medellín
Beautiful donnas with plastic behind-as, let's do this again man manana, manana
Our future looks bright, man, no looking behind ya

V3

Roll up the dollar bills, cut up the straw
Clean up the residue, getting it all
Hasn't been tampered with, pure and it's raw
We plan to ball till we fall (Ballin!)
We get the shit bumpin like keys to the nose
Lick off of tits and of rumps on those ladies
What you expect we are babies from 80s
When we speak of ki's, they not to Mercedes

Chorus

Yo, we getting out of line, we getting out the lines
You better get in line, before you fall behind
We getting out of line, we getting out the lines
You better get in line, before you fall behind
We getting out of line, we getting out the lines
You better get in line, before you fall behind
We getting out the lines, you better get in line
Ahhh f#\$%

V4

Blow up the nose like I'm sick with a fever, catching a high like a pro bowl receiver
Traces left behind, I call that a leaver, best believer, I wet the finger
Coming full circle after letting it linger, got this on lock you can call me a ringer
Oh she party, too, you should probably bring her, eye candy complements the nose candy
Feeling randy, dandy like a lion, probably time to get another line in

You know just what we talkin bout, man, Pablo shit from the south
boog-er sugar that your girl be hittin, she a lil kitten that got me so smitten
Meow meow wow wow, hit-the fresh- pow pow
While we are a skiing we're charged human be-ings,
Talk a lot, walk a lot, take a crap, do some more,
Drink fo forever with me and my crew'n
You know what we doing, man, pass me that spoo-an

*This song was inspired by large group guy trip
planned for Colombia, of which ended up being
derailed due to Covid curfews still being in tact.
The goal was to build this song up as a cult classic
for those who dabble in recreational activities*

Swan Diving

Swan dive into thin liquidity
Smooth out all the volatility
Autopilot, way we be flying
Swan diving, soon we'll be thriving

You wanna get in our pool we be swimming
Set the rules so we all be winning
We hot now, increased degrees in Daoism
How is them...finding new religion
Fine with smidgens, steady racking millions
Smart trades...stacked team with ballers
Hedging bets, now we can beat the best
Nothing like making a bunch of money while we rest
Back testing...learning the machines
Now we in rhythm with the algorithm
Ain't it clever the way we de-lever
Rounds of beries, toast to swans in beries
For winning trades on If not most, than every
The smart money, making dumb money
Like really silly, 'til we hit a Billi
Don't you feel me, honey

I was asked to make a song to promote my buddy Jelly's startup "Swan DAO", of which was used for their podcast and other promotional events. They used it as their alarm clock everyday, and in DAO fashion, they actually even gave me a small equity stake for my contribution!

Better Than My Idols

I decided to make this album because I felt like I've proven myself as one of the best lyricists, yet no one was paying attention or taking me seriously. I decided to deliver a bold statement and shock value so that people would be forced to check it out at a minimum for their amusement. I also informed others that my music has become my daily mantra to work towards the ultimate level of confidence and self assurance, and as a reminder to never worship another human and put them on a pedestal.

Jasper
Springs

Better Than My Idols - Intro - King Me

Yo man, this guy done lost his mind
That's right, he said it's way out ahead!
Better than his idols? You gotta be kidding me
Dropping more dope shit than a junkie on a shitter?
Ha ha, you need to quit, sir
That's right, dude's over the hill on some fountain of youth shit
Well, then again, ain't some of his idols still dropping new music?
Yeah, but they got a track record and a platform, man
He trying to defy the odds and social norms
Yeah man, thinking he still on his way up
Like he didn't peak and hit his climax yet
...I beg you to keep hating

The goal here was to set the tone with a back and forth conversation debating whether I can come from a yet-to-be-established platform to defy the odds and obtain "instant" recognition (actually a 6-year journey thus far). It was somewhat inspired by Biggie's "Gimme The Loot" concept with an attempt to play two different characters by using different vocal tones.

Lyrical, king me, yeah, give me the title
Doing it better than each of my idols
Passion pumping from heart through the vitals
Passing the bar when I start the recitals
Autopilot, fly, lit
Yeah man it stinks, yeah, I know I'm the shit
Check the credentials, the stamp of approval
Every line that I say, yeah, should move you
Maybe they market it smarter to get to the cheddar
But my shit better, every line, word, letter
Mind right, ahead with the goals
Left you exposed, juking the pros
I above those in the knows
Who think they can pick out the winner
Blink, and I eat them for dinner
Digest the best who have tried to test
That heart in my chest pump faster
Bait them, master the chess board
Checkmate, capture their queen
Ruptured their spleen
Trying to catch up, drought, no tomatoes
Drop more fertilizer if you say so
Means I'm the shit, beyond just legit
Catching the vibe like a mitt
Feeling myself just a bit, I admit
Law of attraction, attracting my tribe
Earning my stripes, no handouts or bribes
No quitting 'til fans tout the scribes
And I'm touching those lives
Best rapper, dead, or alive

My favorite double entendre (eye above those in the nose) on the album. I also try to continue along that route with suggesting those in the nose "think they can pick out the winner."

Better Than My Idols - Overstand It

Chorus

Don't underestimate the way we overstand it
End up stranded, while we off to another planet
Don't underestimate the way we overstand it
End up stranded, while we off to another planet

V2

Hey baby, it's the muffin
It's time to sit back, buckle up, and
As we take you on a journey
Can you come yes, yes, pay attention, please
When we blast off, on some acid
Neuroplastic, verbal ass kick
Cuz my flow is elastic
I bend and break shit when I park on the beat
The shit get Jurassic
Magic Miiike
Aka Muffy, aka hey why your girl wanna touch me
Everybody know that I spit so lovely
When I'm sipping bubbly
Molly make her touchy touchy

V1

Don't underestimate the way we overstand it
End up stranded, while we off to another planet
Bandits, we be stealing their hearts
Groupies, like a band gets
Stalker fans like Stan gets
Or got, almost forgot
Thinking back when Eminem had the top spot
Now we hobby rapping, lapping competition
Mastered from the years we used to listen

V3

Timeless, light is lime, miss, we the finest
We like timeless classics
Aging like fine wines, game just rewinds
Turning back the clocks
Dabble on some rocks for a little boost
Feeling good, swimming in the fountain of youth
While the rest of y'all be long in the tooth
Yeah, the proof's in the pudding
Doing things that you wouldn't
Doing things that you shouldn't
1st mover, try it twice
Break it down, give advice
Package up, give a price
Priceless, how we teach the blind mice
How to visualize a life that is twice as nice

V4

No one is above me
Verbal flex, never break on a bender
Please return to sender
The host with the most
Yeah, it's Mikey Macro-dose
My flow like butter right on your breakfast toast
Never settle, never coast
Commandeering ships
To the people sitting on the sidelines
Hit you with the fly rhymes
Then it, then it, then, then it
Then it's muff taking over, over
When I hit the psychedelics
When I start taking over
Overstanding
Got you on another planet
We got plans to get
Into some interplanetary shit
Who gives a fuck about landing?

This song was inspired by a "trip" to Joshua Tree with my closest friends, of which "overstanding" was one of many thought-provoking gems that came to mind while solving the purpose of life.

Better Than My Idols - Better Than You

V1

I'm so fucking exhausted, try walking in my shoes
Watch me go off, I wore the soles off
The rest of ya'll be so soft
By now I must of sold ya, on how I am a soldier
Yeah, my soul said you gotta be seeing in hearing this
It's having out of body experiences
But I said you better get back inside the carcass
Reinflate the spirit, I know you hear it, fear it, never
Sever ties with simple-minded
Sheep be looking with the blind eyes
Also with the devils in disguise
I'm with my best bros, highs trump the lows
More friends than foes
Money hoes and clothes was the motto
But now you can follow me dropping crypto, at the nude resorts
Of course, you can try to judge me up in the courts
If you think you God-like, but you know that I'm God up on the mic
I'm so fucking exhausted, try walking in my shoes
Watch me go off...

Chorus

I'm so sick of watching me doing it better than you
I'm so sick of watching me doing it better than you
I'm so sick of watching me doing it better than you
I'm so sick of watching me doing it better than you

V2

I'm out of sight the way I be writing
Flow away like a disappearing kite, and
Enlightened, fly high, while unflappable
All while attacking the goals
And running with some beautiful souls
Yeah, anything goes in this new world order
Of which I already outgrew, or I grew bored of
Sorta like I'm ready for the casket
That's it, I'll bask in it
When I go, sneak a flask in it
So I can pour out a bit of liquor
Knowing I did it different, did it better, did it sicker
Kept it lit like the flame off of the wicker
Did not blame or bicker when I was not the victor
Yeah, true definition of how a champion handles his business
Record book shit, so I just crack open the Guinness
Cheers to this life shit, with God as my witness
Telling me over and over how I stack up, I win this

In true hip hop fashion, when deciding to move forward with the theme of this project, the goal was to come up with the most braggadocious songs to at least make the hip hop community give it a peek for presenting such bold and outlandish comments. My favorite line in this song is stating that I'll pour out some liquor for myself when I kick the bucket...

Better Than My Idols - Out-Ridiculous

V2

Yeah, show you how to wake up early, never tardy
Closets stacked with wacky costumes for theme parties
Provocatively placed collection of Barbies
Wearing a vegan shirt when you pulling up to Arby's

Chorus

So ridiculous, the way we out-ridiculous
So ridiculous, the way we out-ridiculous
So ridiculous, the way we out-ridiculous
So ridiculous, the way we out-ridiculous

Strip club with the homies, now that is out-ridiculous
Sex you up, you barely know me, now that is out-ridiculous
Then I tell you that you owe me, now that is out-ridiculous
Oh yeah, that is so me, now that is out-ridiculous

Like when I'm rapping at 40, now that is out-ridiculous
'Cuz my peer group bores me, now that is out-ridiculous
I put my homey on the mix, now that is out-ridiculous
Yeah, we do this shit for kicks, now that is out-ridiculous

V1

When you believe you cannot miss, now that is out-ridiculous
With your idols, shit on, diss, now that is out-ridiculous
Put yourself atop of list, now that is out-ridiculous
Back it up with iron fist, now that is out-ridiculous

V4
Yo, I've been doing this for years
Over sidecars with beers
With like-minded peers
Cheers like I'm Danson
I know I'm the man, son
Killing them like Manson
Retreat to my mansion
In the metaverse
'Cuz I done out-ridiculoused
Everything here on earth

Sex with ex 'cuz she miss this, now that is out-ridiculous
Yeah, bring a wife around a mistress, now that is out-ridiculous
Or in the lifestyle sharing Misses, now that is out-ridiculous
Yeah, sharing hugs and sharing kisses, now that is out-ridiculous

V3

You know, like on a wrist, you spend a milli
On a Richard Mille
Now that's dumb money, stupid, really silly
Yeah, like a tech bro, thinking he can buy into the inner circle
Ballin' like there's family ties, but can't escape the urkle
Oh, did I do that?
The chit chat is not pitter patter
Metaphors are dooper, radder

Outro
Yeah, Kanye at the Grammy's, now that is out-ridiculous
Under table giving handys, now that is out-ridiculous
When you hiding 2nd families, now that is out-ridiculous
Met gala in your jammies, now that is out-ridiculous
Yeah, ape mode on a JPEG, now that is out-ridiculous
Yeah, we seeing that you NFTing, now that is out-ridiculous

Boarding cocaine on the plane, now that is out-ridiculous
Psychedelics on the brain, now that is out-ridiculous
'Til you borderline insane, now that is out-ridiculous
Play out of bounds and out of lane, now that is out-ridiculous

We treat the weekday like a weekend
Almost sick of thrill seeking
Take another while we peaking
They drip, but we are leaking
The shit, and we are reeking

Yeah, I spit the facts, bro, and they are kind of radical
Micros to a macro, and then the balls and cacks grow
Yeah, we test the limits, giants amongst midgets
Un-flap as others fidget
In our never-ending quest to out-ridiculous

You micro-dosing on the jobbie, now that is out-ridiculous
Like it's your new favorite hobby, now that is out-ridiculous
Hit the gas like Rickie Bobbie, now that is out-ridiculous
Fast life, now you tripping out the lobby, now that is out-ridiculous

The repetition idea for this song stems from Black Rob's "Whoa", whereby he repeats the word "whoa" after each bar in the song.

Better Than My Idols - Interlude - King of my Universe

King of my universe, putting me first
Visualizing, confidence rising
Shining, like the sun on horizon
Lights, camera, action, get off your ass
Auditions will pass for my supporting cast
Star in me, pardon me
But lately I feel I can part the sea
God-like powers, give him his flowers
Over he towers, the weak and the cowards
Yo, you heard of the sheep that he sheppards?
They easy to spot out like leopards
The record books re-written
On your heroes, I am shitting
Lion, you kitten?
You striving to fit it, I'm thriving and living
Survival of fitting, I learned this from Darwin
Every spar, win
I'm spitting these bars and I am an arson
Yeah, a fire breathing dragon
And I am not bragging
Spitting the facts
Cracking life codes
Developing skills
Agility master
Execute faster
My scriptures will be preached by the pastors
In my own universe I am a master

End of life, no longer fearing this
I learned this from out of the body experiences
I'm a taking a chancer, searching for answers
No longer believe in a chosen one
I'm doing more down here than God's only son
Yes, I'll put that on the table, 'cuz he was a fable
I guess we can label it blasphemy
I've done everything that he asked of me
And that has been taxing, see
I'm seeing them suffer, cannot find the lessons
Really good souls, bypassed with blessings
While narcissists rack up the sins, life game of chess wins
Done taking to chin, now take into hands
No time for blind faith or these so-called God's plans
Mindset is now I am the man
Attracting disciples and fans
You can love it or hate it
But life got me jaded
Thought through and replayed it
Became elevated
So fuck it, I made it,
That's how I'll play it
Let's go get faded

My faith, already under question for the longest time, has become further tested after seeing how beautiful of a soul my wife is, how much she struggles nightly to stay alive with her medical issues, and how her narcissist ex continues to be blessed with good fortune while putting additional pressure and stress on her.

This interlude uses the same beat that was used for the intro. The goal was to imitate Jay-Z's Volume III storytelling thematic format, whereby he had used the same beat for the intro, an interlude, and the outro.

Better Than My Idols - Cloud 10

V1

Now then, have you ever been to cloud 10
When I go again, I will call for you, send
Lend me your hand as I take you on a bender
Yeah, just surrender, I promise to be tender

Like I work the bar, but I only raise the bar
Really just taking you far far away
Show you how to wake up, how to start the day
Head up in the clouds, right up near the moon

Singing my praises, favorite tune
Rest be like let us in, got the right medicine
Make it look easy like they let us win
In the flow looking like a feather in the wind

Look down see 'em cloud ging
But the beat sounds off and they got the
wrong timing
up here we flowing, fireworks, explosions
Dove right in while the others dip their toes in

Chosen ones to show you how to have fun
Marathon shit, never-ending run
Cloud silver lining from the shining of the sun
And we only getting started and we never
getting done

For the chorus, I attempted a double entendre, stating that the feeling is so good that they should make it a crime. I then say please don't find me, but I pronounce "find" as "fine"

V2

Once upon a time we used to hit cloud 9
Celebrate success after steady on the grind
But then we took a step back, and lift the head up
Reinvent, with a new get up

Eating good, fed up with what 9 had to offer
Like the same old chick, it was time to get up off her
Feeling ourselves as if we were soft fur
Cooler than La FonZ, burrrr

So we set the sites on a new target 'cuz we all lit
And surrounded by a bunch of dead ducks
And been a while since we given any kind of fucks
As the mind game on some never ending luck

9 was getting cloudy, we was getting rowdy
Looked up and that's when it found me
Yo, get the jet packs, and we fly high away
Brand new playground, new hideaway

Chorus

Where have you been, up at cloud 10
We higher than 9 and we out of our minds
Feeling so good they should make it a crime
But I'm lost in time, please don't find me

Lost in time, please don't find me
Lost in time, yeah, please don't find me
Lost in time, please don't find me
Yeah lost in time, yeah, I dare you to find me

V3

Yeah, cloud 10, nothing but the dimes
And I'm catching all the signs
It's like I started reading minds
Oh yeah, and in between the lines

Cloud 10

Everything fall into place
Love language be the gifts
So I grace them with my presence
Deep conversation like campers intense
The others be blowing hot air through vents

Everything flowing, confidence growing
Double down on hitting new highs with the lows in
Skating round the haters 'cuz their faces be frozen
Trying to figure out how to nose in

What I'm describing are the ultimate feelings
Higher than the roofs and the ceilings
When you hit cloud 9 time and again
And then you finally get to cloud 10

We used to cloud 9, but now we cloud 10ing
Preaching like a reverend that its closer to heaven
We used to cloud 9, but now we cloud 10ing
Preaching like a reverend that its closer to heaven

Better Than My Idols - 1st Mover

Chorus

1st mover, watch me maneuver
No I'm not a talker, yes, I am a doer
1st mover, watch me maneuver
No I'm not a talker, yes, I am a doer
1st mover, watch me maneuver
No I'm not a talker, yes, I am a doer
1st mover, watch me maneuver
No I'm not a talker, yes, I am a doer

V1

I'm a doer, done more shit than you find in the sewer
Like a wine connoisseur
Taste it, savor it, got more flavor and I'm fit
Way overdue to be your favorite
Ayo, I behave a bit, and then I'm borderline sinning
Gotta push the limit to keep the winning streak alive
5oclock somewhere, non stop happy hour the way I devour life
Ayo, party starter, ignitor, marathon sprint, plus I pull the all-nighter
Trendsetter, only time I'm labeled a biter is in the bedroom
Yeah, give me space, give me legroom, always on the fly shit
Buzz creating, early they late, and yes, they be hating
At how I am the master at baiting
'Cuz when they think I'm soft, I beat them off

V2

1st mover, early adopter
Like I'm getting cues from a teleprompter
Getting tipped off, rest be off ripping
But I stay dripping like I'm dipping into acid
Handle the bars, yo, I never crash, kid
Pimp with the limp, while I keep it max flaccid
I'm like man, give me that, let me try it
Cannot skip on by it
New path, let me fly it, I will be the pilot
I lit, frequently fire, frequently admired
Brain wired like a guinea pig at Neuralink
Grab a cig or a drink, so you can ponder
Drill it in your head, that we light years beyond
We on some Elon, mother effin phenoms
Show you how to navigate the space
As I rock it over the beats and bass

V3

Change agent, never worry over danger
You stuck in park like a ranger
I'm peeling rubber in the range
Burning rubber with some strangers
So much strange its becoming familiar
Doing wild shit with friends and familia
Really a litmus test
We get it litter than the rest
Find the best kind of medicines
New hot spots, let us in
Party night, pool, cook
We tight, with new look
Re-write the rule book
Recite the cool hook
Almost sick of seeking out experience
Throw me a challenge, roadblock, interference
Some mush and some molly, psychology experiments
All Long gone, like we were here and went
Head game sick either way that you measure
Tester her with the knowledge or I let her get the pleasure
And I go deep when I'm searching for the treasure
Yeah, I go deep when I'm searching for the treasure

The 2nd half of verse 2 centers around Elon Musk, as I mention that my brain is wired like I'm already plugged into his company "Neuralink". I then mention "drilling it in your head" that we are light years beyond like Elon, and continue with navigating the "space" with double entendre "rock it" and "rocket" over the beats and bass ;)

Better Than My Idols - Peak State

V1

Dream catch, fetch, sink teeth into life
Dog, like Phife, on a quest with my tribe
Feeling that vibe, never felt more alive
Red line best way to describe my drive
Dive off the deep end
Treat any day like the weekend
Thrill seeking
Seeing that they peeking
To see how we peakin
Fuck dripping, we leaking
Oh what a bummer, call the plumber
I'm on that Aalyah shit
'Cuz age ain't nothing but a number

Chorus

Oh man, we peaking again
Oh man, we peaking again
Oh man, we peaking again
Oh man, we peaking again
Oh yeah, we rolling
Oh yeah, we cruise controlling
We hitting peak state
Skating round the haters
We hitting peak state
Mate we'll see you later

V2

Me and my bros, up we grow
Higher highs, higher lows
Fly by those, even when we just winging it
Next level shit we bringing it
My own praises, singing it
Every damn song a hit, no filler shit
Get the place lit with the fire that I spit
Admire my grit, no quit, no tire
Still rolling with the wheels off
We peel off, we hit the gas on E
And can't nobody outlast we
Weekday, we be out past 3
She say, we be about ass, please
Biproduct, we smash with ease
Access like we got skeleton keys
Live a life of excess, give away the best sex
Missed by all my exes
Oh man, the way they DM and they text us
We good, we better than the bestest

V3

Fountain of youth chase, at a faster pace
Erase years, like Benjamin, button up
Go fucking hard, so get that butt on up
Run up the score, sun up when I step out the door
But I'm reigning over these lame men
Have to dumb it down, speak in laymen
Answer your girl's prayers, she say amen
Control her like I'm gaming
But I ain't playing, try pushing my buttons
Had to prove a point, when you say that I'm nuttin'
In other words going in for the win
Then I'm gone with the wind
Classic, verbal ass-kick
I should be a nominee
For the best comedy
When my state is peak
Cuz the brain leaks nuggets and gems
So I guess I kinda do mine
You mind?
Didn't think so
Let me dumb down the flow
So you simple minds can just sit back and enjoy the show

Outro

Took it to the max, and
Once again I'm sick of climaxing
Great at peak stating
Red lining the EQ
Make it tough to equalize
We are not equal guys
EQ masters
Emotional intelligence
I can tell you got at least a little sense
'Cuz you feel my presence
At most, you peasants
Would give you some more sense
But I'm out of pocket
Don't you worry, change gonna come
Wh wh whip into a rocket
Gassed up, fueling it
And I know you feeling it

This song is intended to have multiple meanings. The first is that me and my closest friends are constantly striving to be in peak mental and physical condition, as we steadily chase the fountain of youth. The 2nd is that we have mastered hitting the sweet spot in terms of optimal party energy without taking it beyond the limits.

This is the first time I've used spoken word/acapella on a track

Better Than My Idols - Outro - Fountain of Youth

Yeah, 41 years, poured out the blood, sweat, and the tears
Reflecting back like mirrors, dissecting worries and the fears
All I overcame, toasting, cheers, grab the beers
Now I'm bolder than ever, stop, me, never, smarter, clever
Start, and rev her up yeah, I level up
Hot shit flow erupt out the volcano
Bump my shit like its cocaine, bro
A little insane, though
How I found the fountain of youth
Now I call my shots like I'm Ruth
Baby, cannot tame me, speak the truth
After every verse a mic drop in the booth
Matter fact I punt that shit, I bump my fist
Continue knocking out the bucket list
Laughing to the bank
Knowing that you cannot fuck with this
Timeless, light is lime, miss, I'm the finest
Yeah, your highness, got you tripping
On how I'm flipping the script with my own movie
I'm the only one left who moves me
Baby I'm moving way beyond idols
Finding my groove as they remain idle
See them on way up, they on the way down
And I am so high I'm so far from a comedown

The album closes out with the trifecta, as I use the same beat from the intro and interlude to put the finishing touches on the Better Than My Idols journey. The ultimate purpose and intent of this project is to show my personal growth, as I've put forth a tireless work ethic to chase down the ultimate happiness and purpose of life. Through these efforts, I've become the most comfortable in my skin that I have ever been. The music is release therapy to constantly remind myself that I am just as good as any soul on the face of the earth, and that I shall not put anyone else on a pedestal. As my father humbly repeated throughout my life "We are not better than anyone, but no one is better than us."

Freestyles

All The Way Up Freestyle

Might say I be Trumpin these bitches
They let me touch their pussies,
Mutual consent, game well beyond rookies,
Fred Durst style, did it for all the nookie,
Haters gonna hate, keep talkin', lookie lookie
Droppin the realest shit out, for a rookie,
Worry bout the fire hazard laws when they book me
Crowd eats it up like that monster with the cookies
Time of their lives, Ferris Buellers, playin hookie
90s reference, still on point with the relevance
Series of events make me wanna repent
But I'm an atheist, far from heaven sent
Must be hellbent, better pitch up the tent
Insecurities, fears, drowned with the beers
Game elevated higher, switching the gears
Make it that much easier to poke em in the rear
Wanna be models, performin in the mirror
You know my motto, never sit, never settle
Kinda like boiling water, sneaking out the kettle
Rising to the top, snatch the gold medal
Lead foot slamming on the motha fuckin pedal
I'm a don, I'm a pretty boy, yeah, I'm a piece of steak,
Tryin to keep the pace, boy you better pump the brake,
Give me a break, not even close to my level,
Not even when I was consulting for Seattle-based Revel
Now I'm rappin, and I'm dope, and I'm white, and I'm sick
Sicker than Mike Vick, pickin on them dogs,
Slangin that dick, like a logger chuckin logs,
6,7,8s, couple hogs
Transforming them to princesses from frogs

I Think About You Freestyle

I think about you and the love that we made
I think about, too, all the roles that we played
Role playing games, then we giggled when we laid
That blond-haired wig with the pig tale braids
School girl outfit, you were flirting for some grades
And I was the teacher, mentor getting paid
And you started bringing in the girls, getting gay
And I started offering assistance with some aid
All of those pipes draining fluid, getting sprayed
Raiding those panties, rubbing heinies smacking fannies
Writing songs about it, should've won me some grammies
Kama sutra moves, shoulda pulled me some hammies
You know taboo stuff, keep it quite round the families
Under the table, sneaking, giving me the handies
Being a little bold as we buzzing off the candies
Executed flawlessly, no need for the plan bs
Jamaica sunset, on E, cool breeze
Observing all the different types of Ts and the Ds
Blazing up the endless supply of the trees
Perfect placement when vajazzling the beads
Playroom to fulfill fantasies and needs
Exhibitionists, kicked it off, taking leads
Power couple moves, best of show, best in breed
The simple folk bow, pay homage, pay heed

Stumped Off The Whiteness Freestyle
Who wants a piece, come tell, come tattle,
Feast on anyone wanting to challenge, battle,
Best tighten those belts on those seats, those saddles,
Cuz I slaughter fresh meat, like beef, like cattle
All this7time you've been wasting, just tragic
My stuff is way more deep, dense, magic,
Compared to your stuff that sits still, just static
Skills leaps and bounds ahead, its drastic
Everything I drop, sounds dope, fantastic
Critics will soon realize it's all classic
You should just wrap it up, like plastic
Boot you right off of the stage with an ass kick
Look how I master my craft, it's so quick
Verses I capture in drafts, in just tics
Faster than spread of infections, so sick
Lasts and stands strong for inspections, like bricks
Cuz I spit the fire that lights the top of candlesticks
Melt away foes like the wax on the wicks
Felt holes and racks on some fabulous chicks
Dealt blows and smacks, but healed wounds with the licks
Helped souls attack problems head on and fix
Yelped those with snacks leading to finger licks
Welp chose to pack in some jokes for some kicks
DJs please tell those best tracks on the mix
White rapper, will soon compare him to Kendrick
Cross genres, better than Hendricks
Double entendres, tongue ties and twists
Head filled with craziness knowledge and wits
The pen gets, abused, defenseless
Or OneNote, keystrokes, fingers relentless
Controlled by a brain with a mind that's restless
Never ever ever will you ever best this

Aligned Freestyle

Yeah yeah, I feel ya, like the head pain in the morning from the downing of tequila
Front of mind like looking at the forehead in the mirror
Vision that you've laid couldn't be made any clearer
Dear sir, what do you fear more
that I wasn't lending ear or response wasn't sincere
Let's just finish up this these beers, cheers to where we go from here
Whether near, far, wherever we steer this car
Collectively we form, elect to raise the bar
Selectively perform, rejecting social norms
Project and transform, like insects we will swarm
Get this shit poppin', like parties in dorms
Challenge authority, by all ways, means, forms
Create storms, just like rain dancers
Pivot as we go, knowing we don't have all of the answers
We gotta move fast, to stop the spreading of the cancers
Get some quick wins to stop the naysaying banter
Those who rant, say you can't, plant you in your tracks
Try to explain greys, but they only see whites, blacks
Trying to pave the way, and they like to spot the cracks
Cemented in their ways, seeing personal beliefs as facts
Only seeing dreams when their laying on their backs
Dream killers, Freddy, Jasons, on attack
But we're wide-eyed, feenin', like we're junkies on crack
Try to keep up, better pick up the slack

Freestyle Bali

Fresh off another massage, surrounded by rose petals and flowers
Oil still fresh on the body and collar
New tally, 6 hours for 36 dollars
Want me to show you how to find the values, come holler
No bother, teach you how to spend
No happy endings, but still happy in the end
Cuz the mind, body, soul work still on the mend
For 2018, coming around the bend
And you better have your ears ready to lend
For a new raised bar that I plan to tend
Cuz all the wordplay penned will be starting to trend
Make you want to share with friends, click and hit send

Dark Night Verse

It was a dark night, Heath Ledger
End of life thoughts, heading off the ledge, or
Bankrupt-like, closing out the ledger
Been living on the edge, Aerosmith endeavors
Flying real high, as if had wings and feathers
Through lightning storms and rains, really ugly weathers
And whether right or wrong, doesn't really matter
Blocking out the know it alls, chiming in with chatter
Spectators and judges, smarter than the batter
Feeding off their egos, swollen, getting fatter
Been a while since I lingered, hovered, pitter pattered
Far from inspired or flattered, more like worn and battered
Ol' Dirty Bastard, drunken master
Tornado of wild thoughts, disaster
Ripping right through the heart, core, plaster
Race me to the end, sure to get there faster
Blast past you there, sea breeze, feel air
On a tear because I am a terror
Horror flick character creating a scare
Releasing private thoughts without a worry or care
Those listening close pass blessings and prayer
Yes, having been blessed, feel, special, feel rare
But life feeling empty, alone, bare
Sitting all alone at night in the chair
Having no one with a convo to share
No one to compliment, to match with, to pair
So I write these lyrics while empty my stare

Chorus

Yeah, regrouping man, soon fly high like superman
Coup de tat, takeover plan
Yeah, regrouping man, soon fly high like superman
Coup de tat, takeover plan

Hey Mamma Freestyle

Hey mamma, you've been sooo sooo good to me
Better than any mamma in the world, could ever be
Showered me with attention and so much praise
When playing those sports, or getting those grades
PTA parent, involved with ceramics and plays
Involved in every single moment, memory, phase
Put me through school with what you earned and you saved
Filled out all my forms for all the financial aid
Never forget back in the day when you made
Peanut butter and jellies, with the doritos, Kool Aid
Band aids on boobos, from when I fought and I played
Cleaned up after me, you were my personal maid
Even when I was lazy, it was my bed that you made
When I was sick or alone, you were my friend and you stayed
Guardian angel, you protected and prayed
Stayed up all night when I was worried, afraid
You know when I strayed from my bed, came to your door and I cried
When I asked that silly question what would I do if you died
Protected me from strangers when I was embarrassed or shy
Or when daddy got real angry, giving the eye
Never denied when I requested some fries
Dealt with the banter in a house full of guys
But you were the rock, family jewel, the prize
Don't you ever forget that you were the glue with the ties
Held us all together through the lows and the highs
Amazing ride, but how fast time flies
Damn I'll love you 'til my death, my demise
You've made my life such an upside surprise

Momma Loves Me Freestyle

Sometimes I got confused about the views
Of the preachers on the alters, while I was sitting in the pews
Pops sat us in the front as if we were the chosen few
Front of the gates of heaven, just paying our dues
Minding ps and qs, though inside a burning fuse
Glared to pay attention, but I pretended, refused
To listen to those same old scriptures, reused
Positions of power, abused, me just straight amused
So many cues, like on the wall of the pool hall
To break away from it all like a never-ending fall
You know increasing pace, vanish without a trace
Snoop Doggy Dogg, murder was the case
Reinvent myself, return to scene, new look and face
What lies beneath, under the sleeve there lies an ace
Enlightened in the mind, flow elegant with grace
Delivering my sermons over instruments and bass
Things that really matter, quite down the chatter
Step up like climbing ladder, or to the plate like batter
Anyone confused about their path go round up, gather
Give you the news that matters like Dan Rathers
But uncut without filter, Marshall Mathers
Right to the core like penetrating daggers
Packaged nice and neat like assisted by some baggers
Every single quote worthy of Instagram taggers
So comfortable in my skin, you can see it in my swagger
Pose like on a poster, on a billboard in a mag, or
Like the paparazzi's snapping and I'm top down in a jaguar

Freestyles

Glass Animals Freestyle

Let me take you back, remind you how good I'm at
Flowin up and down the track, spitting nothing but the facts
Packing too much in the lines
So far ahead of times, like I'm living in the future
Of which looks pretty bright, a movie, the feature
Everyone stares and claps from the bleachers
Street ored respect, by those leaders, Big Meechers
Play cold, but sunning with those life is a beechers
Worshipping like those Baptists do to those preachers
Cuz I give better lectures than professors and teachers
Man let me tell you where I'm about to take it from here
Running laps around ya, so fast like in a leer
Man like faster then downing a shot, shot gunning a beer
And like I've only given effort a little over a year
And like fuck ya other competition, I'm the one you should fear
I slaughtered all of them, homies tatted the tears
And like yeah, I'm stepping to your face, not from your side or your rear
No blind-sighted behavior, let me get it nice and clear

Welcome to the Present Moment

Welcome to the present moment, better live it, better own it
Body out of shape, time to shape it up, time to tone it
Time to ease off of the greasy food, the Dunking Donuts
Spend more time investing in yourself like you just got a bonus
Need me everywhere, better duplicate or clone it
Got the master man, all the pieces and components
To extricate all the evils and the dirty rodents
Living in the present time, in the present moment
Demonstrated to the fullest, proud to say I've grown and shown it
Heart worn on the sleeve like I pressed it on or sewn it
Matter fact should probably turn it to a clothing label
So it's top of mind and topic of the convo at the table
Collectively work through these days and times that are unstable
You know all the problems on the tube, and on the web, and on the cable
We can overcome and help each other out, we are able
Ain't a fictitious tale, deception or a fable

Incarcerated Soarfaces Battlerap Freestyle

I'm doing this better than anyone could ever think or imagine
Spit hot fire, like a devil or a dragon
Try to keep up, you falling behind and dragging
Trip up on the old style, pants off the ass and sagging
Fumbling the words, ball in the mouth and gagging
You's a cuckold, girl I'll take from, I'm bagging
Take advantage right in front of, I'm tagging
Giggle right front of face, we joking, we laughing

Having the time of our lives at your expense
If it doesn't make dollars, it doesn't make cents
I own my own home, I know you one who rents
I'm getting on your nerves, make you uncomfortable, tense
And I'm not going anywhere, pitching up the tents
Poking up your logic, holes, dents
Disregard your boundaries, poles, fence
Run you through the ringer, rinse, cleanse

How Many Times Drake Diss

How many times I gotta hear that it's that Drake shit
How many times I gotta hear that girls embrace it
How many times it crossed my mind that it's the fake shit
I can outdo him on his own beat, let me lace it
Yeah, face it, carbon copies, traced it
Everything sounding the same, so basic
You one of those sheep, chiming in like he aced it
Time again, top of the charts for the win
No time to get jealous, that's a shame, that's a sin
Props to the man, gripe with pop culture, not him
Tip of the cap, yeah tilt of the brim
Master with the marketing, slam dunks on the rim
Yeah, rarely seen a loss, no taking hits on the chin
But I can do better, put money on, yeah, the cheddar
Body with the lyrical content, leave dead, or
off top of dome, soccer ball with header
Yeah don't know Kiki, never seen, never met her
But think it's real cheesy, how they sing along and sweat her
Giggle in their dresses, wiggle in their leather
I'm bringing more heat, changing up the weather
Flowing like the breeze, connecting like a tether
Doing this with ease, even getting better

Succession Freestyle

Yeah that's right, time for a succession
Hand him the mic, give him the blessings
Mastered the game, mastered the lessons
Flipped up the script, changed up the questions
Airbnb, disrupt the Westons
Jeff Bezos, disrupt the Waldens
South Park episode, rip up the Baldwins
Old girl long gone, bring in the tall twins
Hurricane season, no losses all wins
Aired out and strong armed like Marino with the Dolphins
Building that dynasty, like squads from Miami
Stack up the wealth, keep it all in the family
Mafia style, you ain't heard something this hot in a while
Yeah, rush through the doors, fuck single file
Stomp on the floors, turn up the dials
Sound bound to carry, miles upon miles
Protect the ladies, babies and childs
Stampedes and chaos from fanbase and crowds
Your days outnumbered, keeping it one hundred
No longer vested, no longer funded
Soon to forget everything you had done did
You have now been out-classed out-numbered, out-stunted
Balls that used to clear fences now bunted
Bullies now taking your pride and your lunch kid
Legacy unraveled, untied, undid
Microphone drop, fuck that, punted

Nice Guy Mentality

It's a difficult world we live in, especially with the women
Who pay you no mind, less ya on the verge of winning
Or turn a blind eye for those who get by with sinning
With dreams of new linens, starting new beginnings
Those who can provide a better life for the children
Lord willing, by any means possible
Ruled by the almighty dollar bill
On surface yoga spiritual, but deep down yearn for thrills
Trade-up society, trade ups for miles
Gives the chills, how well they do disguise
Justify behavior, cover ups with lies
Walking all over those nice, innocent guys
Acting like its bad boys they really do despise
Then again really no surprise
Story never ends, never really dies
Path that leads to heartbreak, tear drops down the eyes
Yeah but I'm gonna keep rockin on, nice guy mentality
Nice guys finish first, defy reality

Into My Feelings Freestyle

The chimers chime in, gotta fix your timing
Too many lyrics, too much rhyming
Maybe get a female to fill some lines in
Sing over top of you, then you'd be shining
Wanna be a baller, become a star, sir
Research the charts, place finger on the pulse, or
Dumb down for pop culture, bottom feed like a vulture
But that would unsettle the stomach, lead to an ulcer
Elevated thinking, not drinking the cool aid
Not comprising values, selling soul to get paid
Or playing personas to get into beds more and laid
Just deliver the real shit, spade called a spade
Made that shit that makes you wanna sit back and think
Deep into abyss until you starting to stink
Roll up that weed, ponder over a drink
Matter fact a six pack, whole bottle of wine
If you pay close attention, you'll realize just how fine
Like undivided, and I'm the only factor, 'cuz I'm prime
No need to change up or refine, let me define
The lyrics that I rhyme will stand the test of time

Da Art of Storytelling Freestyle

Yeah, I took the high road, but I coulda been a bad boy
No Puffy, Mase or Biggie, but coulda got there quickly
Cuz my rhymes and my verses, catching flu and got me sickly
Picky girls be wanting my sensual love and quickies

Feels like billions served the D, and I ain't talking Mickey's
Talking more like hatching eggs, yeah, those little chickies
Cuz yeah that boy be out his mind, always grinding, busy
Flying circles round em like a boomerang or frisbee

They be trying to catch the kid, but only getting dizzy
He be spitting better shit than Lil Wayne and Drizzy
Too bad the sheep flock to weak shit and pop
The weakest of my shit should rise the charts and bubble and pop

Like stop, drop, and roll, cuz it blazing, it is fire
Make you feel like laundry that gets thrown in the dryer
Til the sun rises, cuz I don't and I fade and I don't tire
Til they singing praise like they lined up in the choir

Greetings ATLiens Freestyle

.Greetings ATLiens
Yeah, so you can catch me in Atlanta
If you think you got the stamina
Light up like a flash, better get the camera
Take flight on the dash, everybody passed
Red line on the dashboard, pedal getting gassed
Catch that breeze like sailboat captured with the mast
Moving on the mission and the goals pretty fast
Fear of complacency, ending up in last
Got big plans, gotta do big things
Fly ass-shit, need to grow me some wings
So I can elevate above, get real high
Shoot for the stars past clouds in the sky
Heaven on earth, gonna continue to try
Defy all the odds, ignore all the spectator sighs
Hunger for more, bigger piece of the pie
No giving up 'til the last day I die

Flow Better Than Most Freestyle

I flow better than most, cruise control coast
The host with the most, should brag and should boast
Bout how at most they roast, and I flame and I toast
Stand strong on post make them disappear ghost

No one's touching me, silly, really want to go there
Make me go insane and pull out all of my hair
No one said this rap game is rational, fare
But the shit that I spit is pretty fashionable, rare

Cuz the words are delivered with passion and care
No one should ever even think of bashing I dare
When I raise up out my chair best behave and beware
Grow a set, a pair, if you think you could steal or could share

The spotlight shining down, with your unoriginal sound
Knock you out the ring before the end of the round
While my vibration spreads through the cities and towns
Gaining deserved respect like those kings with those crows

Spotify Plug

16 songs standing strong on the Spotify
Murdered every verse, rest in peace in a hearse
Release therapy from the heart, should have burst
Every word, every rhyme, every line, every curse

Opposite of the worst, yeah sprinting fast in first
No one coming close to matching hunger, matching thirst
No one in the galaxy, the planet, here on earth
Best version of myself yeah to the death, yeah from the birth

Starting to get confusing, writing better than my idols
Well maybe not Eminem, or owner of the Tidal
Even spitting off the top of dome, yeah, no recitals
But still no recognition, awards, or the titles

Yeah, my shit is deep, not that hay for the sheep
Or those who be counting them, not awake, ya asleep
But appreciate those who take the time, who sneak a peak
And know I should be pulling in more miles than Meek

Freestyles

Power Movin' Freestyle

Man I'm working on getting out this mess
You gon' smell nothing but me wreaking of success
Power moving with my queen, like I'm playing chess
You weak ones, pawned off, laid to rest
You ain't gonna stop my quest, time to do big things
Pull strings, orchestrate it, maestro in the cock pit
Lock it down with my Mendoza connect, can the Malbec
Import by container, lawyer on retainer, no brainer
Market to millennials, social media videos, and there you go
Off to the races, old guard chase us, better tighten laces
Pull aces out the sleeve, no magic, best believe
Take it right from under ya like thieves
rake in all the cash like leaves
Take off with breeze, cruise into sunset
Send for friends family, tight circle that stands with me
Fuck with flows, 'til I catch awards and Grammys
Even get those haters to applaud and stand for me
Fuck that, this ain't dream or fantasy
I'm going bananas, better split or jam with me

Hope The Top's Not Too Lonely

Man, I f#% ^ s hate it, I am so underrated
Shoulda already made it, no the ego not inflated
Happy belated, pop the cham until we faded
Parties that be catered, super models shoulda dated
Sharper than a blade, kid, focused like he's lasered
Super-charged as if plugged in to a wall or he's been tasered
Running circles round you like you stuck inside a maze, nerd
Bout to be the shit, and numbered are your days, turd
Man it's so absurd, how I can't get this momentum
Staring at the clock, back and forth the swinging pendulum
Thinking through this marketing plan may be the end of him
Struggling to even sell the so-called friends of him

Hope if I get to the top it's not too lonely
Like this journey unembraced by fake friends and so-called homies
Making all moves by myself, the one in only
Handouts and help surface level at best and phony
Stand out like a unicorn amongst a bunch of ponies
Cronies, Jabronies, time to treat 'em like they flipping pizzas at Tony's
I'll get my cheese on, you can hold the pepperoni, no need for beef
Kill 'em with kindness, grin in the teeth
Cover up the hunger and pain that lies beneath
Hang on for the festive times like a wreath
When I can finally rest my mind and rest in peace

Jay-Z, Roc Nation Promo

I never change, this is j everyday
Bringing the heat to the street in every which way
Global warming, tropic storming, tsunamis be a forming
About to start to my reign, and it's gonna be a pouring
Forecast to last until I slam on brakes or crash
Race to the top of that top 40 shit that's trash
Flawless victories, not a blemish or a scratch
And hang out at the top as I cook batch after batch
Yeah, you know me, just over here visualizing
But I do know my worth, and that my stoke is rising
Roc Nation pay attention, I will not fail to mention
This Sensually Charged album
should fund retirements and pensions

Bernie 2020

We going on attack, Bernie Sanders is back
Millennials off their asses, voting by the masses
Re-allocate the cash, raising the taxes
Backlashes by the upper class and the class-less
Save the democracy from racist and fascists
Hand out some pink slips, your fireds, and some ass kicks
Say bye bye to president Camacho, Mr. Head Hancho
And his little reign of terror, remove the ponchos
Brighter days ahead, grab the queso, nachos
Celebrate for the man we previously had not chose
A man we could trust, we gave him his props, though
This other one we tried to stomach, puked up the bile
Hiding all his tax returns, he claimed to file
Carried over losses, claims proven-falses
Dirty money washes, tariffs on the salsas
Alliances with big money interests who crossed us
Country now stressed with the civil unrest
Foreign relations put to test and regressed
Behavior that used to impeach and arrest
Hope to feel the Bern in the election of next

Homicide Freestyle

No offense, going on the offensive
Extensive lessons over many set suns
Expensive quest to test and drain funds
Make you sick to your stomach, pains, runs
No one on this planet can plan stand or handle it
Pay attention as I ramble a bit
Digest these hard bars, charred from the flames I spit
yeah, like a fire pit

Too legit to quit, MC hammer
Real deal, no scammer, or copycat with scanner
Blazing my own trail as I wander and meander
Been smoothing out the finishing touches like a sander
Add to the fact I'm a creative left hander
Yeah, south paw, been taking jabs to the jaw
From the critics and the cynics, tricked by the gimmicks
But still standing strong, bout to get in my licks
Sharper than razor on Bic, bang out long rhymes quick
longer than Dirt Dig's dick on that Boogie nights flick
And slang D like that as I give it to the chicks
Mix and match words, adjectives and verbs
fly high with the birds, drop dope shit and turds
Funkier than anything ever seen, felt, heard
Herd up the sheep, Sheppard for the weak
Spot 'em like a leopard, feed 'em lemon peppered
Yeah spiced up with the seasoning
I'm writing like the season end

Sweeping through the playoffs, ending as the champion
Oh dear, lend me your ear, as I get some shit off my chest
In desperate need of rest from running circles around the best

Change Freestyle

Yeah, who you gonna vote for
How you gonna make some change
And I'm not just talking about
Change to go in your pockets
But how we gonna blast into space
Feeling safe on some rockets
You know, that Billionaire rocket race
Revolutionary days
Equal rights for gays
Minimum wage raise
Bigger smiles on payday
Remove that gap in pay for the ladies
Trickle down taxes that failed us in the 80s
Giving those at the top just another Mercedes
Making me crazy, not how mamma raised me
Gotta make some change, but can't be lazy
Time and the effort needed not gonna phase me
Time to make our top plan work, not no plan b
Looking up the mountain like a skier on the tee
Gonna reach the top, see the views, oh my God, best believe
Overcome the headaches like we poppin' Advils, Aleves

Bumpin' Freestyle

Man, I'm what you should be bumpin'
Like you taking those blows from the keys to the nose
So dope, you wish you were Pinocchio
Lie it out then snort me like from here right out to Tokyo
Mastered lyrics and flows, challenge those who oppose,
enemies, foes, yeah, change it up like clothes
keep 'em on their toes, bro, as I go, go
Hand em' the needle and the thread because they so so
I'm on another level, turn up bass and treble
Loner, rebel, never sit, never settle
Grew up in the burbs, not the ghetto
Yeah never had to flash the steel, grip the medal
But wake up all the puppets, just like I'm Guppetto
No fiction, can't fight the addiction, on a mission,
Yeah, hijack airwaves, ugh, no permission
Til every single ear forced to listen

Better Than My Idols Freestyle

I'm rapping better than every single one of my idols
Like even better than that billionaire dude who owns the tidal
Man everyone says he's the king, yeah, owner of the title
But year after year, been studying like recitals
I know I can get deeper, right into your vitals
Penetrate with dagger, poke your girl, yeah I tag her,
Hit her with the dick, hit you back like you're it
Whistling, on my way, banana creamed, yeah I split
Shit I've been doing this better than anyone can ever imagine
Spitting hot fire like a devil or a dragon
You're stuck on the old style, pants saggin' and draggin'
Lagging my raps, all my verbal attacks
Spitting the facts, no one's walking in my shoes, blazing tracks
Blazing a trail, but time they let justice prevail
Married to the game, let her take off her veil
Deserving respect from those streets, from those jails
To the burbs and herbs, to the ladies and males
Cuz I drop the dopest punchlines and tails
Take you to new highs, like you bumpin' those rails
If you trying to compare, nothing pales
Tougher than Lenny Dykstra, yeah, Nails

In The Flow Freestyle

In the flow, lost in between the keys
Riding through the notes and melodies
Electric eel in the deep blue sea
Light a path where it's dark for the blind to see
See the sparks, back away the sharks
up, up, away like I'm Tony Stark
Bars harder than iron, man
So so hot need fireman
Like Amazon fire, better head for the river
Amazon prime, way I deliver
Way ahead of time, or should I say behind
Back when they used to care about the rhymes
Back to the flow, of which I'm lost in
Think I just washed ashore in Boston
Freedom trail, or yellow brick road
Maybe I tornadoe'd
Donnie Darko, different universe
Way it feels comparing any verse
Against anyone alive, delivered in a hearse
Know I do it better, know they did it worse
Best in profession, Leo, Inception
Peel back the layers and you'll see there's no question
Be in high alert with emergency responders
When I catch you off guard with the triple entandres
Each word placed heeds your attention
Each line, space, deserves inspection
Show me love and affection
Crown me king, the next election

Can the Malbec Freestyle

Universe presented us a vision, path, a sign
On how we soon to prosper from the canning of the wine
Will make it look real easy, but we're busy on the grind
Elevated, out of mind, way beyond the borderlines
Cordoba connect, red lining to Mendoza
Organic Malbec, keeping the composure
Aot just like a boss, with the demeanor of a soldier
Rub elbows with the owner, tuck and cover the boner
In other words in over the head
But that right there's why I get out of bed
Risk take, make, ownership stake
Fail fast to overcome mistakes
Shake up the industry, export the cans by sea
After we fill them to brim at the brewery
Design sexy logo, share it on the social
Muscle way through all the industry moguls

All Jewed Up Freestyle

Yo, I got 3 bar mitzvahs by the end of the year
Maybe I can parlay to a Hollywood career
Rub elbows with the big money owners and peers
Celebrities in different tax brackets and tiers
Already been earning my spot at the Shabbats
You know say a little prayer, break the bread, taking shots
Far from modest, yahoo, look how I do this
Downplay the significance of Jesus like I'm judaist
Earned seat at the table, catch me spinning dreidel
Kosher soups scooped with ladle, no, I don't play though
Yamaka collection replacing hats with brims
Synagogue trips to clean the soul and cleanse my sins

Freestyles

Pop

Pop, pop, pop, the bubble go pop
All asset classes drop, halfway down from the top
You were just on top, living outside your means
Now you stuck inside, rinsing hands, staying clean
I seen it coming, economy was humming
Fed printing money, longest bull market running
Companies stacking low cost debt
Share buybacks lining pockets of investors, execs
I been perplexed, but now more so to see what comes up next
You know how it unfolds, who gonna go bold
Who gonna crumble, are the show-offs gonna humble
Down a bit, down in it, who gon be chomping at the bit
You still stacking paper, but the kind used for shits
Isolating measures causing depression and fits
Network and the net worth taking major blows and hits
Like you settled to new soil with disloyal Royal Brits

On My Knees Freestyle

Could give two fucks bout your top 5, who you praising
I spit fire, with the elite, johnny blazing
Bar that's been set, I'm lifting, I'm raising
Belittle you in front of your peers, yeah, I'm hazing
God's gift, with a little sprinkle from Satan
Humble as shit, but deserve a better rating,
Stating the facts, while none of you be saying shit in your raps
Run circles around you like I'm doing laps
So fast, most would collapse
Sap the life out ya, no one to vogue for
I devour, not even a fight, refund the voucher
Sit back down on the couch, or
You could just pout more
About my reign, about to pour
Noah's arc, get in the boat, control the oars
King of jungle, the lion, roar
I excite, you pig, a boar
Oh, what I got in store, you little swine
I eat your kind, they bump my shit, they press rewind
Drink the liquor, drink the wine, feeling good, feeling fine
Combine my looks and smarts, and my creative arts
Should get the reel of film cuz no one's real as him

Up For Whatever Freestyle

I'm up for whatever, Pull strings and levers
Connect like a tether, Bring heat, change the weather
In the flow like a feather, Floating around, but stay grounded
9.5 but I rounded, ha, in other words I'm a dime
Lime light, time right, Yeah I might take flight
But I'm already out of sight, Bring light to the night
Spark when its dark, Bite and the bark
Leash off at the park, No more playtime
Pay when I rhyme, You can pay in crypto
Booth looking like a shit show, Every song a hit though
Nothing bit, all original, From little, to lit yo
No more second fiddle

The Bounty

Yeah, you might die, they might split the pie
Form alliances with who you've been defiant with
A tyrant with, with who you been withholding aid
Well the goons lacing up with fatigues, grenades
By any means possible they bout to get paid
Now with the wager on the table, they gon wage war on your stable
Daily life is now unstable, every minute on the cable
News streaming, they scheming, on how they gonna cross the sea, man
See, man, they coming, like they semen, to make you see the demons
Impact of your dealings, narcissistic feelings
Reeling in the hate, as the head of the state
With that make America great again
Propaganda, pop and hand ya, last breath cuz they can't stomach and
they can't stand ya
Victory dance as they remove the cancer
Have you ever had \$3 million on your head
You better run and hide cuz you gonna end up dead
Have you ever had \$3 million on your head
You better run and hide cuz you gonna end up dead

Cold Summer Freestyle Challenge

Cold summer, had the 2020 vision
Plan was all laid with precision
Now it's like we facing Tyson for that title bout
Everybody has a plan til they get punched in the mouth
Everything was pretty good down south
Yeah, down in the dirty, Atl, I know you heard me
But that Corona came in a hurry
Made the people scurry to houses, hibernate with the spouses
Man, that virus trying to oust us, like eliminate the species
Now we chasing wrong kind of paper for the feces
Yeah, leases being broken on the rent, gave up late nights for lent
But not by choice, 40 days with no say, no voice
Watching it crater, poor decisions by the dictator
Couldn't have been later with his response
Ego, legacy control all he wants
No soul, could care less about the death toll
Especially if they go Left when they hitting the polls
Election year, what I fear most?
More hidden agendas, head fakes from pretenders
No one's got cash to make good with the lenders
Spent at Starbucks, spent it on the benders
Real life monopoly, monopolies getting bailed out
Money being printed til they proven it's the failed route
They tout the handouts as we running out of time
To protect their lifestyles earned from white collar crime

Grindin' Freestyle

Fuck up the classics, yeah, with verbal ass kicks
Better than my idols, deserve the so-called titles
Roll call the tight hoes, bro, all that might goes
Into winning this shit, all my shit legit
Yeah, I get it lit, spitting fire like a dragon
Keep up, you dragging
Stumbling, fumbling your lyrics
Crumbling your spirits
Meanwhile, I'm so fearless
Spit fire, yeah, I sear this
Tear drop tatted on the eye
Murdered your guy
For stepping my ring
Sting like a hornet
Fly shit, must have been born with it
Bitches wanna hang like a ornament
Get bent, with the liquor
Your friend, yeah, I'll lick her
But she better move quicker
Cuz I got options, never gonna stop, son
Marathons I run, at full speed
Like I'm popping amphetamines
No one's stopping me from taking your queens
What you gonna do, never step into my shoes
Plus I'm ten steps ahead, better get out the led
Odometer on fire, line always pushing red
Yeah, in other words, I grind, you chase behind
Your girl, pull off her lace, I see her behind
Remove the lace panties, so I can see the fannie
She always been a fan, b, you always been a plan b

Storming The Capital Freestyle

I was just rapping, though
When I saw them storming the capital
Facts if it were blacks, they would blow
Who, you ask, the po-po, the 5-0
Bring in the military, shit would get really scary
Barely a scratch they left with
Justifying it with what the left did
Does that make them right?
Conservative estimates slanted by political views
Sad to see the hate that spews
Fascists views on blacks and Jews
Escaped without a blemish or scratch
Outlasted the Evil leader's wrath
Path like pitfall
Shoulda been last call with all the shit we saw
Silver line on the cloud
healing fine, feeling proud
Reel in the crowd
Cuz it's real and its loud
How'd you come out stronger
Same old song, sir
survival of the fittest
Grip with an iron fist as I knock out my bucket list

O'brian 40th Roast

Go Mikey, It's your birthday
We gonna party like it's your birthday
Over the hill cuz you turned 40
You know we don't give a fuck

Happy 40th around the sun, long run
But heard you been coasting on overpriced bikes
Nice collection of Nikes, hoarding the Jordans
Thinking everybody wants to be like Mike
Brent and Danny hand me the mic
For a little roast, birthday toast
Now your ass over the hill
Lacked the skill to go pro at 6"4'
Speaking of 6'4"s, pimped out your 4 runner
Thinking you're the number 1 stunner
Proud, well-endowed player out the game
Single ladies of Raleigh ain't that a shame?
Thinking Sabrina should be so lucky to love me
Gianna, Avery and Hayes, raising them so lovely
At least in his mind, grinding like a pro
Used to bake the bread, now he stacks the dough
Big swinging D at Lenovo, you know how that go
King of the throne, grown, coming into his own
But no shocker, still playing soccer, still party like a rocker
Weekend warrior, pour a beer, toast and cheer
To the gambler who never lost a bet yet
Stay winning, over the hill a new beginning
First 40 were easy, next 40, a breeze, G

Future Is Female Freestyle

The future is female, more like the present
Present my findings, no more silver linings
Come out from hiding, time to start shining
Me too opened our eyes from the blinding
I'm with the guys who sympathize
Always been supportive through the lows and the highs
And giving fair portions when we're splitting the pies
And playing supporting cast when it's your turn to rise
Emphasize with those underappreciated and sad
As I've seen through the lens of a stay at home dad
Big bro was Mr. Mom, making sacrifices
Reversal in roles a life lesson, not a crisis
If you try to learn or heard from a birdie
I've been on my own little spiritual journey
Crossed paths with many women strong and supportive
Guys who gave up on personal growth, I grew bored of
When we grow together, so much more to love
Beware of us in the age of Aquarius
Working on the chakras, please do not knock us
Who put the natural healing in front of trips to doctors
Driving positive change, blazing lanes
Elevated minds, stimulating brains

Jasper
Springs
